Strategic Values	Description
Efficiency and effectiveness	Efficiency measures the extent to which resources were used to deliver a particular level of services. Effectiveness measures the extent to which we have attained the outcomes community members expect based on the IDP process
Accountability	Accountability refers to the degree to which people are held responsible and required to account for their decisions and actions.
Innovation and creativity	Innovation refers to changes to products, processes and services in an attempt to improve cost, efficiency or effectiveness of service delivery; it means to do things differently.
Professionalism and hospitality	Business Dictionary defines professionalism as "Meticulous adherence to undeviating courtesy, honesty, and responsibility in one's dealings with customers and associates, plus a level of excellence that goes over and above the commercial considerations and legal requirements." It is about personal ethics, quality work and a quality attitude. Hospitality in the sense of generously providing care and kindness
Transparency and fairness	Transparency refers to the extent to which relevant information and decision-making processes are made known to stakeholders. Fairness in the sense of treating community members in a just and equitable manner
Continuous learning	Continuous acquiring of new knowledge, behaviours, skills and values to ensure best quality service to the community as well as to keep abreast of changes in local government
Conservation consciousness	Deliberate and purposeful protection, preservation, management or restoration of wildlife and natural resources

FOREWORD FROM THE MAYOR

Mayor: Cllr MM Malatji

This 2023/24 - 27 IDP provides the strategic direction of the municipality, including the projects that will be undertaken in the municipality. The Integrated Development Plan (IDP) is a strategic development plan reviewed annually to guide all development planning in a municipal area. It also informs municipal budgeting and resource allocation as prescribed by the Municipal Systems Act. It is through this strategic document, that we will co-ordinate the work, taking into account the existing conditions and resources available for development.

The Municipality is faced with the challenge of using scarce resources to maintain and lift our ability to continue to ensure service delivery remains a priority to uplift the living conditions of our people. We are confident that our 2023/24 IDP will try to address the concerns of our people and implement the projects as identified in our IDP. However, we must accept that it is almost impossible to address all the needs of the people at once and that implementation of projects will continue to be slow in some areas as we strive to secure sufficient funds to succeed. We will need to improve our income and ensure that people pay for services so that we can provide more in terms of infrastructure and renewal and maintenance of equipment.

A breakthrough in increasing revenue collection through our Revenue Enhancement Strategy, will further fast-track delivery of quality services. This investment in quality of service is hoped to contribute to tourism development as alternative economy and make the Municipality the destination of choice. The Strategic relations with Kruger National Park and beneficiation of Marula products, should entrench our capacity to attract investors to support development initiatives of our Municipality.

The triple challenges of Poverty, Inequality and Unemployment can only be undermined through infrastructure development, quality services as per identified projects in the next three years, as well as jump starting and reigniting our local economy to restore the dignity of our people. A catalyst for such an onslaught, remain our continued healthy relationship with our strategic partners in the Mining community, especially Palabora Copper, Foskor and Stibium. Through the projects reflected in the IDP, we seek to leave a lasting legacy to the

communities of Ba-phalaborwa, which will set the tone for a caring, people-centred, people driven and developmental local government for generations to come.

The 2023/24 IDP is approved for the purpose of implamentation in line with the provision of section 16 of the MFMA.

CLLR MM MALATJI

MAYOR

Executive Summary by Municipal Manager

Municipal Manager: DR KKL Pilusa

The Municipal Systems Act 32 of 2000 requires Municipalities to prepare and adopt Integrated Development Plans (IDP's). Municipal Planning should be developmentally oriented in order to ensure that it:

Strive to achieve the objects of Local Government set out in Section 152 of the Constitution.

Gives effect to its development duties as required by Section 153 of the Constitution.

Contribute to the progressive realisation of the fundamental rights contained in Sections 24, 25, 26, 27 and 29 of the Constitution.

The IDP is the principal strategic planning instrument which guide and informs all planning and development in the Municipality.

In compliance to the Act the Council of Ba-Phalaborwa Municipality has delegated the authority of developing the IDP document to the Municipal Manager. The Municipality approved a Process Plan which guided the compilation of the 2023/2024 IDP, Budget and PMS.

The Integrated Development Plan is a planning tool for the three spheres of government in achieving the aim of accelerating service delivery to our communities. This IDP is aligned to the National Development Plan 2030 Vision, and it is therefore a stepping stone towards advancing the goals of the National Development Plan. Consultation and engagement with communities and different stakeholders regarding the Municipality's development planning processes are therefore critical. Through our public participation programmes, the communities of Ba-phalaborwa have reaffirmed their needs, which include the provision of water, roads maintenance, electricity supply, health and educational facilities. The funded Projects identified in this IDP will be implemented through the Service Delivery and Budget Implementation Plan (SDBIP) and monitored quarterly. Some of these projects will be implemented in partnership with relevant stakeholders

DR KKL PILUSA

Chapter 1: Planning Framework

1.1 Introduction

The Municipal Systems Act No 32 of 2000 requires all municipalities to produce Integrated Development Plans (IDP). An IDP is a tool used by the Municipality to plan future development within Ba-Phalaborwa. It guides and informs all planning, budgeting, management and decision-making related to delivering services and development in the municipal area.

1.2 Legislative Background and Policy Imperatives

Section 25 (1) of the Local Government: Municipal Systems Act, Act 32 of 2000 requires municipal council to adopt an integrated development plan. The plan is a five-year plan which must be in line with the council's term of office. The plan serves as a strategic plan document for the municipality. It details the municipality's short term and long term objectives and strategies.

At local level, a number of fundamental issues impact on the planning processes of Ba-Phalaborwa Municipality. The municipality is informed by National Priorities. Provincial and District programmes such as NDP, New Growth Path, NSDP, LEGDP and District Growth and Development Plans are key plans to be considered by our municipality in the process of planning

The National Development Plan (NDP) offers a long-term perspective. It defines as a desired destination and identifies the role of different sectors of the society that need to play in reaching the goal. The NDP aims to eliminate poverty and reduce inequality by 2030. According to the plan South Africa can realize these goals by drawing energy of its people, growing an inclusive economy, building capabilities, enhancing the capacity of the state, promoting leadership and partnership throughout the society.

The Limpopo Development Plan (LDP) sees the competitive advantage of the Province in mining, agriculture, tourism and manufacturing. Clustering is viewed as key to success in these sectors. In case of the District, the strategy emphasis investments in agriculture, forestry, tourism and to a lesser extent, trade. In order to give effect to the strategic objectives, as spelled out in the electorate mandate of the ruling party, the provincial Government of Limpopo has contextualized ten priority areas, as contained in the Medium Term Strategic Framework into key strategic priorities which will guide service delivery for the next five years.

1.3 Powers and Functions of Ba-Phalaborwa Municipality

The table below exhibits clearly the powers, duties and responsibilities assigned to Ba-Phalaborwa Local Municipality and district municipality. It lists all matters listed in Schedule 4B and 5B of the Constitution and the division between local and district municipality in terms of section 84 (1) and 2 of the structures Act.

POWERS & FUNCTIONS	AUTHORISATION	RESPONSIBLE DEPARTMENT
Air pollution	No	Mopani District Municipality

Street lighting	Yes	Technical Services
Traffic and Parking	Yes	Community Services

1.4 Institutional Arrangements to Drive IDP Process

In order to manage the drafting of IDP outputs effectively, Ba-Phalaborwa Municipality institutionalized the participation process thereby giving affected parties access to contribute to the decision making process. The following structures, coined to the internal organizational arrangements have therefore been established:

Structures	Composition of the Structure	Role of the Structure
IDP, Budget and PMS Steering Committee	Mayor (Chair), Chairpersons of Portfolio Committees (EXCO), Municipal Manager, All Directors, IDP Manager, PMS Manager, Assistant Director Strategic Planning and Budget Manager	<ul style="list-style-type: none">• Supervises the implementation of IDP, Budget and PMS planning process• Submission of IDP, Budget and PMS to Council and MEC for CoGHSTA
IDP Representative Forum	Stakeholders, community structures, NGOs, Business, Sector Departments, Traditional leaders, Ward Committees,	<ul style="list-style-type: none">• Confirm the developmental priorities of the municipality• Represent the different community structures in development decision making
Council	All Councillors	<ul style="list-style-type: none">• Approves the IDP Process Plan and IDP
Ward Councillors and ward Committees	All ward Councillors and ward committees	<ul style="list-style-type: none">• Link planning process to their wards.• Collect, discuss and prioritise ward needs.

1.5 IDP Process Overview

Integrated Development Planning is a process that encompasses local stakeholders and the municipality to draw a developmental plan of how services will be rolled out. The IDP process is informed by the Municipal Systems Act to be a five-year strategic instrument that informs all the planning in our municipality. The IDP needs to be reviewed annually as stipulated in the Municipal Systems Act. Ba-Phalaborwa Municipality adopted its Process Plan on the 27th of July 2022. The Process Plan is in line with the Mopani District Municipality's IDP Framework.

The Process Plan unfolded as initially adopted by Council in July 2022. The dates on the process plan were adhered. Wherever there were postponements a date was identified to achieve the target.

1.5.1 The following activities were planned and meeting were held during Ba-Phalaborwa IDP review period:

IDP, Budget and PMS Process Plan

Period	Activity	Activity Description	Output
27 July 2022	Preparatory Phase	Develop Framework & Process Plan and Confirm IDP/Budget/PMS Structures	Adopted Framework & Process Plan
October - December 2022	Analysis Phase	Data collection – ward-based planning. Community satisfaction survey	Situational analysis (State of Development Report). Prioritised ward needs
Dec 2022 – Jan 2023	Strategies Phase	Strategic planning session	Strategic Plan (Development priorities, objectives, Key Performance Indicators and targets)
March 2023	Projects Phase	Development of projects list Establishment of project prioritisation task team	List of prioritised projects
March 2023	Integration Phase	Submission of sector plans	Sector plans
March 2023	Approval Phase (Draft IDP, Budget & PMS)	Compilation of Draft IDP, Budget & PMS document	Approved Draft IDP, Budget & PMS document
April 2023	Public Participation (Draft IDP/Budget)	Public participation on the Draft IDP, Budget & PMS	Comments & inputs on the Draft IDP, Budget & PMS document
May 2023	Final IDP, Budget & PMS	Analysis & integration comments on the Draft IDP, Budget & PMS	Final IDP, Budget & PMS

Implementation of the IDP, Budget and PMS Process Plan

DATE	STRUCTURE	PURPOSE/ACTIVITY
July 2022	Technical Committee	Presentation of the IDP, Budget and PMS Process Plan
July 2022	Steering committee	Presentation of the IDP, Budget and PMS Process Plan
July 2022	Council	Adoption of the process plan
December 2022	EXCO, Senior Management, Middle & Lower Management, Unions & Strategic Partners	Strategic Planning session
March 2023	Technical Committee meeting	Presentation of the projects
March 2023	Steering committee	Presentation of the projects

March 2023	IDP Representative Forum	Presentation of the draft IDP projects and Budget
March 2023	Council	Adoption of Draft IDP
03 April – 06 May 2023	Council and Community members	Public Participation of Draft IDP
22 April 2023	Technical Committee	Discussion of the public participation report
23 April 2023	Steering Committee	Presentation of Public Participation report
24 April 2023	IDP Rep Forum	Presentation of public participation report

1.5.2 Public Participation outcome on the Draft 2023/24 IDP, Budget and Proposed Tariff book

Inputs/comments raised during Public Participation consultations through media

The following were raised by community members as inputs of the draft IDP:

Community needs

- 1 Water provision
- 2 Need for Culverts
- 3 Rehabilitation of tar roads
- 4 Grading of streets
- 5 Maintenance of electricity infrastructure
- 6 Electrification of new settlements
- 7 Need for RDP houses
- 8 Need for Library in Makhushane
- 9 Need for Apollo lights at hot spots.
- 10 Need for streets lights in Lulekani
- 11 Replacement of old water Infrastructure in town, Namakgale and Lulekani
- 12 De-bushing

1.6 Basis for IDP Review Process

The preparation and review of the IDP is a continuous process providing a framework for all development planning in the municipality. As such the IDP is not only annually assessed in terms of delivery and the prevailing conditions in the municipality, but also improved upon each and every year.

The following aspects informed the 2022/23 IDP Review process:

- Updating baseline information to ensure sound decision-making in addressing service delivery gaps;
- Aligning Sector Departments' strategic plans to the district-wide priorities and service delivery programmes;
- Responding to issues raised during the Ward based planning process;
- Strengthening focused community and stakeholder participation in the IDP processes;

- Updating and developing pending sector plans and programmes of the IDP; and
- Reviewing the current objectives, strategies, programmes and projects;

The Integrated Development Plans for all Municipalities in Limpopo were assessed by the MEC of Cooperative Governance Human Settlements and Traditional Affairs. The Ba-Phalaborwa Municipality 2022/23 IDP has been rated **high** by MEC of COGHSTA. This confirms the creditability of the IDP document of the municipality.

1.7 Strategic Performance Overview

The Municipality is faced with developmental challenges in terms of service delivery provision. The state of electricity infrastructure, roads, water and sanitation in Phalaborwa needs urgent attention. The demand for services in the townships and the rural areas puts a lot of pressure on the municipality given the revenue challenges that the municipality have. The Municipality not being the water authority is a challenge in ensuring the provision of water for the residents of Ba-Phalaborwa Municipality.

Through the process of ward-based planning and review of the municipality performance and the strategic session, the municipality was able to develop key priority issues for the 2023/24 financial year. The ward needs priorities are detailed in the Analysis Phase (chapter 2 of the IDP 2023/24). Key among the municipality priorities is the refurbishment of electricity infrastructure in Phalaborwa, installation of storm water culverts/bridges and the upgrading of roads from gravel to tar. Also to ensure that internal controls are in place in order to get the clean audit opinion.

1.8 Municipal Priorities

- Acquire more resources to provide and maintain the existing and proposed infrastructure
- Ensure that all communities have access to electricity
- Create job opportunities and reduce poverty rate through infrastructure development, support of SMME's through municipal supply chain (procurement) and service delivery
- Provide waste removal to all communities.
- Increase revenue base

Chapter 2: Municipal Profile

In this section an overview is provided of the important socio-economic indicators and trends of the Ba-phalaborwa Local Municipality highlighting issues of concerns in terms of challenges that the municipality currently experiences. As a basis of reference the municipality has considered the demographic information that was provided by the STATSSA census 2011 and STATSSA community survey 2016 respectively

2.1 Description of Municipal Area

The name "Ba-Phalaborwa" was given by the Sotho tribes which means better than the south. Originally it is a mining town and still home to the Ba-Phalabora, the massive open pit mine is Africa's widest man-made hole at almost 2,000 meters wide. Ba-Phalaborwa Municipality is a predominantly rural medium capacity local Municipality. It consists of villages and towns (namely Gravelotte, Namakgale, Lulekani and Phalaborwa). Ba-Phalaborwa Local Municipality is a Category B municipality found in the Mopani District in the Limpopo province. It is situated in the north-eastern part of Mopani, just less than 1km from the Kruger National Park border. It is 220km from Polokwane and Mbombela, and serves as a central gateway to the Greater Limpopo Transfrontier Park through the Gariyondo Border. It is an entry and exit point to the Mozambican side of the Xai-Xai beaches. The area has vast tourism and manufacturing investment opportunities. The Municipality has a geographical area of 7461.6 km² including the Kruger National Park. The land size of the municipality has doubled from 3001 Km² with the inclusion of the Kruger National Park in the 2011 demarcation.

2.2 Demographic Profile

Ba-Phalaborwa Municipality represents an excellent model of population densification, with 94% of the municipal population staying in or around the 15km radius of the Phalaborwa urban complex. Phalaborwa town accounts for 20% and the remainder (31%) is made up of rural population. The remaining 6% of the population comprises of the populations of the Gravelotte, Grietjie and Selwane areas. According to the South African Statistics Census 2011, the Ba-phalaborwa Municipality has increased its population from **131 089 to 150 637**. It must also be noted that the Community Survey 2016 concluded that the population stands at **168 937** with **49 100** households.

2.2.1 Population Trends

The table below depicts from Census 2001 and Census 2011 and Community Survey 2016. Ba-Phalaborwa Municipality in 2001 population was at 131 098 and by Census 2011 the population was at 150 637 and by Community Survey 2016 the population is at 168 937. The population growth from 2001 Census, 2011 Census and Community Survey 2016 is at 18 300.

Table: Comparison between the Stats SA Census 2001, Census 2011 and community survey 2016

Source: Stats SA Census 2011

The total number of wards for Ba-Phalaborwa Municipality is 19 and ward 19 is not shown on the above table. This is because ward 19 was demarcated in 2016 and 2016 Community survey did not aggregate to ward level.

Interpretation and Implications to the developmental mandate of the Municipality

Ba-Phalaborwa Municipality presents a good model of population densification, with 94% of the municipal population staying in or around the Phalaborwa urban complex. The remaining 6% comprises the populations of the Gravelotte and Selwane areas. The 94% leaves within a distance of 15km from Phalaborwa town. Namakgale and Lulekani, together, account for 49% of the population within the Complex; whereas Phalaborwa town accounts for 20% and the remainder (31%) is made up of rural population.

The majority of the population in Ba-Phalaborwa Municipality are young people, they constitute 63% (94 617). This has a serious implication for the future development of the Municipality. There are emerging issues which include issues of environment, gender and HIV/Aids. The municipality should pay special attention to the needs of the young people when it develops its plans and future provision of services and allocation of resources and issues of local economic development.

2.2.3 Educational Profile

Table 4: High level of education for population aged 20 years and older

2.2.4 Employment Profile

Table 5: Employment and unemployment rate

Employed	Unemployed	Unemployed Rate	Youth unemployment rate (15-34)
33 695	20 196	37,5%	50.20%

2.2.5 Income categories

The figure below shows that 63 891 individuals, who makes 42% of the total population in the municipality do not have any source of income. While the rest of the individuals do have sources of income, an income below the minimum living levels, that is R 9,600 per annum or lower than R 1,600.00 as defined by Statistics South Africa. This then requires concerted and integrated efforts by the municipality to create opportunities for decent work and sustainable livelihoods for the people.

Chapter 3: Situational Analysis

3.1 Spatial Rationale

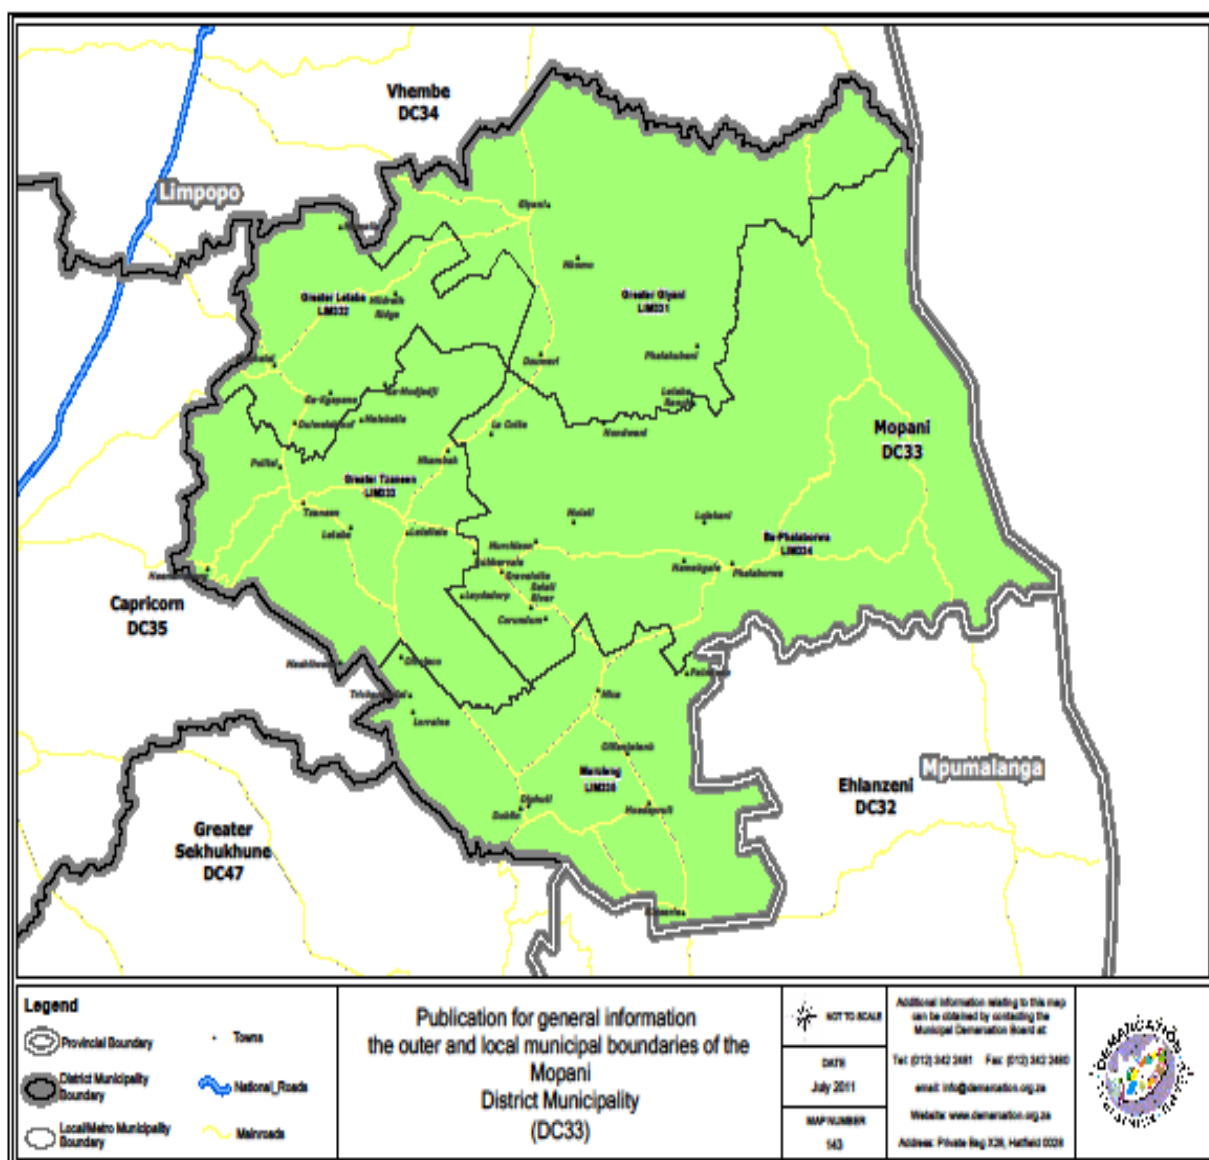

Ba-Phalaborwa Municipality is situated in the North-Eastern part of South Africa in the Limpopo Province. Ba-Phalaborwa Municipality is located in Mopani District of Limpopo Province, where unemployment and poverty are rife. It is one of the five local municipalities in the Mopani District. The Municipality has a geographical area of 7461.6 km² including the Kruger National Park. The land size of the municipality has doubled from 3001 Km² with the inclusion of the Kruger National Park in the 2011 demarcation. The Municipality serves as a convenient gateway to the Kruger National Park and the Transfrontier Park through to the Mozambique Coast.

Ba-Phalaborwa Municipality is a predominantly rural medium capacity local Municipality. It consists of 35 villages and four towns (namely Gravelotte, Namakgale, Lulekani and Phalaborwa). The Municipality has adopted its SDF and Land Use Management Scheme.

Table 6: Settlements in Ba-Phalaborwa

Towns	Villages	Farms
4	35	1029

Table 7: Hierarchy of Settlement

Status of settlement	Areas
First order – Provincial growth point	Phalaborwa
Second order- District growth point	Namakgale
Third order – District growth point	Gravelotte
Fourth – Municipal growth point	Lulekani
Fifth – Municipal growth point	Selwane

3.1.2 Geographic Information Systems

The municipality has a GIS Unit in the Planning and Land Use Section under the Planning and Development Department. The GIS Unit is staffed with only one GIS Officer. The Unit is functional; however, there were challenges with regard to the GIS software and licenses. The municipality is currently developing strategies to fully implement the system in accordance with data processing within other departments.

3.2.1 Development Control

Spatial Planning and Land Use Management Act, 2013 (Act No. 16 of 2013) was signed into law by the President on 02 August 2013, and formally published in the gazette on the 05 August 2013 and its Regulations came into effect on 1 July 2015. The enactment of SPLUMA has brought several fundamental changes in spatial planning and land use management. Among those changes are: -

- Reiteration of the sole mandate of municipalities where municipal planning (land development, land use management) is concerned, placing municipalities as authorities of first instance invalidating inconsistent parallel mechanisms, parallel systems, measures or institution that existed dealing with land development application;
- Establishment and composition of Municipal Planning Tribunals and Appeals structures by municipalities to determine and decide on land development applications. Also providing municipalities with options for Tribunals and appeals structures to be created based on capacity.

In accordance with the SPLUMA, a municipality must put in place an overall planning and land use management system.

The municipality has reviewed the Land Use Management scheme. There is a definite lack of understanding/communication by Traditional Authorities on how the new LUMS will affect any land use change in their areas.

Requirements stipulated by the new Spatial planning and Land Use Management Act will be adhered to in order to comply to the Act and effectively manage spatial planning and land use process.

3.2.1 Land Claims

Spatial planning in Ba-Phalaborwa is seriously affected by land claims. Development initiatives are also hampered by unavailability of land.

Total Municipal Area	Claims in process	Valid claims in progress		No of claims yet to be Validated	% of Municipal Area claimed (Valid)
		Number	Extent (ha)		
7461,6km ₂	28	11	77178,3720	17	9.6%

(Ref. Regional Land Claims Commission report, Nov. 2009)

3.1.5 Strategically Located land for future Development

Land is available along the R71 road towards Gravelotte and between Namakgale, Lulekani and Phalaborwa town. The Township Regeneration Strategy document for Ba-Phalaborwa has identified the centre between Lulekani, Namakgale and Town as a strategic land that should be considered for future residential and business development. The area is on the left side of the R71 roads towards Gravelotte opposite Majeje on the left. The land that is available is in the control of traditional authorities, that is, Makhushane and Majeje Tribal authorities.

3.1.6 Key Challenges with regard to spatial planning:

- There is a need to regulate mushrooming informal businesses;
- Land allocation needs to be done in a planned and coordinated manner between the Municipality and the traditional authorities;
- The red tape involved in the land application process frustrates potential land owners/users;
- Local area planning is needed in the rural areas to ensure pro-active land use;
- There is a high demand for residential sites;

3.2. Social, Economic and Environmental Analysis

3.2.1 Environmental Analysis

The municipality has limited functions on environment in terms of its powers and functions as such there are no environmental section in the municipal organogram. The environment function is the competency of the District Municipality, in for Ba-Phalaborwa; the function is only limited to environmental health. The analysis provided below is contained in the environmental analysis of the municipal's SDF

3.2.1.1 Geology & Geo- Hazards

The Ba-Phalaborwa Municipality is predominantly underlain by gneisses of the Goudplaats gneiss and granites of the Lekkersmaak Granites with quartzitic, dioritic, sedimentary and pyroxenitic intrusions which, combined, are known as the Phalaborwa Complex. This complex formed the basis for the mining industry in the area. The most important minerals mined in Ba-Phalaborwa are copper, phosphate and vermiculite. Magnetite, zirconium, nickel, uranium, iron and gold are by-products mined in smaller quantities. Generally, land within the municipal area is developable. Shallow and exposed bedrock occurs in certain areas affecting the installation of infrastructure services. Certain parts are also prone to erosion and require proper storm water drainage and management. Land development initiatives should include appropriate site specific geotechnical investigations.

3.2.1.2 Soils

Generally, sandy soils occur in large parts of the municipality area, which is nutrient poor and not always suitable for crop production. Soils are prone to erosion where exposed. A Collapsible/compressible and clayey soil occurs in certain parts requiring special foundation measures for structures. Appropriate geotechnical investigations must be conducted for all land development to determine recommended foundation specifications. The majority of soil forms occurring within Ba-Phalaborwa are Mispah or Glenrosa soil forms, with some red-yellow apedal soil forms occurring in the western, higher lying areas. These soil forms are derived from the underlying geological formation. The overall homogeneous geological and soil types can also be viewed in the vegetation types occurring in these nutrient poor soils. The most recent version of the Indicative Risk Profile for Ba-phalaborwa, as prepared by the Mopani District Municipality Disaster Management Centre, soil erosion is identified as a problem in Lulekani, Ben Farm and Namakgale

3.2.1.3 Minerals and Mining

The larger Mopani region is predominantly agricultural based but mining forms an important driver of the economy of the region. Phalaborwa is part of the Spatial Development Initiative SDI with the objective to exploit the unutilized and underutilized potential of the area through combining private and public sector resources. Significant mineral zones in the region are the There are a number of projects that mining companies are exploring within the district. This includes the expansion of rock Phosphate production by FOSKOR, a Phlogopite processing facility, a Koalin clay project, underground copper mining operations at Phalaborwa, surface strip mining of mineral sand in the Gravelotte area, exploitation of heavy mineral deposits in the Tzaneen area (by Red River mining and ISCOR), erection of a steel production facility (Magnetie). There are also small mining initiatives such as the small gold mining projects in the Giyani and Overall the main potential remains centered around Phalaborwa in the Phalaborwa Mineral complex with its copper, phosphate and magnetite resources. Mining development has a potential to contribute over R6 300 million in direct investments through the different ventures/prospecting in the district. Mining development would continue to play an important role in the economy of the area. The potential of decline in the industry in particular in the Phalaborwa area remains a real threat. Given the potential for continued mining activity the development of scattered small resourced based mining settlements and towns are problematic from a growth and service delivery point of view.

3.2.1.4 Topography

The municipal area is situated at 840 m to the west and 300 m to the east, with a higher lying ridge that is running from west to east through the centre of the municipality. This ridge complex is characterised by a series of dominant kopjes and rock outcrops, which form topographical highpoints through the municipal area. The influence of the topography on spatial development is minimal, apart from the few steeper mountainous areas and kopjes as well as lower lying areas, in proximity to natural river and drainage courses within the respective water catchment areas. The topography defines the different water catchment areas with the ridge complex

forming the major divide between drainage towards the Letaba River to the north and the Olifants River to the south.

3.2.1.5 Global warming /Climate change

With its sub-tropical climate, Ba-Phalaborwa is known as the “Town of Two Summers”. Ba- Phalaborwa is situated at 405 metres above sea level. Temperatures range between 23°C and 35 °C and higher with an average annual rainfall of 550 mm. The climate requires that proper attention be paid to land development planning in terms of orientation as well as the use of appropriate construction materials.

Global warming is defined as the increase in the average temperature on earth. As the earth gets hotter, disasters like hurricanes, floods, droughts and raging forest fires do get more frequent. The three hottest years ever occurred have all occurred in the last eight years. Global warming is caused by climate change that result in rise in temperatures. It is recorded that climate change accounts for 160 000 deaths in the world per year.

Climate change is caused by the sun’s radiation (heat energy) that is absorbed by emitted gases into the atmosphere. What really happens is that one-third of the sun’s radiation is reflected by the earth’s shiny surfaces like shimmering glaciers, water and other bright surfaces, back to the atmosphere. Two-third is fairly absorbed by the earth. **Gases like CO₂, methane and nitrous oxide** in the atmosphere absorb heat energy that is bounced from the earth ’s surface. This is naturally balanced to keep us warm here on earth. Otherwise the earth would be too cold at around -18°C. With more human activities taking place on earth, there is more emission of water vapour, carbon dioxide, ozone, methane, nitrous oxide and chlorofluorocarbons into the atmosphere, resulting in more heat energy trapped or absorbed thus increasing atmospheric temperatures. How much warmer it gets down here on earth depends on how much energy is absorbed or trapped up there and that in turn depends on the atmosphere’s composition.

As mentioned above, human activities attached to the increase in CO₂ are cars, industrial productions, energy-producing industries, deforestation and agriculture (inorganic farming). The consequences of rising temperature are many. They include melting mountains of glaciers into the seas, dams, etc, thus increasing chances for floods, strong storms (e.g hurricane Katrina in 2005), altered rainfall patterns, reduction of access to portable water, threat to food security and health effects to poverty stricken communities. Emission of gases causing global warming could be scaled down by utilizing every space for plants, using alternative forms of energy (e.g solar panel, wind turbines heat, power plants) and put strict control against deforestation.

It is clear that individuals, communities and government need to come up with programmes to bring awareness on the causes and effects of global warming and together strategize on control measures for decreasing emission of the gases that exacerbate temperature increase in the atmosphere. The situation in Mopani calls more on the matter since the demographic dynamics indicate that 81% is rural and therefore vulnerable to any natural hazards without clear mechanisms to combat. Organic agriculture should be encouraged, land use schemes should be managed, veld fires be controlled and deforestation be prohibited. Contribution by individual added to contribution by another, avails much. The general impression is that we are affected but specific places need

to be identified and targeted for a realizable solution. It would be necessary to conduct research on the impact of climate change on agriculture sector for adaptation and/ or possibly mitigation to the change.

Using the Local Government Climate Change Support Program, spearheaded by the Department of Environmental Affairs, the Mopani District has already developed a climate change vulnerability assessment and response plan. This plan outlines the following key areas:

- • Agriculture
- • Biodiversity and environment
- • Human health
- • Human settlements
- • Water

In terms of the climate change vulnerability assessment and response plan, changes in maize production was identified as a problem for the agricultural sector, as well as increased risks to livestock. From a biodiversity perspective, the loss of grasslands was identified as a particular area of concern since the grasslands are vulnerable to climate change and form a vital role in water production. The critically endangered Woodbush Granite Grasslands, gazetted as a protected vegetation type, are only found in and around the Haenertsburg area. Protecting this grassland, as well as those found in the upper reaches of the Lekgalameetse Nature Reserve / Wolkberg should be regarded as an imperative. Human health and human settlements may also suffer as a result of climate change with increased occupational health problems, loss of industrial productivity, increased isolation of rural communities and decreased income from tourism. Water scarcity may become a greater problem in the future with less water available for irrigation and domestic purposes. The time for action is now.

As identified during the Climate Change workshop attended by sector departments and municipal representatives, Limpopo, the following information regarding factors for Climate change, was consolidated for Ba-phalaborwa Municipality.

- No water tanks for rain water harvesting
- No use of renewable energy sources (solar energy)
- Illegal sputtering next to waste water treatment plants
- Mining activities

Source: March 2014 Provincial workshop on Climate Change.

3.2.1.6 Surface Hydrology & Catchments Areas

Ba-Phalaborwa Local Municipality is situated within the Olifants River Primary Catchment area, with the tertiary catchment water shed between the Ga-Selati River and the Letaba River taken along the topographical ridge line. The potable water supply for the Ba-Phalaborwa Municipality is abstracted by Lepelle water from the

Olifants River catchment from the Letaba as well as the Olifants River below the confluence with the Ga-Selati River. Water is abstracted from the Letaba River for the citrus industry located near Prieska, much of the water on which Ba-Phalaborwa depends is therefore sourced from outside of or at the municipal boundary. Lepelle Water abstracts the majority of water for distribution in the municipality from the Olifants river, downstream of the confluence with the Ga-Selati River. Groundwater yields within the municipality are considered low to negligible, and cannot be considered as a source of suitable potable water due to these low yields as well as poor water quality. Spatially the major river drainage systems functions as greenbelts and biodiversity corridors along which many larger animal species migrate, thereby providing opportunity for eco –tourism and ancillary land uses. These systems also provide for more intensive agricultural practices such as the citrus farming along the Letaba river. It is also evident from the cadastre that these areas are targets for land subdivision for intensive agricultural practises as well as for ecotourism and upmarket smallholdings and residential estates. Given the presence of these major rivers and other secondary and tertiary streams and drainage systems, it requires compliance with the Water Act in terms of the determining of flood areas with a return period of 1:100 years on all systems in particular within the urbanised areas. It also provides for the opportunity to protect and use these systems for passive and active open space as well as for locating infrastructure services.

Wetland Areas in Phalaborwa

- Majeje
- Mashishimale Village
- Makhushane Village

3.2.1.7 Fauna and Flora

The municipal area mainly comprises of Mopani Bushveld with the indigenous Marula as an important economic driver in the area. There are no red data species present in the municipal area. A number of animals roam freely in the area. Given the closeness to the Kruger National Park this is not unexpected and adds to the attractiveness of the region. Most people in rural areas do not have electricity and use paraffin and candles. The widespread use of wood constitutes a danger to the environment. Aggressive reduction of the natural bush is most evident over large areas. Although there was a big drive for electrification in order to change this, it had little impact on poor communities relying on firewood as a source of cooking energy. Field fires are especially dangerous for game farms and the Kruger National Park. Drought and flooding reduces the grazing and arable land. Alien and invader plant species as well as disturbance and destruction of biodiversity is considered problematic.

3.2.1.8 Protected Areas and Conservancies

These include the following:

- Indigenous Tree Park
- Kruger National Park
- Kgopolowe Koppie
- Letaba Ranch Conservation area
- Hans Merensky
- Gaselati Conservancy

The above represents an important form-giving element of the municipal area and provides a platform for launching the vision of the municipality. A conservation area in general requires a low impact approach towards land development that is sensitive towards the environment. It primarily includes developments such as hiking trails, movement, accommodation, recreation, cultural facilities and basic infrastructure. The interface with the Kruger National Park is of particular importance in that land development adjacent to the Park requires a

sensitive approach. Similar to other natural resource based developments such as mining and extensive farming, developments associated with the servicing of such developments, such as employee housing and ancillary facilities requires careful consideration of land carrying capacity as well as the potential requirements for service delivery/provision , by the municipality.

Geo-technical conditions: The area is generally suitable for development although bedrock occurs at shallow depth within parts of the functionally urban areas, also with the presence of collapsible soils and clayey areas in some parts, thereby creating challenges for infrastructure services provision and construction. The existence and location of exploitable minerals was instrumental to the current urban form.

Soils: In certain parts sandy soils, which is prone to erosion if exposed, is also present. Apart from the sediments occurring within the flood plains soils are generally nutrient poor and not favourable for crop production. Erosion is a severe problem in some areas, attributed mainly to deforestation, poorly maintained cultivation agricultural activities, and uncontrolled sand mining for small-scale brick-making businesses. Soil erosion leads to siltation of rivers and streams and consequent single-species dominance of Typha reeds. As indicated above, this situation ultimately impacts on the potable water supply to Ba-Phalaborwa.

Topography: The undulating topography is generally suitable for development, with the occurrence of some natural kopjes and drainage features that is unsuitable for development. Surface hydrology:, The flood plains of the Letaba, Ga-Selati and Olifants rivers, as well as those of other smaller drainage systems,(with several occurring within the urban complex) poses a risk for development, in particular areas within the 1:100 years flood return period. It also attracts land subdivision for intensive agricultural and eco- tourism related developments along the major river systems that places pressures on these environments. It also provides for biodiversity corridors and greenbelts through the municipality area that need to be treated sensitively.

Sensitive areas: A significant part of the municipal area comprises nature conservation and conservancy areas, with several sites where heritage and places of interest occur. This is an asset to the municipal area that requires special attention in terms of conservation and sensitive development.

Open Space: Urban open spaces are largely defined by the topography and include several kopjes as well as natural drainage courses. In accordance with the existing municipal policy, natural drainage courses and ridges have broadly been identified as urban open space that requires protection and management. Open spaces within the urban areas are generally in its natural state, although parts have been transformed for purposes of small scale or subsistence agriculture and for storm water management purposes. Unplanned encroachment into the open space areas must be monitored and managed. Areas prone to flooding are not clearly demarcated.

The following aspects require consideration:

- **Loss of natural areas:** If current land use patterns are maintained, it is likely that significant tracts of natural areas will be lost as urban sprawl occurs in a westerly direction. As this occurs, large areas of communal and formal grazing area will become overgrazed and over-utilized, resulting in loss of grazing capacity and the associated economic and cultural value of the cattle herds.
- **Deforestation:** Deforestation is intimately linked to changes in land use, with clearing of vegetation associated with opening of areas for settling, livestock grazing, and harvesting of wood for fuel (cooking). At present, the extent of deforestation has not been mapped although it can be expected that coverage will reduce exponentially as the population grows and expands.
- **Alien eradication:** The impact of alien infestation in the Municipal area is relatively low in comparison with South African trends in general. The biggest impact is, however, associated with infestation along watercourses in the municipal area. Alien infestation generally occurs at a very rapid rate if no controls are

instituted, especially with land use approvals and the resultant infestation along rivers ultimately has a significant impact on water quality and quantity.

- **Water quality and quantity:** The main pressures on water resources within Ba-Phalaborwa are linked to siltation in rivers occurring because of erosion, mining activities, and encroachment of alien vegetation, poor management of sanitation facilities, construction of infrastructure or facilities within watercourses and uncontrolled abstraction for agricultural activities within the municipal area. Since all major urban centres occur within the Ga-Selati Tertiary catchment, development of any form in and around these settlements ultimately affects the potable water supply to the Municipality.
- **Ground Water:** Deterioration in groundwater quality is attributed to contamination by pit toilets, industrial and domestic waste, establishment of cemeteries in unsuitable locations, solid waste dumping (both legal and illegal) and developments with inadequate septic tanks or other systems.
- **Heritage Sites and Places of Interest**
 - Masorini Archeological Site – ancient copper smelting work (situated in the KNP). When it was decided to **restore the village of Masorini** in 1973, there was nothing except some stone walls, grinding stones, potsherds, the remains of foundries dating back to the 19th century, and some implements dating back to the Stone Age.
 - African Elephant Meseum – at Letaba Rest Cam (± 50 km from Phalaborwa gate)
 - Boabab Tree – Largest Baobab tree in the wold (Ledsdorp)
 - The Big hole – (Phalaborwa mining area)

3.2.1.9 Faunal Biodiversity

Endangered, vulnerable and protected species per taxon occurring within Ba-Phalaborwa

Table 8: Floral biodiversity

National Status	Invert	Reptilla	Pisces	Aves	Mammalia	Total
Critically endangered	0	0	0	2	0	2
Endangered	1	0	0	7	3	11
Vulnerable	0	0	0	13	7	20
Protected	9	3	0	3	8	23

Fourteen known species of critically endangered, endangered, near threatened, vulnerable or data-deficient plant species have been recorded within the Ba-Phalaborwa region. These include three species of cycad (encephalartos dolomiticus, E dyerianus and E. Lebomboensis) which are listed as critically endangered.

Table 9: Alien vegetation

The following weed or invader species have been recorded in the municipal area

Taxon Name	Common Name	Category	Abun
Agave sisalana Perrine	Sisal	2	Present
Argemone Mexicana L	Yellow flowered Mexican poppy	1	Present

Taxon Name	Common Name	Category	Abun
Argemone ochroleuca sweet subsp. Ochroleuca	White flowered Mexican poppy	1	Present
Atriplex nummularia lindley ssp. Nummularia	Old man satl bush	2	Present
Bauhinia variegata L	Orchid tree	3	Rare
Cardiospermum grandiflorum swartz	Ballon vine	1	Freq
Chromolaena odorata (L.) R.M. King & H Robinson	Paraffienbos	1	Abun
Cryptostegia grandiflora R. Br		3	Occas
Delonix regia (Bojer) Raf		3	Occas
Ipomoea sp.	Morning Glory	1	Freq
Lantana camara L.	Lantana	1	Present
Melia azedarach	Syringe	3	Occas
Momordica charantia L.		3	Present
Morus alba L	Mulberry	3	Occas
Opuntia strica (Haw.) Haw.	Pest pear	1	Freq
Pennisetum setaceum (Forssk.) Chiov	Fountain grass	1	Present
Ricinus communis L.	Casto oil plant	2	Present
Schinus molle L.	Pepper tree	3	Present
Schinus terebinthifolius Raddi	Brazilian pepper tree	3	Rare
Senna bicapsularis (L.) Roxb.	Rambling Cassia	3	Occas
Senna didymobotrya (Fresen.) Irwin & Barney	Peanur butter cassia	3	Occas
Senna occidentalis (L.) Link	Cassia	3	Freq
Senna pendula (Wild.) Irwin & Barn		3	Abun
Sesbania punicea (Cav.) Benth.	Red Sesbania	1	Occas
Syzygium cumini (L.) Skeels	Jambolan	3	Present
Tecoma stans (L.) H.B.K	Yellow bells	1	Freq
Thevetia peruviana (Pers.) K. Schum	Yellow oleander	1	Rare
Tithonia diversifolia (Hemsl.) A. Gray	Mexican sunflower	1	Present
Tropaeolum majus L.		3	Present
Washingtonia sp		3	rare
Xanthium strumarium L.	Large cocklebur	1	Present

Approximately 31 declared weed or invader species have been recorded in the municipal area, the majority are either category 1 or category 3 species. These species are predominantly associated with gardens and/or sites which have undergone transformation in land use. No municipal policy on alien eradication is in place. Alien eradication is conducted by the mines, private game reserves and SANParks. No alien eradication awareness programmes have been instituted by the municipality.

3.2.1.10 Water resources

Water resources refer primarily to surface and groundwater quantity and quality but include floral and faunal communities which are associated and which contribute to the overall functionality of watercourses and water bodies.

Ba-Phalaborwa Municipality is situated within the Olifants River Primary Catchment, with the tertiary catchment water shed between the Selati River and the Letaba River taken along the topographical ridge line. These river systems also function as greenbelt, biodiversity corridors along which many larger species migrate.

Pressures

The main pressures on water resources within Ba-Phalaborwa are linked to siltation in rivers occurring as a result of erosion, mining activities, and encroachment of alien vegetation, poor management of sanitation facilities, construction of infrastructure or facilities within watercourses and uncontrolled abstraction for agricultural activities within the municipal area.

Deterioration in groundwater quality is attributed to contamination by pit toilets, industrial and domestic waste, establishment of cemeteries in unsuitable locations, solid waste dumping (both legal and illegal) and developments with inadequate septic tanks.

3.2.1.11 Air Quality

Air pollution is caused by the emissions of gas, liquid vapour, or solid particulate matter into the atmosphere as a result of human activity, which apart from the impact on the natural environment, can significantly affect human health and well-being.

The municipality does not have Air Quality Plan, Air quality plan is the powers and function of the District municipality. The Air Quality Management Plan (AQMP) for the Mopani District Municipality (MDM) has been developed to comply with the National Environmental Management: Air Quality Act, 39 of 2004 (AQA). The National Environment Management: Air Quality Act (NEMAQA), 2004 (Act No. 39 of 2004), also referred to as “Air Quality Act” was promulgated in 2005 and came into full effect in April 2010. It is in terms of this Act that District Municipalities are assigned a number of exclusive air quality management functions. Therefore, Mopani District like other districts in the country has to implement the atmospheric emission licence system. However due to lack of capacity Mopani District has delegated the licencing authority to Provincial Environmental Department (LEDET). Again, the Air Quality Act requires municipalities to prepare reports with regard to progress on implementation of the Air Quality Management Plan. Although Mopani District Municipality has designated a Municipal Air Quality Officer to perform the duties or exercise the powers assigned or delegated to that officer in terms of the Air Quality Act, much is still needed in terms of staffing, capacity building and resource inputs.

The principle pressures on local and regional air quality are dust generated off mine tailing and mining activities and emissions from industries and smelting operations within the heavy industrial. Controlled and uncontrolled burning of vegetation also contributes significantly to suspended particles (PM10, PM2.5) as well as greenhouse gas emissions. Burning of fossil fuels for cooking or heating purposes may also contribute to regional air pollution.

The major emission sources in Ba-Phalaborwa Local Municipality include mining activities, fertilizer plants, a smelter and WWTPs. As illustrated in Figure 6 above, most major sources are located in close proximity to human settlements. The mining and processing industries around Phalaborwa generate vast amounts of dust, SO₂, particulate matter (PM10 and PM2.5), NO_x, CO, O₃ and C₆H₆. These atmospheric pollutants are known to cause adverse effects on human health and the environment, resulting in Ba-Phalaborwa being declared a Provincial hotspot.

The Provincial Air Quality Management Programme identified Ba-Phalaborwa as one of the four pollution hotspot areas. Ba-Phalaborwa also falls within the “Potentially Poor” air quality category according to the air quality rating of Metro and District municipalities due to the high level of SO₂ emissions. LEDET has installed an

ambient air quality monitoring station in Ba-Phalaborwa which monitors the following pollutants; SO₂, NO₂, O₃, PM_{2.5} and PM₁₀. The monitoring results for the months from July 2013 to June 2014 were provided. According to the results, the area around Ba-Phalaborwa is of concern due to the PM₁₀, O₃ and SO₂ exceedances

Indicators

The core indicators for the air quality reporting theme are:

- Exceeding World Health Organisation (WHO) guidelines for SO₂, NO₂, PM_{TSP}, PM₁₀ and PM_{2.5}.
Several ambient air quality monitoring stations are located in and around the mining areas to the south of Phalaborwa. No data is available in the municipality for NO₂, PM_{2.5} or PM_{TSP}.
- Number of air quality complaints registered at Ba-Phalaborwa will show a trend in air quality variations.

Air quality monitoring and reporting is conducted on a monthly basis by the mining and industrial sector, although no municipal section exists which deals with these complaints or enforces air quality permits issues in terms of the National Environmental Management: Air Quality Act.

- Number of hospital admissions for respiratory diseases by type such as asthma and hay fever to indicate associated human well-being.

The municipality was unable to get the hospital admissions in all the hospitals and clinics which will inform the number of patients that are admitted with respiratory or tuberculosis.

3.2.1.12 Environmental Governance

Ba-Phalaborwa Municipality does not have an environmental section which deals with environmental issues, although other sections within the municipality, such as Parks and Recreation, Town Planning and Health and Safety section fulfil this role as needed.

Ba-Phalaborwa Municipality budget allocation to environmental management, education and awareness
Environmental management and education is not addressed directly within the municipal budget allocations. Some allocation in terms of the Parks and Recreation and Health and Safety deal with some environmental issues where possible.

The National Department of Environmental affairs has deployed officials to provide technical advice on environmental management issues, ensure proper planning and implementation of its EPWP projects funded under its Social Responsibility Programme (SRP) and provides inputs on Municipal planning structures such as IDP representative forums.

3.2.1.13 Environmental education

Environmental education and awareness within the municipality is very low. The municipality relies on outside stakeholders to do this function that is:

- The mines
- The National Department of Environmental affairs
- LEDET
- **IDP Commitment to environment and environmental policies**

The municipal IDP recognises the responsibility of the municipality in managing the environment in terms of applicable legislation and its responsibility to promote sustainable development within the municipality. One of the key IDP Objectives is environmental sustainability which ensures that municipal planning and development should ensure the sustainability of the municipal environment.

3.2.2 Social Analysis

3.2.2.1 Integrated and Sustainable Human Settlement

Ba-Phalaborwa Municipality is not a housing authority. Housing function in the municipality is the competency of the Provincial Department of Cooperative Governance, Human Settlements and Traditional Affairs. The municipality is responsible for ensuring that there is a Housing Chapter that guides issues of human settlements and the identification of housing beneficiaries and the provision of basic services.

The table below presents an overview of the housing situation in the municipal area over the years.

Table: 10

Dwelling type	Number of households
House or brick/concrete block structure on a separate stand or yard or on a farm	37 690
Traditional dwelling hut/structure	1 149
Flat or apartment in a block of flats	457
Cluster house in complex	35
Townhouses	60
Semi-detached house	20
House/flat/room in backyard	449
Informal dwelling (shack, in backyard)	148
Room/flat let on a property or larger dwelling/servants quarters/granny flat	924
Caravan/tent	34
Other	84

Community Survey 2016

3.2.2.1.1 Housing Backlogs

The housing backlog in the municipal area is estimated at 2924. 36 units has been allocated for 2021/22 financial year.

3.2.2.1.2 Key Challenges with regard to RDP houses:

- All 19 wards complain about poor quality houses (problem areas include cracking walls, leaking roofs, peeling plastering, and poor foundations).

3.2.2.2 Health and Social Development

3.2.2.2.1 District Hospital

Maphutha L Malatji Hospital is the only District Hospital in the municipal area which services the population of Ba-Phalaborwa. The hospital has an administrative block, maternity wards, female/male wards, children's ward, OPD and theatre. The Municipal status quo is that the Hospital has 9 Professional Doctors with a backlog of 24 and 125 Professional Nurses with a backlog of 137.

The former Phalaborwa Hospital which was turned into a private clinic, has been closed due to financial challenges. The private clinic started operating in 2012 and closed in 2017. The other nearest District hospital and private clinic is in Tzaneen, which falls under the Greater Tzaneen Municipality with in a driving distance of 120 km. There is a 24-hour medical practice that focuses on acute and urgent ailments. (MarulaMed)

Key Challenges with regard to the District Hospital

- Maphutha Malatji hospital has electricity, water and sanitation facilities in good working order and however there are challenges with regard to water pressure, due to design of the water reservoir in the hospital.

3.2.2.2.2 Primary Health Care

There are 10 Primary Health Care facilities in Ba-Phalaborwa municipality. The Primary Health Care facilities are located in the following areas:

- Makhushane - Makhushane
- Lulekani Health Care - Lulekani
- Benfarm - Majeje
- Bus stop Clinic - Phalaborwa
- Namakgale A & B – Namakgale
- Selwane Clinic- Selwane
- Mahale – Mahale (Selwane area)
- Mashishimale Clinic - Mashishimale
- Humulani - Humulani

3.2.2.2.3 Malaria

Ba-Phalaborwa Municipality is area prevalence with the malaria. The prevalence of malaria in the area is a threat to tourism. The Limpopo Department of Health and Social Development has a malaria control centres in the municipal area, which is located in Lulekani. The District Malaria Control Centre is located in Tzaneen. The centres are responsible for malaria control in the municipal area.

3.2.2.2.4 Social Grants

Social grants are paid by SASSA in the municipal area. Their offices are located in both Namakgale and Lulekani. Community Development Section of the Department of Health and Social Development is responsible for the provision of food parcels.

Social Grants Information

Table 11: Ba-Phalaborwa grants statistics

The total number of people who depends on grants in the municipal area is 60 969. The number was 28958 in 2004, which represented 22% of the population then. According to Stats SA 2011 Census, there are 33 959 employed people at the municipal are, which is 23%.

Number of social relieve of distress special covid 19 grant	2491
Number of social applications approved	1905
Number of grants in payment including grant-in-paid	58971

Food parcels distribution	
Institution / organisation	Number
Municipality	516
SASSA	1330
DSD	961
Donors	730

Key Challenges with regard to health and welfare:

- Increasing number of people dependent on social grants, in particular the child support grant;
- Need for reducing incidences of malaria, diarrhea and other diseases;
- Shortage of health facilities, coupled with low staff retention and high staff overload.

3.2.2.2.5 HIV, STIs & TB

It is recorded that serious illnesses that are prevalent in the Ba-Phalaborwa Municipality are HIV & AIDS, TB and Malaria. The connection between TB and HIV cannot be overemphasized.

In responding to the effect of HIV, STIs & TB, the Municipality has a dedicated Desk and appointed an official who coordinates the HIV & AIDS programme in the municipal area. The municipal has elected the Local AIDS Council, which coordinates all the activities dealing with HIV, STIs & TB other communicable conditions in the municipal area. The municipality together with the stakeholders have developed HIV, STIs and TB prevention programmes which are run by different stakeholders providing related services. The Ba-Phalaborwa Comprehensive Care, Management, Treatment and Support Programme, managed by Phelang Community Centre – Palabora Foundation, covers areas which include Mashishimale, Makhushane, Maseke, Majeje, Namakgale, Humulani, Matikoxikaya, Lulekani, Gravelotte, Selwane, Mahale, Prieska, Buyelani, Nondweni, and Phalaborwa workplaces.

Community Radio Station Educational discussions are also conducted, which include topics like positive use of male condoms and femidoms (female condoms), importance of HCT, abstinence, etc. Other stakeholders in the Local AIDS Council, which include sector departments, are doing more in their respective fields to respond to the pandemic. Programmes include:

- Awareness Campaigns like World AIDS Day,
- Candlelight Memorial,
- TB Awareness,
- Awareness in High Transmission Areas (HTA's),

- Education, Information and Communication,
- Capacity building
- School visits.

3.2.2.2.5.1 HIV& AIDS, Sexually Transmitted Infections & Tuberculosis Mainstreaming

Ba-Phalaborwa Municipality has developed the HIV & AIDS Policy which makes provision for the mainstreaming of HIV & AIDS in the municipal operations. The municipality has developed HIV& TB messages that are part of all the official communication for both internal and external stakeholders. The messages are intended to enhance the campaign on HIV & TB awareness amongst all the municipal stakeholders. There are also HIV & AIDS training for EPWP employees and lower levels employees. The HIV & AIDS Coordinator assist on issues of education, information & communication, condom distribution, counselling and referral to relevant stakeholders in the municipality.

3.2.2.2.5.2 Health facilities that are accredited to provide ARV drugs in Ba-Phalaborwa Municipality

- Maphutha-Malatji Hospital
- Lulekani Health centre
- Selwane Clinic
- Ben-Farm clinic
- Humulani clinic
- Mahale clinic
- Namakgale A clinic
- Namakgale B clinic
- Busstop clinic
- Makhushane clinic
- Mashishimale clinic
- Phelang Community Center

3.2.2.2.5.3 Challenges on ARVs

- Accessing the services very late,
- Self-de-registration after commencement of the treatment,
- Individual ill-discipline,
- Substance abuse by clients on ARV's.
- Individual disclosure

3.2.2.2.6 Community Drop-In Centres

Drop in centres have been established in communities with the aim of caring for orphans and vulnerable children, particularly as a result of HIV&AIDS. The orphans in the centres are between 0 and 24 years of age.

The Drop-In Centres are funded by the Department of Social Development (Isibindi Programme) as well as Sponsors. Some of the centres do not have funding and proper buildings from which to practice their care-giving chores. The established centres are not sustainable given that the care-givers work on voluntary basis.

The centres perform at least the following services:

- Provide daily nutritious meals;
- Teach life skills to children;
- Monitor school attendance;
- Assist with household chores;
- Refer to access services from different stakeholder;
- Home visits to orphans and vulnerable children;
- Assist with children's school and cultural activities.

3.2.2.2.6 Community Drop-In Centres

Drop in centres have been established in communities with the aim of caring for orphans and vulnerable children, particularly as a result of HIV&AIDS. The orphans in the centres are between 3 and 18 years of age. The table below shows the caregivers

Table: 12 Caregiver

Name Of Centre
Tswelopele (Makhushane - Maune)
Mashishimale (Tshubje)
Makhushane (Changaan)
Maseke (Tribal)
Tshwaranang (Mashishimale - Mosemaneng)
Philadelphia (Matikoxikaya)
Tumelong (Mashishimale - Tlapeng)
Vurhonga (Lulekani)
Dinoko (Makhushane - Nyakelang)
Tshuxekani (Namakgale - Foskor)
Mashishimale (Tlapeng)

The Drop-In Centres are funded by the Department of Health and Social Development as well as Sponsors. Some of the centres do not have proper buildings from which to practice their care-giving chores. The established centres are not sustainable given that the care-givers work on voluntary basis.

The centres perform at least the following services:

- Provide daily nutritious meals;
- Teach life skills to children;
- Monitor school attendance;
- Assist with household chores;
- Assist with children's school and cultural activities.

3.2.2.2.6.1 The following general challenges are experienced in the different centres:

- The challenge faced is lack of funding to sustain the centre;
- Lack of proper accommodation;
- Lack of storage facilities;
- Lack of capacity building.

3.2.2.2.6.2 Other strategies employed to fight HIV, STIs & TB

A team of Community Peer Educators conduct home visits on a regular basis to educate families and the youth on:

- Sexually Transmitted Infections (STIs);
- HIV Counselling & Testing (HCT)
- Substance abuse visited on weekly basis for education, information and communication purpose in all municipal wards.
- The importance of knowing one's health status; and
- Positive use of male condoms & femidoms (female condoms)
- High Transmission Areas (HTAs) – taverns are

3.2.2.2.6. 3 Ba-Phalaborwa Municipality Drop-In-Centres

The following table presents the Drop-In-Centres in the municipal area according to their numbers of orphans-and-vulnerable children and caregivers.

Table: 13 Drop in centres in the municipal area

Drop-In-Centre	No. of Orphans
Mashishimale (Tshube)	216
Makhushane (Tshangana)	253
Majeje (Ben-Farm)	97
Maseke	144
Tswelopele (Makhushane-Maune)	278

The centres perform at least the following services:

- Provide daily nutritious meals;
- Teach life skills to children;
- Assist with children's school and cultural activities.

3.2.2.2.6.4 The following general challenges are experienced in the different centres:

- The challenge faced is lack of funding to sustain the centre;
- Lack of proper accommodation;
- Lack of storage facilities;

3.2.2.2.7 Safety and Security

Greater Phalaborwa Cluster consists of 5 police stations, namely Phalaborwa Police Station, Namakgale Police Station, Lulekani Police Stations, Hoedspruit Police Station and Gravelotte Police Station. The Cluster is serving two municipalities, Ba-Phalaborwa Municipality and Maruleng Local Municipality. There are four police stations under Ba-Phalaborwa Municipality, namely, Phalaborwa Police Station, Namakgale Police Station, Lulekani Police Station and Gravelotte Police Station. Hoedspruit Police falls under Maruleng Local Municipality.

Distribution of households by crime experienced in the last 12 months my municipality

LIM334: Ba-Phalaborwa	Experienced crime	Did not experience crime	Total
	3 055	45 908	48 963

Community Survey 2016

Distribution of households' perception of safety when walking alone during the day

LIM334: Ba-Phalaborwa	Very safe	Fairly safe	A bit unsafe	Very unsafe	Total
	37 697	9 699	1 219	434	49 050

Community Survey 2016

Table: 14 Crime frequencies

Crime category	Frequency
All theft not mentioned elsewhere	597
Burglary at residential premises	445
Assaults with the intent to conflict grievous bodily harm	331
Common assault	191
Malicious damage to property	205
Burglary at non-residential premises	120
Total sexual crimes	148
Shoplifting	151
Commercial crime	93
Theft out or from motor vehicle	190

Challenges

- Shortage of police personnel and in effective community policing are critical challenges
- The most common crimes in the area are assault and theft
- Lack of Policing Forums in some of the areas, Matiko-xikaya, some part of Namakgale

3.2.2.2.7 Fire and Rescue Services, Disaster and Risk management

Fire and Rescue is the competency of the Mopani District Municipality. Mopani District Municipality assist the municipality in case of any incident relating to fires both veld and structural fires, assist our municipality in case of any incident relating to rescue e.g. drowning, spillage and rescuing, alerting the municipality in case of veld and forest fires, extinguishing unwanted fires in the municipal area of jurisdiction.

Ba-Phalaborwa has managed to provide shelter, tents, mattresses and blankets to the public affected disaster as and when it happens.

The Municipal Disaster Management Unit was involved in the following potential disaster prone activities in conjunction with the South African Police:

- ✓ Training of ward councilors and ward committees
- ✓ Cholera awareness campaigns; Several disaster management meetings i.e., Kruger National Park Disaster Management Forum, Fire Protection Association, South African Police Cluster meetings and others;

Challenges

- Fire and Rescue is stationed in (Phalaborwa) town of which it is impossible to reach in communities in time when there are fires.

3.2.2.2.8 Education

Ba-Phalaborwa municipality has been divided into two (2) educational circuits, namely: Lulekani and Namakgale circuit. The two circuits are managed by Circuit Managers, with full staff support component. Namakgale circuit offices are located in Namakgale next to Namakgale Police Station and Lulekani circuit offices are located in Phalaborwa town at the Old Mutual Building.

Number of schools:

Districts	Secondary schools	Primary schools	Combined schools	Special Schools

Challenges

1. Schools with sanitation challenges

- Lulekani – Chuchekani, Makikele, Selwane and Shiphamele
- Namakgale – Lebeko, Maphokwane and Rethushitswe

2. Critical need for infrastructure

- Lulekani – Baranuka, Kurhula, Lulekani, Nkateko, Ntshuxeko and Shiphamele
- Namakgale - Nthabiseng

3.2.2.2.1 Higher Education Services

Ba-Phalaborwa Municipality has one institution for further education, that is, Mopani South East TVET College. The college comprises of two campuses and a hotel school. The Sir Val Duncan campus is in Namakgale and the Phalaborwa campus in Phalaborwa and the Mosate Hotel School are in Phalaborwa. The college offers a variety of skills and learnership programmes in partnership with the government Setas. In this way, the college aims to fill economic demands of the community of Ba-Phalaborwa. Mopani South East offers critical skills in engineering programmes that supply the mining and construction sectors, tourism – which include cookery and hospitality sectors – financial training that supplies banks, and business studies.

Students graduating from Mopani East College often secure employment with lodges, hotels and game farms in the area before completing their studies; and these places of employment also provide crucial workplace exposure and internships for students.

Needs for Schools

WARD NO	AREA	NEED
02	Makhushane	Additional Classrooms at Lepato Secondary School
04	Namakgale	Renovation of Zamani Primary School and Vuxeni High School
06	Namakgale	New Primary School at Nyakelang 4
		New High School at Namakgale next to Ferentse School
08	Mashishimale	New Primary School at Ntshabelematswale
		Science Laboratory and Computer Lab at Lebeko High School and Mabine Primary School
09	Mashishimale	New Primary School at Mapikiri
10	Maseke	New Primary School at Mapikiri
13	Lulekani	New High School at Kurhula
15	Matiko-xikaya	Science Laboratory at Baranuka School
18	Selwane (Nondweni)	New Secondary School at Nondweni

Community needs and priorities conducted 2022

3.2.2.9 Sports, Arts and Culture

3.2.2.9.1 Libraries

The Municipality manages five fully established community libraries based in Phalaborwa, Gravelotte, Namakgale, Selwane and Lulekani. The Municipality provides mobile library service (school/community library)

to Mashishimale. The services are rendered at Lebeko and Makikele High Schools, respectively. The services rendered include: free membership, print and electronic information resources, audio-visuais, free public internet services, inter-library loans, and free access to computers and tablets for personal use, printing and photocopying services, scanning of documents, user education on library services and library outreach programmes. Key library services priorities include improving access to library services, bridging the digital divide, enhancing collection development and management strategies, improving training and development of library staff, as well as improving and sustaining stakeholder relations. Provision of computers and user education in all the five fully established libraries; enhance stakeholder participation to increase funding, as well as improving the municipal library outreach services will help achieve these goals. The municipality has to find alternative funding mechanism for new libraries needed by the various communities.

There are employees who have been seconded to the Municipality by the Provincial Department of Arts and Culture. The Ba-Phalaborwa Municipality has a relationship with the Palabora Foundation with regard to strategic support to our Library Services. The Library Services Development Plan has been development, submitted to management and also approved by Council. A Library Committee has been established to enhance public participation

Table: Library Services

NAME OF LIBRARY	NUMBER OF USERS PER MONTHS
TOTAL =7	
Rixile	3200
Gravellot	600
Phalaborwa	5500
Selwane	670
Mashishimane	330
Prisca	140
Leboneng	4000

Department of Sports, Arts and Culture Situational Analysis

3.2.2.9.2 Libraries Backlogs

The following areas need library infrastructure in order for the Municipality to achieve the objective of increased access to library services:

- Mashishimale,
- Majeje,
- Makhushane,
- Maseke and
- Humulani/Matiko-Xikaya.

Phalaborwa Library needs to be extended to include children's section, a study hall, three offices, storeroom, and activity room. The extension will help the main library to support branch libraries.

There is a need to enhance current municipal IT infrastructure to ensure that library services are able to achieve the objective of bridging the digital divide through library IT services. Gravelotte library and Mashishimale mobile library need IT network infrastructure to facilitate access to planned electronic information resources and for general library services administration. The five seconded library officials from the Limpopo Department of Sport, Arts and Culture have enhanced library service delivery.

3.2.2.9.3 Key Challenges with regard to libraries:

- Libraries need to be within walking distance to ensure that increased access to library services;
- Lack of IT infrastructure to enhance the objective of bridging the digital divide;
- Lack of resources to maintain and upgrade current service levels and infrastructure;
- Lack of libraries and/or information centres makes it difficult for people to access government services and information that they are entitled to;
- Relations with the Provincial Library Services and Palabora Foundation as key stakeholders in the development of library services.

3.2.2.10 Recreational Facilities

The following sporting codes facilities are available in Ba-Phalaborwa golf tennis, long distance running, squash, netball, soccer, long distance swimming, basketball, shooting, snooker, darts and rugby. The table below presents formalised sports infrastructure in the Municipal area in the municipal growth points.

Table: 15 Formalised Sports infrastructure per municipal growth point

Town	Tennis court	Soccer/Rugby field	Swimming pool	Athletics track
Gravelotte	-	-	-	-
Selwane	-	-	-	-
Lulekani	2	1	-	1
Namakgale	-	-	-	-
Phalaborwa	-	3	-	-
Total	2	4	0	1

Source: Municipality, 2020

Sports infrastructure is concentrated within the Phalaborwa Urban Complex, namely, Phalaborwa, Namakgale and Lulekani. There are no recreational facilities in outlying areas, such as Gravelotte.

The condition of existing sports facilities is not satisfactory and therefore there is no value addition to tourism in the area. The Municipality has to increase both the quantity and quality of sports infrastructure in order to attract national and international events to the area and benefit local tourism.

Phalaborwa

The Impala Park, along with privately owned initiatives such as Hans Merensky club, provides sufficient sporting facilities to cater for the current population of the town and the various activities currently prevalent. The park is well maintained.

Lulekani

Lulekani stadium provides a well-developed infrastructure relatively suitable for large sports events, social gatherings and meetings. The soccer field and the athletics track are well maintained, although not up to international standards (in terms of size and pitch layout). The tennis and netball courts were upgraded by Foskor. The stadium needs a new fence; the current fence is old and has collapsed. As soccer is the prevalent sport of choice, a number of areas have been graded to serve as practice areas. These areas, however, need to be formalised.

Namakgale

The Namakgale stadium is no longer in use to the reason that the stadium need serious renovations. The municipality has applied for MIG Fund in order to renovate the stadium and the application for fund has been approved the municipality has started with renovations.

Gravelotte and Selwane

There are no formalised sporting facilities in the Selwane and Gravelotte areas except for poorly maintained and under-utilised soccer pitches. The municipality has received a MIG fund to construct Sports Complex at Seloane and construction of the sport complex is completed.

Rural Areas:

The construction of Mashishimale Sports Complex has been completed and hand over was done. Basic soccer fields provided by the communities are insufficient in both quantity and quality, and do not meet the needs of the communities.

3.2.2.10.1 Key Challenges with regard to sports infrastructure and activities:

- Sports is not properly marketed due to poor conditions of sports facilities;
- Obtaining land and developing facilities across the area on an equitable basis, and prioritized according to needs;
- Sports council is not fully representative of all the sporting codes;
- There are no long term plans for sports development;
- Limited budget set aside for sports activities.

3.2.2.11 Parks and Cemeteries

The open spaces are generally becoming overgrown with invader species. Clearing and de-bushing efforts are frustrated by lack of equipment. Working for Water has provided assistance with the removal of scheduled alien and invader plants on public property. The provision of parks in the areas of Namakgale and Lulekani is negatively affected by lack of funds and poor maintenance and usage of the facilities by the community. Greening projects implemented with the assistance of stakeholders, like the mines, are unfolding well. Public facilities such as stadia are duly maintained although there is a noted shortage of equipment and staff.

The Municipality is responsible for the provision, administration and maintenance of four cemeteries which are located in Phalaborwa, Namakgale, Lulekani and Gravelotte.

The Municipality should consider computerizing the administration of cemeteries to improve the efficiency of the service and to ensure a more user friendly register and records system. Access to the cemeteries and provision of adequate facilities (such as toilets) are some of the challenges that need attention. There is a need to enforce cemeteries by-laws so that available burial space is used economically.

3.2.2.12 Telecommunications

Access to telecommunications is very high in the municipality; this is evidence by the percentage of households that have access to a cell phone. The number of households that have access to a landline telephone has dropped due to the easy access to mobile phone

Access to landline telephone	Number of Households with access
Yes	2 849 (7%)
No	38 266 (93%)

Source: Stats SA Census 2011

Distribution of households by access to internet services and sex of household head

LIM334: Ba-Phalaborwa	Male	Female		Total		
	Access to internet	No access to internet	Access to internet	No Access to internet	Access to internet	No access to internet
	2 376	27 175	876	17 814	3 251	44 988

Community Survey 2016

The following areas have access to post office:

- Phalaborwa Town
- Lulekani
- Namakgale
- Seloane Thusong Center

There are areas whereby members of the community has to travel a distance in order to access post office. Some have to travel ±13km to access post office. There following are areas without post offices which is a backlog:

- Mashishimale
- Maseke
- Makhushane

3.3 Economic Development Analysis

3.3.1 Local Economic Development

Local economic development in Ba-Phalaborwa Municipality has been founded on and guided by the principles and objectives of the National Spatial Development Perspective (NSDP), The National Development Plan (Vision 2030), Limpopo Development Plan and the District Local Economic Development (LED) Strategy, recommendations of the District Growth and Development Summit.

In order for economic development to be coordinated, it is suggested that development be primarily focused on areas of high population concentration. The table below indicates population concentration points or growth points as identified in the Limpopo Province Spatial Rationale (2002):

Table: 16 Growth points identified in the Limpopo Province Spatial Rationale

Location	Classification of Growth Point
Phalaborwa	Provincial growth point
Namakgale	District growth point
Gravelotte	District growth point
Lulekani Selwane	Municipal growth point

A growth point is a high population concentration point and an economic hub in the area. The implication to the Municipality is that infrastructure in the growth points be strengthened in order to support economic development.

3.3.2 Economic Sectors in Ba-Phalaborwa

The Ba-Phalaborwa Municipality LED identifies the following key economic Sectors for Ba-Phalaborwa:

- Agriculture;
- Mining;
- Manufacturing;
- Tourism and

- Property development.

a. Mining Sector

Ba-Phalaborwa has the highest concentration of minerals in the Mopani District hence mining is the largest economic sector in the Municipality and is also the largest employer.

The most mined resources in the Municipal area are copper and phosphate in the Phalaborwa area. The table below presents the range of minerals available in the municipal area:

Table: 18 Minerals available in the Phalaborwa Area and the Murchison Range

Phalaborwa Area	Murchison Range
Magnetite	Mineral sand
Copper	Antimony
Vermiculite	Gold
Nickel	Zinc
Apatite	Mercury
Zirconium	Paving and clad stones
Titanium	Emeralds
Uranium	Ilmenite
Mica	
Clay	

Key Mining operations in Ba-Phalaborwa

- **Palabora Mining company:** Palabora Mining Company, situated in the Ba-Phalaborwa area of Mopani, operates South Africa's largest copper mine. The company owes its origin to the unique formation known as the Palabora Igneous Complex. Nowhere else is copper known to occur in carbonitites as is the case at Palabora, and a host of other minerals such as phosphates, vermiculite, phlogopite, magnetite, nickel, gold, silver, platinum and palladium also occur. Palabora operates a large block cave copper mine and smelter complex employing approximately 2722 people. The refinery produces continuous cast rod for the domestic market and cathodes for export. Useful by-product metals and minerals include zirconium chemicals, magnetite and nickel sulphate as well as small quantities of gold, silver and platinum.

Copper is mined and processed by Palabora Copper into copper rods. The by-products of the mining of copper are phosphate and sulphate, which are further processed by Foskor. There are opportunities for small scale mining in the municipal area. Possible mining projects in the Ba-Phalaborwa area include:

- Expansion of rock phosphate by Foskor;
- Phlogopite processing facility
- Koalin clay project

- Surface strip mining of mineral sand in Gravelotte
 - Steel production plant (Magnetite processing)
 - Red River Mining (Mining of Ilmenite)
 - Iscor/Kumba (Mining of Ilmenite)
- **Foskor:** Foskor is the world's largest producer of phosphate and phosphoric acid. The opencast mine in Phalaborwa, in South Africa's Limpopo Province, has the capacity to yield 2.6 million tons per annum of phosphate rock concentrate from processing 35 million tons of ore per annum. Once crushed, milled, concentrated and dried, most of the phosphate rock concentrate is railed to Foskor's processing plant in Richards Bay, 800 km away on the country's east coast. Commissioned in 1953, Foskor has traditionally mined foskorite and pyroxenite in a 60:40 ratio. With the body of foskorite ore nearing depletion, Foskor appointed Bateman Africa to undertake a feasibility study for the construction of a new mine to increase its pyroxenite processing, as well as remedial measures to enhance throughput on its Extension 8 processing plant.
- **Stibium Mopani Mine:** Situated at Gravelotte close to Phalaborwa in the Limpopo province, Stibium Mopani Mine is the single largest antimony ore body known in the world, having produced in excess of nine million tons of high-grade stibnite ore. Gold is produced at Stibium Mopani mine as a co-product of antimony.

The following table portrays the development potential as identified within the mining sector of Ba-Phalaborwa.

Table 19: Development potential within the mining sector in Ba-Phalaborwa

Development Potential	Potential Projects
Large variety of mineral deposits	<ul style="list-style-type: none"> ● Local mineral processing and beneficiation activities ● Small scale mining operations
Production of copper	<ul style="list-style-type: none"> ● Increase in SMME development projects relating to the metal
Magnetite processing	<ul style="list-style-type: none"> ● Steel production plant
Paving and cladding stones	<ul style="list-style-type: none"> ● Processing of stones ● Increase in SMME development projects relating to paving and cladding stones

b. Agricultural Sector

A broad scoping exercise was undertaken by the CSIR Food and Technology Division during 1999 to establish the current agricultural production and processing operations within the Phalaborwa Spatial Development Initiative

(SDI). The aim of the scope was to identify current and possible future production and processing opportunities of agricultural produce in the area.

Fruit and vegetables are mostly destined for fresh consumption by the local and export markets. Farmers and private companies are responsible for some value addition. Value addition includes: manufacture of fruit juices, drying of fruit and vegetables, manufacture of archaar.

The table below presents the percentage contribution of the agricultural sector to the GDP and employment of both the Municipality and the District.

Table 20: Ba-Phalaborwa agricultural sector's contribution to municipal GDP and employment

Description	% Contribution By Agricultural Sector
District GDP	-5.4%
District Employment	15.6%
District Tourism Sector Employment	15.9%

Source: Global Insight

The District LED Strategy identifies the following development opportunities and potential projects that can be undertaken in Ba-Phalaborwa:

Table 21: Development opportunities and potential projects in the agricultural sector

Development Opportunities	Potential Projects
Existing production of citrus and vegetables	<ul style="list-style-type: none"> ● Juice making ● Vegetable processing
Existing livestock farming (Cattle, poultry, pigs, etc.)	<ul style="list-style-type: none"> ● Meat processing plants ● Establishment of abattoirs ● Dairy products (Cheese, yoghurt, mass, etc.) ● Poultry processing and packaging ● Egg production and packaging
Game farming	<ul style="list-style-type: none"> ● Game farming for selling and hunting

c. Manufacturing Sector

Manufacturing focuses on beneficiation of and value addition to products from the primary sector of the economy, namely mining and agriculture. It is, therefore, classified as the secondary sector of the economy. The manufacturing activities in the Municipality are mainly focused on the mining sector. There is, however, a potential for the processing and packaging of agricultural related products such as Cattle, poultry, vegetables, eggs, etc.

The table below presents the percentage contribution of the manufacturing sector to the GDP and employment of both the Municipality and the District.

Table 22: Ba-Phalaborwa manufacturing sector's contribution to municipal GDP and employment

	% Contribution by Manufacturing Sector
District GDP	5.9%
District Employment	1.9%
District Manufacturing Sector Employment	14.4%

Source: Global Insight

The Municipality employs 14.4% of the total district labour force that is in the manufacturing industry and hence contributes only 0.5% to the overall District GDP. Manufacturing does not give the Municipality a competitive advantage over the other sister municipalities in the District. It then implies that the production of mining raw materials is not equally complemented with local beneficiation and value chain addition. In order to grow the manufacturing industry, the Municipality needs to strengthen support services, such as transport network, electricity and technology. It is also important to unblock land claims disputes to free land for development.

Products currently manufactured in Ba-Phalaborwa include:

- Bricks for building and paving;
- Industrial chemical products;
- Pipe and tube manufacturing,
- Extracting oil from marula pips;
- Processing of Marula pulp;
- Food canning; and
- Protective clothing.

The table below presents potential projects in the manufacturing sector:

Table 23: Potential projects in the manufacturing sector

Development Potential	Potential Projects
Available local agricultural produce	<ul style="list-style-type: none"> • Fruit and vegetable processing plant • Meat processing • Packaging of eggs and other products • Dairy products like cheese • Poultry factory processing • Canned fruit and vegetables
Available mining products	<ul style="list-style-type: none"> • Clay processing plant • Brick manufacturing • Roof and floor tile manufacturing • Tile and cement manufacturing • Ceramic and sanitary ware manufacturing • Manufacturing of steel products
Other natural products	<ul style="list-style-type: none"> • Processing of extracted oil from Marula pips • Processing of extracted marula pulp

d. Tourism Sector

The decline of the mining industry has an indirect effect on business tourists into the Municipality to venture into other economic activities. The geographic position of Ba-Phalaborwa and the abundance of wildlife in the Kruger National Park present an opportunity for diversification into tourism. Tourism is the economic sector with the most potential for development in the Municipality as a result of the Municipality's ideal location and climate.

- The Local Economic Development Strategy indicates the following with regard to Tourism in Ba-Phalaborwa:

✓

Tourism operators believe that the opportunity to travel to the Mozambican coast via Ba-Phalaborwa represents a significant tourism advantage. Archaeological sites and the history of the arrival of the Malatji clan are also believed to hold tourism potential. The area has a particularly pleasant winter climate. The concept of converting former mine hostels into educational facilities or youth academies is another possibility. The fact that the local labour force comprises a high proportion of single persons reflects a need for leisure facilities that are not sufficiently available.

Ba-Phalaborwa Local Municipality Council has taken a resolution to explore and coordinate relations with the two Governments (Mozambique and Zimbabwe), taking into consideration the similarities in terms of the socio-economic environments of identified municipalities in the respective countries. The municipality is doing all this through Inter-Governmental Relations; guided by the International Relations Unit in the Office of the Premier, Limpopo Province. In implementing the Council Resolution, the first leg has been initiated through the Trans-Limpopo Corridor Spatial Development Initiative between Limpopo Province in the Republic of South Africa and Matabeleland North in the Republic of Zimbabwe. These has led to the establishment and facilitation of a twinning arrangement between Ba-Phalaborwa Local Municipality, and Hwange Local Board and Hwange Rural District. A memorandum of understanding was signed between Ba-Phalaborwa municipality and Hangwe Rural District Council. The signed MOU is aimed at optimising the economic opportunities that exists between the local authorities in a manner that improves the quality of life of those residing within the jurisdiction, promote the local authorities as tourism destinations, wildlife expos, mining and agricultural hubs with a view to combat unemployment and eradicate poverty, facilitate the development of human resources in the respective Local Authorities through capacity building, exchange Geo spatial and mapping information and to share information on Spatial planning, Road infrastructure, Communicable diseases, Risk, disaster, and fire management.

Ba-Phalaborwa is a popular tourist destination and many opportunities exist to expand the income generated from the tourism economic sector. A scoping report on tourism opportunities in the Phalaborwa Corridor by KPMG concluded that priority should be given to:

- Development of the Hans Merensky Club into an international resort,

- Construction of an international mid-range hotel at the gate to the Kruger Park,
- Promotion of the Marula industry.

The following are existing tourist attraction points in Ba-Phalaborwa:

- Accommodation facilities;
- Water based activities in the lower Olifants River;
- to the 'Big Hole' at the copper mine in Phalaborwa;
- Big baobab tree of Gravelotte;
- Eiland Resort;
- Tsonga Kraal;
- Letaba Game Ranch; and
- Mashishimale Marakapula (Croch Ranch)

The table below portrays the identified development potential and potential projects for stimulating development within the tourism sector of the Municipality.

Table 24: Development potentials and potential projects

Development Potential	Potential Projects
Various local tourist products, services and activities	<ul style="list-style-type: none"> • Tourist services, product and activity packaging and marketing • Development of a tourism development strategy • Linking the existing tourist products and services to surrounding products and services • Development of an anchor tourism site/facility
Existing attractions to be upgraded	<ul style="list-style-type: none"> • The Big Boabab Tree in Gravelotte, interpretation of site and marketing development • Road to Tsonga Kraal upgraded for better access • Development of facilities at the Letaba Ranch
Development of cultural activities	<ul style="list-style-type: none"> • Village tours and cultural activities south of Letaba Ranch • Arts and crafts market

There is a rich potential of historical-cultural tourism with the existing archaeology and culture of ancient mining dating back from 800 AD to about 1350 AD.

Bollanoto

Bollanoto is a municipal property, a few metres from the Kruger National Park (Phalaborwa) Gate. It was established with the view to making tourists destined for KNP to stop, spend and possibly stay in Phalaborwa

town. It was meant to afford the previously disadvantaged (called beneficiaries) an opportunity to participate in the tourism industry. The existing structure is not functioning at its utmost potential as the targeted crafters abandoned it. The facility has been leased to the Trans-frontier Park Destinations, Ivory Route and AVIS. Bollanoto has a potential to host a nature based business concept that can also serve as an attraction to schools, tourists and members of the community.

Assessment revealed that Bollanoto did not achieve its optimum objectives, and as a result has the potential to amongst other factors, provide for the following:

- Serve as a craft centre along the R71 en-route to the KNP Gate;
- Indigenous Tree Garden;
- “Touch and Feel” wildlife centre.

Alternatively, a new approach towards the physical upgrading and expansion of the Centre is necessary, whereby a feasibility study needs to be conducted first. The approach should aim at ensuring that Bollanoto becomes the ‘heart and soul’ of tourism in Ba-Phalaborwa Municipality. The concept is to enclose the present buildings within a decorated wall and to construct all new facilities, such as gift shops, restaurants etc. facing outwards from this wall. This would create a flow of feet within the central circle and would ensure that a visitor heading for the restaurant, for example, would also see and pass the other facilities on offer.

There is unused land (part of the Bollanoto property) extending to the north and northeast and this would be used for the Living Tree Museum, walks and trails, and some of the “touch and feel” animal experiences. Additional land may be available - at a price.

Annual Marula Festivities

The annual Limpopo Marula Festival is a yearly calendar event that is hosted in Ba-Phalaborwa local municipality as a permanent home the extravaganza

Key Challenges with regard to tourism in Ba-Phalaborwa:

- Crime and potential cross-border criminal activities may scare tourists;
- Lack of cross referrals between the KNP and accommodation facilities in the Ba-Phalaborwa area;
- Commercial banks meeting the needs of international tourists;
- Ensuring that the previously disadvantaged groups join the tourism industry as role players;
- Development of suitable infrastructure to meet the different tastes of tourists;

- Branding Ba-Phalaborwa as a tourist destination of choice;
- Lack of ownership of the tourism products by the stakeholders; and
- Cluttered tourism signage.

e. Trade

Currently, the trade situation in the Ba-Phalaborwa municipal area is segmented between the formal and the Informal sectors. The existent gap between the first and the second economies is evident from the operations of the businesses in both the formal and the informal sectors.

Formal businesses in rural nodes, such as Makhushane, Maseke, Mashishimale, Majeje and Selwane still remains not well established. The businesses mainly serve as bread distributors with basic products not well stocked to the benefit of their customers. The Municipality's concern is to close the gap between the first and the second economies by improving the informal economic sector without devaluing the formal sector.

f. Informal Economic Sector

Informal trading in Ba-Phalaborwa remains an important sector that needs government support. Currently, street trading is not adequately managed and has led to the mushrooming of more street vendors around shopping centres in Namakgale and Lulekani. The municipality through the management of the Shoprite/Checkers was able to assist 36 hawkers with the construction of decent stalls in Phalaborwa. There is a challenge of cleanliness in and around the hawkers' trading spaces.

Needs identified by informal economy businesses.

- The greatest need identified is the issue of decent trading structures and storage facilities at the places where they are currently trading.
- Most traders in the Checkers Car Park indicated that they need access to micro-finance in order to increase their stock levels and variety.
- Some Spaza owners mentioned the need for advertising materials (boards), to attract/ alert potential buyers
- Electricity connections were requested by some traders.

3.3.3 Job Creation

Employed	Unemployed	Unemployed Rate	Youth unemployment rate (15-34)
33 695	20 196	37,5%	50.20%

There were 207 jobs created through municipal initiatives from July 2022 to December 2022. The Community Works Programme (CWP) was established in 2011 for communities which have low income or no household income at all. The programme has to create 1060 jobs with a view to expand to the entire Municipal area.

3.3.4 SMME Support

- A total number of 332 SMMEs were supported through the Municipal Supply Chain processes during the procurement of goods and services from July 2021 to June 2022.

3.3.5 Rural Development Initiatives

- The Municipality has also implemented various infrastructure related projects in the rural areas such as the Marula Oil Extraction project in the five traditional authorities, street paving, construction of storm water culverts etc.

3.3.6 Local skills and Job markets

Skills training is a critical asset for individuals, businesses and societies. The importance of skills is even more pronounced in a dynamic, globalized world. Ba-Phalaborwa Local municipality skills training should be concentrating on the four prioritised economic sectors, which are Mining, Tourism, Manufacturing and Agriculture.

It is also crucial to ensure that skills taught at school are relevant for the working world; that they are maintained and further improved during working life; and that they are recognized and used by employers once people are in the labour market. The municipality has acknowledged the following SETA's as relevant given the economic structure of the area; MERSETA ((Manufacturing, Engineering and Related Services Education and Training Authority), MQA (Culture, Arts, Tourism, Hospitality and Sport Sector Education and Training Authority), CATHSSETA (Primary Agriculture Education and Training Authority), PAETA (Mining Qualifications Authority), WARSETA (Wholesale and Retail Sector Education and Training Authority) and LGSETA (Local Government Sector Education and Training Authority).

The municipality houses a Technical and Vocational training institute (Mopani TVET College) and a Hotel school, the two institutions provide relevant courses that are aligned to the needs in the industries as alluded above.

Local Economic Challenges

Ba-Phalaborwa Municipality comprises of Phalaborwa Town bordering the Kruger National Park to the east of the municipal area, separate developments that still maintains the hall-marks of the apartheid spatial developments in Namakgale, Lulekani and Ben-Farm, all situated within an average of 15km radius from each other, to the west of Phalaborwa Town. The municipality still has an alarming unemployment rate of 37,4% which surpasses the national standards. It has the highest concentration of minerals in the Mopani District hence

mining is the largest economic sector in the Municipality and it is also the largest employer, given the current economic outlook and the commodity prices dwindling, fears of retrenchments are on the rise and the sector has economic uncertainties.

Phalaborwa town accommodates 9.3% of the population in the urban complex, Namakgale and Lulekani accommodate 25% of the population with the remaining 65% living in the rural and the five traditional settlements and there is also a general infrastructure backlog which hampers potential new economic infrastructure development in the rural areas. Lack of adequate economic infrastructure, social infrastructure, water and electricity service level provision, water supply capacity, and non-payment of services pose challenges to municipal revenue collection, decreasing the guarantee for sustained provision of services. Land ownership in most parts of Ba-Phalaborwa is a major challenge. There are major obstacles in terms of achieving objectives of urban development compounded by land claims that take long time to be settled. High poverty levels pose huge challenges for economic growth.

3.4 Basic Service Delivery

3.4.1 Water and Sanitation Provision

Mopani District Municipality is the Water Service Authority (WSA) and Ba-phalaborwa Municipality is Water Service Provider. The District has taken over the function of water services, from bulk purchases to household's provision and maintenance of water infrastructure. However, the municipality is still doing water maintenance functions on behalf of the District. About 37516 households have access to water and 38057 have access to sanitation.

3.4.1.1 Access to water

Table 25: Access to water

Service	Total Number of Households
Piped water (tap) water inside dwelling/institution	15 252
Inside yard	18 721
Community stand less than 200m	3 495
Community stand between 200m and 500m	1 129
Community stand between 500m and a kilometre	640
Community stand greater than a kilometre	653

Source: Stats SA Census 2011

3.4.1.2 Sources of water

Table 26: Sources of water

Water sources	Number of Households
---------------	----------------------

Regional/local water scheme (operated by the municipality or other water services provider)	36 680
Borehole	1 933
Spring	14
Rain water tank	265
Dam/pool/stagnant water	425
River/stream	390
Water vendor	291
Water tanker	372
Other	745

Source: Stats SA Census 2011

Distribution of Households by main source of water for drinking

Piped (tap) water inside the dwelling/house	Piped (tap) water inside yard	Piped water on community stand	Borehole	Rain-water tank in yard	Neighbour's tap	Public/communal tap
15 018	21 902	2 995	716	0	4 889	2 696

Source: Stats SA Community Survey 2016

3.4.1.3 Water backlog in the Municipality

According to STATSA 2016 Community Survey, about 44 277 households in the municipal area have access to water which is 91.3% and 4 222 (8.7%) households does not have access. The distances that people have to travel to access water varies from 200m to greater than a kilometre. The areas that are mostly affected by water challenges are Bern-farm, Matikoxikaya, Mashishimale, Maseke, Lulekani and Selwane.

3.4.1.4 Water Losses and Cost Recovery

The municipality and the district municipality is incurring a lot of water losses during the provision of water services to the community. The water infrastructure in Phalaborwa Town is very old and it needs to be replaced. There is a lot of illegal water losses in areas like Lulekani and Namakgale. To date the municipality does not have the latest information on water losses. The information is obtained from Lepelle Northern Water, who is the main bulk water provider in the Municipality.

The municipality is also incurring a lot of water losses where the residents are not billed, areas like Majeje A, B, and C Section. There is no cost recovery for the services that are being provided in rural areas which include Majeje.

3.4.1.5 Access to free basic water

Service	Number of households served
Water	505

3.4.2 Sanitation

Sanitation function is the competency of the District Municipality, however, the Municipality currently supplies water borne sanitation to Phalaborwa Town, Namakgale and Lulekani. The table below shows the sanitation infrastructure capacity in the three areas:

Sanitation facilities	Number of Households
None	4 698
Flush toilet (connected to sewerage systems)	16 638
Flush toilet (septic tank)	860
Chemical toilet	424
Pit toilet with ventilation (VIP)	6 718
Pit toilet without ventilation	10 833
Bucket toilet	80
Other	864

Source: Stats SA Census 2011 (Table 13)

Sanitation infrastructure capacity in Phalaborwa Town needs attention. The infrastructure is old and needs to be upgraded. This is evident by the regularity of sewer burst that flows into the street. The sewer pump station in town and the main sewer plant at Schietoch needs to be upgraded and the replacement of asbestos sewer pipes, which is more than 30 years old.

Water and Sanitation Backlog

Service	Backlog
Water	1226
Sewer and sanitation	5642

3.4.2.1 Key Challenges with regard to water and sanitation:

- Ba-Phalaborwa Municipality is not a water services authority

- Bulk water infrastructure struggle to deal with water demand
- The distribution infrastructure is more than 35 years old;
- Illegal water connection which affects other areas not have water
- Supply to Phalaborwa town is operating at full capacity;
- There is unbalanced water distribution caused by over utilization in unmetered areas as well as system capacity;
- Communities that rely on boreholes complain about boreholes that are not working;
- Daily water supply interruptions are common in more than 75% of the wards;
- Cost recovery and the non-payment of services.
- Sanitation infrastructure in Phalaborwa Town needs to be upgraded in order to accommodate new developments.

3.4.2.2 Free Basic Water and Free Sanitation

Number of consumer's units with free access to free basic water and sanitation

Free basic service	No of households
Water	505
Sewer and sanitation	505

3.4.3 Energy and Electricity

The National Electricity Regulator has licensed the Municipality to supply electricity within the boundaries of the old Phalaborwa area. ESKOM is the license holder within the Municipality for all the out-laying areas, which includes Namakgale, Lulekani, and all the villages such as Makhushane, Selwane, Nondweni, etc. About **42316** households have access to electricity with a backlog of **746** households. Only **1125** indigent households have access to free basic electricity. The municipality has an electricity master plan approved by council but due to financial constraints the municipality is few years behind in terms of implementation of the master plan.

Table: 27 Energy or fuel for lighting

Energy or fuel source	Number of Households
Electricity	37 345 (91%)
Gas	27 (0.06%)
Paraffin	153 (0.4%)
Candles	3 380 (8.2%)
Solar	84 (0.2%)
Other	0
None	0

Source: Stats SA Census 2011

Table 2.8: Distribution of households by main type of electrical energy source

In-house Conventional meter	In-house prepaid meter	Connected to other source which household pays for	Connected to other source which household is not paying for	Solar Home system	Generator/battery	Other	No access to electricity	Total
3 643	44 284	291	191	-	-	74	617	49 100

Source: StaSA Community Survey 2016

Table 2.9 Distribution of households by supplier of electricity, CS 2016

LIM334: Ba-Phalaborwa	Municipality prepaid	Receive bill from municipality	Eskom-pre-paid	Receive bill from Eskom	Other supplier (e.g. metering services such as impact meters)	Total
	6 524	1 698	38 456	546	58	47 283

3.4.3.1 Electrification Backlog (Table 29)

Priority	Village	Type of connection			Total no of units
		Grid	Non-grid	Post conn	
2	Makhushane	1650			1650
13	Kurhula Lulekani	500			500
10	Maseke	100			100
	Total	2250			2250

According to the Stats SA Census 2011 access to electricity in the municipal area is at 91% with only new extension that is still to be connected to the grid.

3.4.3.2 Electricity Supply in Phalaborwa Town

The Phalaborwa network supplies the town business, commercial, industrial and residential areas and has approximately four thousand connections varying from normal residential connections to three phase LV business connections to 11kv bulk supplies to large consumers. The Phalaborwa electricity distribution network is in dire need of reinforcement and refurbishment. A large percentage of the 11kv switchgear and transformer equipment has been in constant service for over 40 years. Some 11kV circuit breakers no longer meet modern safety requirements and in fact are positively dangerous to operate under certain fault conditions. Some of the mechanisms are inconsistent and erratic in their speed of operation, probably due to mechanical wear, with the result that the performance of the protection systems is not reliable. The redundant capacity of a number of 11 kV cable ring supplies are no longer capable of meeting the increased loads placed upon them during fault conditions. There are a number of faults scenarios which, should they occur, will result in a severe and prolonged

curtailment of electricity supply to large areas of the town, including the central business district and industrial area.

Furthermore, the capacity to transfer sufficient power from the Selati main in-take substation is not adequate during periods of heavy loading should one of the present lines be lost. The line feeding the whole northern area is critical and needs to be augmented by means of an additional line.

The increased demand for electricity over the past number of years is set to continue and the point has been reached where significant parts of the network are no longer able to ensure a reliable supply. There is therefore a definite and urgent requirement for selective up grading of the network as well as ongoing refurbishment and replacement of ageing and obsolete equipment.

Status of Electrical Infrastructure in Phalaborwa Town

ITEM	TOTAL LEGNTH (KM)	VERY GOOD	GOOD	FAIR	POOR	VERY POOR
Underground cable	311	16	62	200	25	8
Overhead line	33.5	0	0	8	9.5	16
Substation	16 Substation	1 (Cleveland)	4	4	4	3 (Selati, Lanatana and Wildevy. Selati in the process of upgrading)

3.4.3.3 Street Lighting

The present situation regarding public lighting within the area of jurisdiction of the Ba-Phalaborwa Municipality for the main towns is as follows:

Phalaborwa Town

Most (90%) of the street lights in town have been replaced with energy saving lights. The Impala sports stadium is fully equipped with flood lighting however three high mast lights need to be replaced.

Namakgale

A total 7.7km of roads within the township is equipped with roadside lighting of good quality. In addition, there are a total of 41 high mast lights spread throughout the township, which gives acceptable area coverage. However, there are still a number of roads that need to have roadside street lighting installed and some high mast light are not working

Lulekani

A total of 9.75 km of roads within the township has roadside street lighting installed together with 7 high mast lights providing area lighting. The sports stadium is also equipped with flood lighting. At a number of identified dangerous intersections street lighting has been installed on an ad-Hoc basis. There are however many areas, which need to have lighting, installed.

Out Laying Villages

With regard to the out laying villages of the municipal area, street lighting is non-existent. A total of 70 Solar-based high mast lighting has been installed all wards of Ba-phalaborwa except ward 11 & 12.

3.4.3.4 Electricity Losses

The electricity infrastructure is very old and the municipality is busy with refurbishment. There are sometimes power disruptions in town where the municipality holds the licence to provide electricity. The municipality is incurring electricity losses that are not accounted for due to challenges with the infrastructure, and cases of illegal tempering with electricity meters. Electricity losses are obtained from the main electricity supply to the municipality which is Eskom.

3.4.3.5 Key Challenges with regard to electricity supply:

- Lack of street/area lighting in the rural areas promotes crime;
- High mast lights are not properly maintained;
- Rates income not enough to cover both capital and operational costs;
- Unreliable electricity supply in Phalaborwa due to old electrical infrastructure
- There is an urgent need for refurbishment of old network in Phalaborwa in order to attract investment.
- Unable to implement electricity master plan due to financial constraints.

3.4.4 Waste Management

- The Municipality is providing waste management services to 22 941 households of its total households of 41115. The municipality has an approved Waste Management Plan which is due for review. The Plan was approved February 2019. The municipality currently has one licensed landfill site which is in operation and an approved license to develop new one. Extension of a closure license for Phalaborwa landfill site is until 2024 March.
- The municipality does not have designated Waste Management Control Officer but waste management supervisors.
- The municipality is in a process to develop Waste Management by-laws, currently the development is at public participation stage. After public participation the final approval will be done by council.

The following areas are serviced on weekly basis:

Area	
Phalaborwa	Urban
Namakgale	Urban
Lulekani	Urban
Gravelotte	Urban
Mahishimale R1, R2, R3	Rural
Mandela Village (Namakgale)	Urban

Table: 30 Access to solid waste removal services in the Municipal area

Refuse Removal Services	Number of Households
Removed by the municipality	20 066
Removed by local authority/private company	257
Communal refuse dump	684
Own refuse dump	17 849
No rubbish disposal	1 933
Other	327

Source: Stats SA Census 2011

Distribution of households by refuse removal

LIM334: Ba- Phalaborwa	Removed by local authority/private company/community members at least once a week	Removed by local authority/private company/community members less often than once a week	Communal refuse dump	Communal container /central collection point	Own refuse dump	Dump or leave rubbish anywhere (no rubbish disposal)	Other	Total
	20 708	514	1 886	27	23 029	1 002	1 933	49 100

Stats SA Community Survey 2016

3.4.4.1 Waste Management Backlog in the Municipality

The solid waste management backlog is standing at 18 174 households without the service. The Municipality has a five (5) year plan to extend the service to all the rural areas in the Municipal area.

The following table represents the waste management backlog in the Municipal area:

Table: 31 Waste Management Backlog

Area	Location	Number of Households
Matiko Xikaya & Humulani	Rural	2 449
Selwane, Prieska, Nondweni, Silonque, Grietjie	Rural	4 077
Makhushane	Rural	1 847
Maseke	Rural	2 130
Kurhula and Pondo	Rural	2 163

Source: Ba-Phalaborwa Environmental Health Section

Households with access to free basic waste removal

Service	Number of households served
Free basic Waste removal	12 605

3.4.4.2 Waste Management Recycling

The percentage of waste recycling is currently very low. The challenge with recycle is the distance from Phalaborwa to Gauteng where waste recycle materials are sold and the lack of transport thereof.

Other recycling in the Municipality is done by private companies in the Phalaborwa Industrial area. They receive most of their recyclables from the local mines and industrial factories. Sorting of recyclables is done in the yard as well as outside the yard.

3.4.4.3 Key Challenges with regard to waste management

- Refuse removal Trucks. The municipality is currently having two which are good working condition
- Inadequate staffing.
- Establishment of new landfill site (lack of funds). The current license will expire soon

- Lack of waste removal to all rural areas

3.4.5 Municipal Roads and Storm water

The municipality has a total of 802.1km road network. The Unpaved streets of 559.1 km's within Ba-Phalaborwa Jurisdiction. The municipality does have an approved Road Master Plan but the municipality is unable to implement the plan due to financial constraints.

3.4.5.1 Road Ownership

The extent and ownership of roads within the Ba-Phalaborwa municipal area is indicated in the Table:32

Ownership/Managers of Roads in Ba-Phalaborwa		
Description	Ownership	Length (km)
Paved	SANRAL	110
Unpaved	SANRAL	5
Paved	RAL	80
Unpaved	RAL	254
Streets	Ba-Phalaborwa	722
Total	SANRAL	115
Total	RAL	335
Total	Paved	190
Total	Unpaved	542.35

Internal streets in Namakgale, Lulekani and the traditional settlement areas adjacent are in urgent need of rehabilitation and maintenance. The municipality is struggling with road maintenance, given that there is no enough earthwork equipment and budget.

3.4.5.2 Main roads in the Municipal area

NAME OF ROAD	DESCRIPTION	CLASSIFICATION	CONDITION
--------------	-------------	----------------	-----------

R71	Phalaborwa to Polokwane via Gravelotte and Tzaneen	Provincial	Satisfactory
R526	Gravelotte to Mica	Provincial	Not Satisfactory
R40	Phalaborwa to Nelspruit via Mica	Provincial	Not Satisfactory
R529	Western boarder. Links Greater Giyani to Greater Tzaneen	Provincial	Satisfactory
	Giyani to Phalaborwa via Letaba Ranch	Provincial	Satisfactory

The following are the most common needs associated with municipal roads:

- Storm water control and culverts
- Re-gravelling
- Street paving
- Potholes repairs

3.4.6 Public Transport

The table below presents modes of transport in the municipal area.

Table 33: Percentage population utilizing different modes of transport

Mode of Transport	Number utilizing transport mode	% Utilizing the Transport Mode
Bicycle	45 577	34.7%
Private	12 527	9.5%
Bus	6 144	4.7%
Taxi	7 405	5.6%
Not applicable	59 832	45.5%
Total	131 485	100%

The majority of people in the Municipal area use public transport. They rely on public transport to commute in and out of town on a daily basis. However, there is no link between taxi and bus services as the two measure forms of public transport. The municipality has built inter-modal public transport facilities in Namakgale and Lulekani. The two facilities are fully utilised by the public transport operators, especially the Namakgale facilities. The table below presents the public transport facilities in Ba-Phalaborwa:

Table: 22 Public transport facilities in Ba-Phalaborwa.

No.	Area	Facility Name	Status
1	Lulekani	Lulekani Entrance	formal
2	Lulekani	Lulekani Post Office	Informal
3	Lulekani	Akanani Shoppin Centre	Informal
4	Majeje	Majeje Taxi Rank	Informal

5	Makhushane	Makhushane Taxi Rank	Informal
6	Namakgale	Namakgale GNT Taxi Rank	informal
7	Mondzweni	Mondzweni Taxi Rank	formal
8	Namakgale	Namakgale Entrance Taxi Rank	Formal
9	Phalaborwa	Phalaborwa Taxi Rank	Formal

3.4.7 Rail Transport

Phalaborwa is linked by rail with Hoedspruit and Tzaneen in the north-west. The main function of the rail network is transportation of goods. This mode of transport if upgraded could relieve the overburden road usage.

3.4.8 Air Transport

There is one airport in the Municipality which is currently closed. The airport was accommodating small air crafts, but proves to be useful to the local mines and other businesses. There is a need to improve the airport. The airport is owned by SA Airlink, which also operates the airline to Phalaborwa. There were plans by the airport owner to sell/transfer the airport to the municipality. The municipality has conducted pre- feasibility studies, which has shown that the acquisition of the airport will be very expensive for the municipality to operate, comply with aviation regulations and maintain it

3.4.9 Key Challenges with regard to roads

- There is a need to upgrade existing roads;
- The Giyani - Phalaborwa and Eiland - Letaba Ranch roads have the potential to boost tourism in the area.
- Road maintenance is not satisfactory because of lack of enough equipment.
- The capacity by the Municipality to upgrade and maintain roads.
- The current rail link and service out of Phalaborwa is also inadequate to support the potential for magnetite beneficiation
- There is an increase in road use by the trucks that are transporting magnetite from Phalaborwa to Mozambique.

Public Transport Challenges:

- Formalisation of Taxi ranks (Only 4 official Taxi Ranks)
- Parking space for buses in town
- Hawkers occupying offloading zone

3.5 Municipal Financial Viability

3.5.1 Financial analysis

The aim of the analysis on the financial health of the municipality was to understand the revenue collection and expenditure patterns in order to inform decisions pertaining to collection, management and utilisation of financial resources in an attempt to attain municipal objectives.

The Municipality has to increase its assets and cut down on liabilities if it is to improve its liquidity. Current trends also indicate a low and declining credit rating suggesting a poor financial health.

3.5.2 Supply Chain Management

The Municipality Supply Chain reports are tabled in council and submitted to National and Provincial Treasury. Through the Supply Chain Management, the Municipality has supported SMMs. The Municipality has improved its fleet management; all Municipal vehicles are fitted with tracking devices that assist in tracking irregular issues. The tracking devices reports are printed on monthly basis and analysed. The Municipality has completed the GRAP compliant asset register.

3.5.2.1 Supply Chain Committees

The municipality has reviewed its Supply Chain Management Policy, which makes provision for the establishment of the Supply Chain Management Unit. The Municipality has appointed the Supply Chain Manager who heads the Unit. The Accounting Officer has established all the Supply Chain Committees. Supply Chain Bid Specifications Committees, members are appointed according to the service to be procured. Bid Evaluation Committee members are also appointed by the Accounting Officer according to the service that needs to be procured. Bid Adjudication Committee is constituted by all the senior managers in the municipality, which includes the CFO and the Accounting Officer.

3.5.3 Revenue Enhancement Strategy and Billing

The municipality has an approved Revenue Enhancement Strategy that is used as a basis for revenue collection. The Strategy makes provision for the billing and levying of taxes for all the services that the municipality is providing to the community. The municipality is billing households for waste, sanitation, electricity and property rates at the following areas:

Namakgale Section A, B,C,D and E

Farms

Phalaborwa Town

Sectional Tittles

Gravelotte

Lulekani

Kruger National Park

3.5.4 Municipal Debtors

The municipality has a debt book of over R600 million accumulated from the previous financial years. The municipality has appointed debt collector to recover the money that the municipality is owed by the consumers. The debt collector is working and progress will be reported during each financial year.

3.5.5 Municipal Budget Related Policies

The following policies were reviewed and adopted with the budget:

- Property Rates Policy
- Tariff Policy
- Credit Control Policy
- Debt Collection Policy
- Indigent Household Consumer Subsidy policy
- Supply chain management policy
- Virement policy
- Budget policy
- Petty Cash policy
- Asset Management Policy
- Bad Debts Write Off
- Deposit Policy
- Cash management and Investment Policy
- Fleet management Policy
- Electricity by-laws
- Land use by-law
- Electricity supply by-laws
- Subsistence and travelling policy

3.5.6 Summary of the Budget

LIM334 Ba-Phalaborwa - Table A1 Budget Summary

3.6 Good Governance and Public Participation

3.6.1 Council Committees

The Municipality have established Council committees in line with the provisions of the Local Government: Municipal Structures Act. The following portfolio committees are in place:

Name of Portfolio Committee	Members
Finance Portfolio Committee	Cllr R Makasela (Chairperson)
Planning and Development	The late Cllr D Bayana (Chairperson)
Governance and Administration	Cllr T Nkuna (Chairperson)
Technical Services	Cllr V Rapatsa (Chairperson)
Community and Social Services	Cllr SR De Beer (Chairperson)
MPAC	Cllr P Mkhari (Chairperson)

3.6.1.1 Stakeholder Relations

There are five traditional authorities within the Ba-Phalaborwa Municipality. The names of the traditional authorities are as follows:

- Mashishimale Traditional Authority
- Maseke Traditional Authority
- Majeje Traditional Authority
- Ba-Phalaborwa Traditional Authority
- Selwane Traditional Authority

The municipality has a good working relationship with all the five local authorities though there are areas where there are some differences, that is, in the management of land-use and the demarcation of new sites.

The following stakeholders form part of the municipality's governance system, the mining houses, sector departments and government institutions, the local tourism product owners, local business formations, non-governmental organizations, rate payers, civic organizations and other groupings as important stakeholders in local development. Although there is a lot that has been achieved through stakeholder initiatives, there is an acknowledgement that a lot still has to be done to improve relations between the Municipality and its stakeholders.

3.6.2 IGR Structures

The Municipality is part of the established IGR structures in the Mopani District and the Limpopo. The established IGR structures include the following:

- District Ward Committee's Forum
- District Municipal Manager's Forum
- Speakers Forum
- Mayor's Forum
- Premier's Inter-Governmental Forum

The forums provide a platform for the municipality to interact with other governmental structures that has a bearing on its functionality.

3.6.3 Public Participation

The public participation function in the Municipality is located in the Office of the Speaker. The Municipality has appointed a Public Participation Manager who is responsible for the coordination of all public participation activities. The municipality has established a complaints management system in order to address service delivery related complaints. There is a Batho Pele committee which is sitting every month to address issues raised through ward committee reports, Community Development Workers reports, Premier hotline complaints and Imbizo report.

3.6.4 Public Participation Policies

The municipality has amended its public participation policy which was public participated and approved by council. The municipality also does have a complaints management system which is referred to as Batho Pele.

3.6.4.1 Public Participation Mechanisms

Ward Committees

The municipality has, since the inception of ward committees, established ward committees in all the municipal wards. At the moment, there are 19 ward committees in the municipality which corresponds with the number of wards as per the 2016 local government elections demarcation.

The ward committees are fully functional; they submit their monthly reports to the Public Participation Manager in the office of the Speaker. The reports are processed through the Economic Development Portfolio Committee attached in the EXCO and Council agendas. The current ward committees have been trained in order for them to effectively do their responsibilities. The training was funded by Limpopo Department of Cooperative Governance, Human Settlement and Traditional Affairs. In terms of support, the municipality has set aside a budget to cater for the administration of ward committees. Ward committee members are currently receiving a stipend of R1 500.00 per month. The money goes towards transport costs and other logistical things.

Community Development Workers (CDW)

The municipality has 12 fully employed community development workers who are working with the municipal wards. The CDWs are part of the municipal integrated development planning processes. Their reports are incorporated and processed together with the reports of the ward committees. The reports form part of the EXCO and Council agenda. The challenge with the community is that for the past three years, no CDWs were

employed. This has led to a number of wards without the services of CDWs. The Municipality has 19 wards and only 12 CDWs. This means that ward 3,5,11,12,13,14 &17 are without the services of CDWs.

Mayoral Imbizos

The Municipality has a programme of mayoral outreach programme (imbizos) which it has incorporated to the IDP, Budget and PMS Process Plan. According to the Plan, there are four (4) imbizos per year, with one held each quarter. The imbizos are coordinated by the Senior Officer Public Participation in the Office of the Municipal Manager through a dedicated task team.

Imbizos afford, the mayor an opportunity to interact with the community of Ba-Phalaborwa and to give feedback on service delivery issues, without substituting the monthly report back meetings by the ward committees and ward councillors. For financial year 2022/23 until May 2023 the municipality managed to have three Mayoral Imbizo.

IDP, Budget and PMS Public Participation

Electronic Media

As a way of public participation, the Municipality has an active website that is being updated regularly. The website is used as a tool to afford communities an opportunity to participate in the municipal affairs. The municipality does also communicate through municipal Facebook page, WhatsApp groups and also through loud hailing, Municipal notices, reports, tenders and etc. are placed on the website.

Currently on a quarterly basis, the municipality publishes a municipal internal newsletter which affords the employees an opportunity to know what is happening in the municipality.

3.6.5 Audit Committee

The municipality through a council resolution appointed its own audit committee. The committee appointed September 2021 its term end August 2024. The new Audit Committee was appointed. The members of the audit committee are all independent and are specialists' different professions.

3.6.6 Municipal Public Accounts Committee (MPAC)

The municipality has established a Municipal Accounts Committee in terms of section 33 and 79 of the Municipal Structures Act 2000. The committee plays an oversight role of the council. The committee consists of councillors who are non-executive councillors. The committee is functional.

3.6.7 Anti-corruption, Audit and risk management

Anti-Corruption

The main purpose of anti-corruption is to create an environment which is anti-fraud and corruption free. To promote good governance and ensure continuous commitment to the fight against fraud and corruption the Risk Management Unit has developed the below mentioned governance documents;

The following governing documents relating to fraud and corruption were developed.

- Anti-Fraud and Corruption Strategy
- Fraud Prevention Plan
- Investigation Policy
- Donation policy
- Whistle blowing policy
- Access Control Policy

Internal Audit

The main purpose of the Internal Audit Unit is to help the Municipality achieve its set objectives by providing an independent objective assurance and consulting services to improve risk management, controls and governance processes using a systematic disciplined approach. The main priorities are to implement the Annual Internal Audit Plan, comply with the approved internal audit Charter which is consistent with the Institute of Internal Auditors Standards, Code of Ethics and Section 165 of the Municipal Finance Management Plan and support the Audit Committee and Audit Steering Committees.

Risk management

The main purpose of Risk Management is to identify and evaluate risks which have a potential to negatively hamper the institution from achieving its goals and objectives, and coming up with mitigations to manage the risks to an acceptable level.

The Risk Management Unit conducted Risk Assessments with all departments to identify any risks that might hamper the institution from achieving its planned objectives and come up with mitigations to manage the risks.

The following risk register were developed.

- Strategic Risks Register
- Fraud Risks Register
- Information Technology Risk Register
- Operational Risk Register
- Project Risk Register

Ten top risks for the municipality:

3.6.8 Municipal Audit Outcome

2016/17	2017/18	2018/19	2019/20	2020/21	2021/22
Disclaimer	Qualified	Qualified	Qualified	Qualified	Qualified

The Municipality obtained a Qualified Audit Opinion. The following were findings raised as a basis for the qualification:

- Cash and cash Equivalent
- Receivables from exchange transactions and consumer debtors
- Consumer debtors - Service charges
- Revaluation reserve
- General expenses - Consumables
- Contingencies
- Payables from exchange transactions
- Total revenue and expenditure
- Contracted services: Outsourced services - Traffic fines management
- Cash flow statements

Corrective steps for Audit findings:

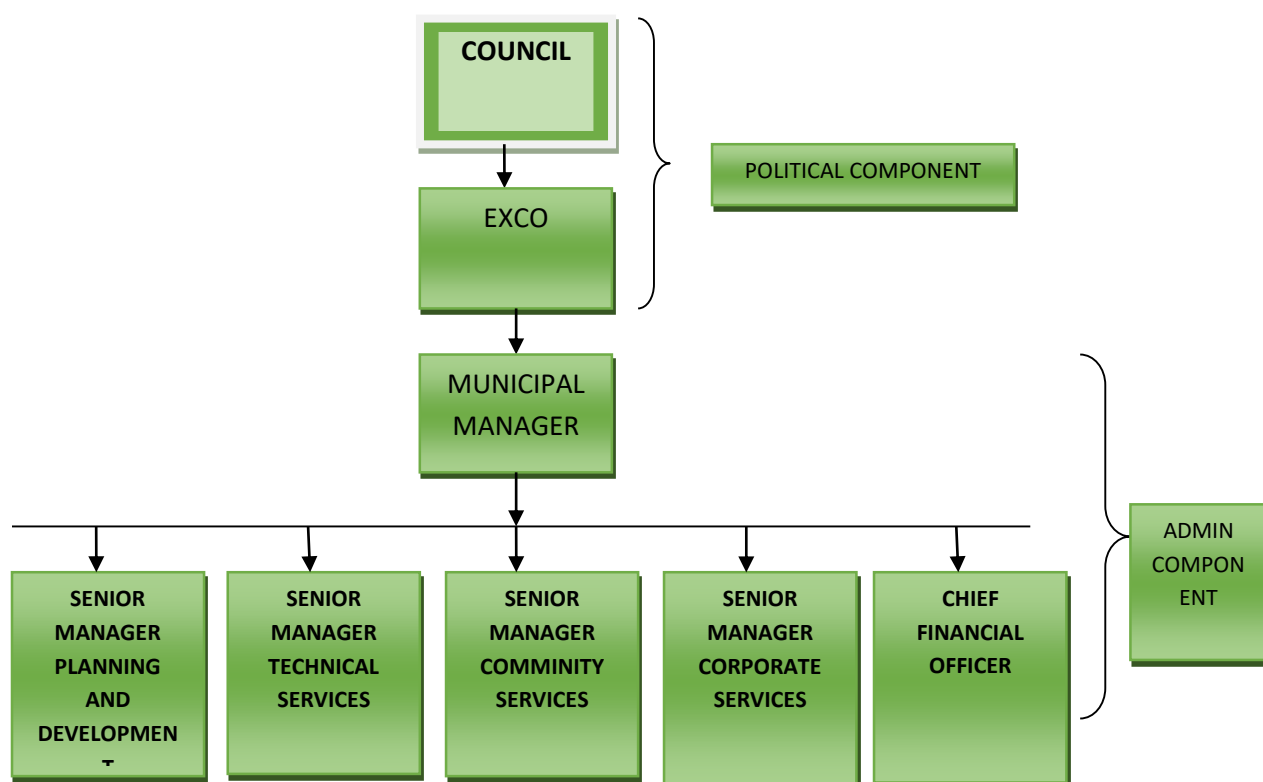

The municipality has developed an annual action plan which responds to the A-G's comments. The plan has clear targets with timeframes. This plan will also assist the municipality to improve the management of the municipal business.

3.6.9 Communication System

The municipality has established a unit which deals with communication; the unit is also responsible for marketing the institution and communicating all activities of the municipality

3.7. Municipal Transformation and Organisation Development - Institutional Analysis

3.7.1 Human Resources and Organisational Structure

Section 66 of the Local Government: Municipal Systems Act, 32 of 2000 makes provision for staff establishment. The staff establishment must be in line with the powers and functions of the municipality and must make provisions for job descriptions for each position. Ba-Phalaborwa Municipality approved its Organizational Structure and the structure is aligned with the IDP and the powers and functions to be conducted by the municipality. The organogram provides for a staff complement of 700 with 446 of the positions filled, 236 positions vacant and 37 councillors.

The Municipal Manager (a section 54 manager) has attended the MFMA and acquired the competency certificate in compliance to the minimum requirements on competency levels in order to improve financial management skills. All managers at post level 2 have attended the Municipal Finance Development programme in line with the Works Skills Plan of the Municipality. This effort is meant to improve financial management skills. Other specialized training programmes are being implemented across the different line functions to improve the skills base of the Municipality.

Alignment of the Organogram to the Powers and Function

Office of Municipal Manager	Budget and Treasury
Overall responsibility of the organisation.	Income and Expenditure

Internal Auditing Communication Disaster Management Public Participation	Debt Management Budgets Asset Management Financial Reporting Supply Chain Management Fleet Management
Technical Services	Community Services
Municipal Roads and Storm Water Infrastructure management Project Management Drainage and Storm Water Building Regulations Electricity (Phalaborwa Town)	Waste Management Environmental Health Management Sports and Recreation Parks and Cemeteries Traffic and licensing Hawkers
Corporate Services	Planning and Development
General Administration (Human Resource) Legal Services Council Support Policies and Procedures Capacity Building/Training Occupational Health and Safety	Integrated Development Planning Performance Management System Town Planning Human Settlement Local Economic Development Geographical Information System

3.7.2 Workplace Skills Plan

The Municipality developed the Workplace Skills Plan in terms of the Skills Development Act and submitted to the LGSETA as per the requirement. In terms of the Workplace Skills Plan, a total number of 92 training interventions were planned.

3.7.3 Employment Equity Plan

The municipality submitted the EE report in January 2021 and complied with the due date for submission. There is equity in the senior management levels (post level 1 to post level 5) of the municipality comprising of one section (57) female manager and seventeen (17) other managers. The Municipality's EE is affected by the high labour turnover which is as a result of the geographical location of our town.

Employment equity challenges

- Unable to attract skilful personnel of people with disabilities in senior positions
- Unable to attract women with suitable qualifications in top management

The following presents the population by gender and disability in the municipal area.

Table: 47 Population by gender and disability.

Population by Gender and Disability			
Disability	Male	Female	Total
Sight	643	547	1190
Hearing	312	365	677
Communication	80	57	137
Physical	926	692	1618

Population by Gender and Disability			
Disability	Male	Female	Total
Intellectual	422	230	652

Multiple disabilities	82	61	143
No disability	60596	59498	120094
n/a: institution	1531	546	2077
Total	64852	62456	127 308

Source: STATSSA, Community Survey 2011

Challenges faced by special groups:

- Unemployment
- Access of government and municipal buildings
- Lack skills
- Limited economic opportunities
- Inadequate Learnership and Internship opportunities

3.8 Prioritization

3.8.1 Community Needs and Prioritisation

The Municipality held ward based planning meetings in all the wards to identify community needs and their priorities for inclusion in 2023/24 IDP document.

Ward challenges identified through the above processes were confirmed during public participation processes in the wards. Public participation processes included, ward mass meetings, ward report back sessions on service delivery and ward reports submitted monthly in the Municipality.

The tables below present ward community needs and priorities. Ward councillors played a crucial role in confirming ward priority needs:

Community Needs ward 1

Long list

Chapter 4: Development of Strategies

4.1 Introduction

In terms of Section 35(1) (a) of the Local Government: Municipal Systems Act 32 of 2000, an integrated development plan adopted by the council of a municipality is the principal strategic planning instrument which guides and informs all planning and development, and all decisions with regard to planning, management and development, in the municipality. The content of this strategic is informed by the Analysis Phase of the integrated development planning process of the Municipality; and is meant to inform and give meaning to the Projects Phase. Through the strategic plan council and administration sets the direction for the implementation of the municipality's programmes and projects. The strategic planning session was held to ensure that the Municipality remains relevant and responsive to the needs of the community and form a base for monitoring progress and assessing results and impact.

The design of Ba-Phalaborwa Local Municipality Strategic Plan was an iterative process that involved the collection of ward priorities and needs via the IDP consultative protocols, perception surveys and, finally, a three-day strategic planning workshop attended by political leadership, senior managers in administration as well as representatives of organized labour.

4.2 SWOT Analysis

BLM's identified SWOTs are summarized below:

The table below outlines the Strengths-Weaknesses-Threats-Opportunities for the Municipality as perceived by the delegates. The SWOT was re-arranged to categorise only internal issues/challenges under Strengths and weaknesses and all external issues as either threats or opportunities:

	Positive Useful Strengths	Negative Harmful Weaknesses
INTERNAL	Filling of vacancies	High vacancy rate in critical areas.
	Revenue collection	Low revenue collection
	Development of Critical governance documents	Governance documents not in place: - <ul style="list-style-type: none"> • Electrical Master Plan • Roads and Storm Water Master Plan • Integrated waste Management Plan • Tourism development Plan • Rural Development Plan

	Ageing infrastructure and poor maintenance of infrastructure	Ageing infrastructure and unable to generate revenue
	Development of By-laws	Poor enforcement of By-laws
	Approved revenue enhancement strategy by Council	Poor implementation of revenue enhancement strategy
	Development / improve on policy of over-time management reduction	Increasing overtime – especially towards December
	Opportunities	Threats
EXTERNAL	Development of SLA with District to manage Water Services	Mopani District Municipality takeover of water services
	Implementation of Auditor General Action Plan	Unclean Audit
	Appointment of service providers within prescribed SCM time frames	Poor execution of projects on time, or service provider not appointed or appointed late
	Noncompliance with regulations and laws governing the municipality	Municipality exposed to unnecessary litigation.
	Revenue collection	Low revenue collection

4.5 The strategic intent of Ba-Phalaborwa Municipality

Strategic intent refers to the purposes the organisation strives for. These may be expressed in terms of a hierarchy of strategic intent or the framework within which an organisation operates, adopts a predetermined direction and attempts to achieve its goals provided by a strategic intent. The hierarchy of strategic intent covers the vision, mission, value system, strategic goals, impact, outcomes and targets.

The organisation's strategic intent is most important and focuses on the organisation's plans and objectives for its day-to-day business. It is of critical importance to realise that even if the values and strategies are well designed and enunciated, the success would depend upon their implementation by individuals in the

organisation. The strategic intent compels an organisation to reconceptualise its current business practices for a better future. In essence the vision and mission statements define the future more rigorously.

Based on the strategic intent the vision, mission, values, slogan and strategy map applicable to the Municipality as follow:

The long term **vision** of Ba-Phalaborwa Municipality is:

“Provision of Quality Services for Community Well-Being and Tourism Development”

Ba-Phalaborwa Local Municipality has summarised these objects of local government into the following **mission statement** that should provide everyone involved with the municipality (either as employee, stakeholder or community member) with the answer to justify the reason for its existence:

“To Provide Quality Infrastructure and Affordable Services, Promote Sustainable Economic Growth, Financial Viability, Sound Administration and Accountable Governance”

The **Values** that underpin the Municipality’s operations and set us apart are:

STRATEGIC VALUES	DESCRIPTION
Efficiency and Effectiveness	Efficiency measures the extent to which resources were used to deliver a particular level of services. Effectiveness measures the extent to which we have attained the outcomes community members expect based on the IDP process
Accountability	Accountability refers to the degree to which people are held responsible and required to account for their decisions and actions.
Innovation and Creativity	Innovation refers to changes to products, processes, and services in an attempt to improve cost, efficiency, or effectiveness of service delivery; it means to do things differently
Professionalism and Hospitality	Meticulous adherence to undeviating courtesy, honesty, and responsibility in one's dealings with customers and associates, plus a level of excellence that goes over and above the commercial considerations and legal requirements." It is about personal ethics, quality work and a quality attitude. Hospitality in the sense of generously providing care and kindness
Transparency And Fairness	Transparency refers to the extent to which relevant information and decision-making processes are made known to stakeholders. Fairness in the sense of treating community members in a just and equitable manner
Continuous Learning	Continuous acquiring of new knowledge, behaviours, skills, and values to ensure best quality service to the community as well as to keep abreast of changes in local government
Conservation Consciousness	Deliberate and purposeful protection, preservation, management or restoration of wildlife and natural resources

Slogan

A slogan is a memorable motto used in a respective expression of an idea or purpose. A slogan expresses the uniqueness of an organization. The slogan for Ba-Phalaborwa Municipality is:

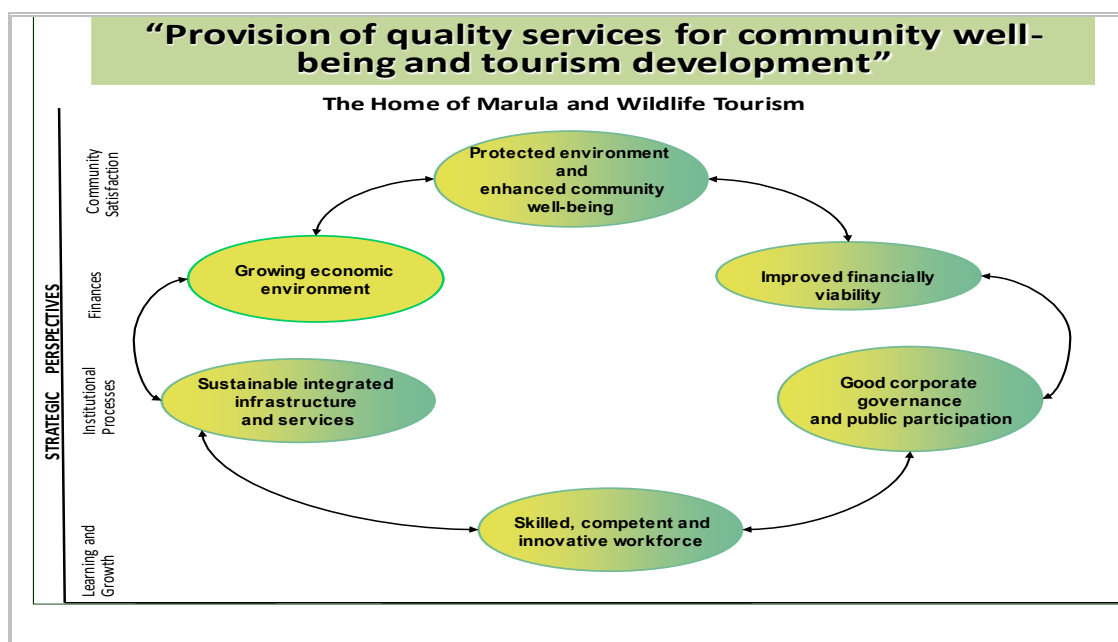

“The Home of Marula and Wildlife Tourism”

The Municipality’s **Strategic Objectives** remain unchanged as indicated below.

KEY PERFORMANCE AREA		STRATEGIC OBJECTIVE	RESPONSIBLE DEPARTMENT
KPA 1	Spatial Rationale	Sustain the environment	Planning and Development
KPA 2	Service Delivery and Infrastructure	Provision of sustainable integrated infrastructure and services	Technical Services Community and Social Services
KPA 3	Financial Viability	Improve financial viability	Budget and Treasury Office
KPA 4	Local Economic Development	Promotion of Local economy	Planning and Development
KPA 5	Transformation and Organisational Development	Attract, develop and retain best human capital	Corporate Services
KPA 6	Good Governance and Public Participation	Good corporate governance and public participation	Office of the Municipal Manager

Strategic Map

A strategy map is a key component of a balanced scorecard, and shows graphically how the organization creates value for customers and stakeholders and employees. The strategy map is constructed by linking strategic objectives using cause and effect relationships among objectives placed in perspectives. The resulting map shows, at a high level, how an organization creates value strategically for its customers and stakeholders. A strategy map is one of the most effective communication tool an organization can use to build alignment, accountability, and a focus on results.

4.5.1 Operational Strategies

In terms of section 26 (f) of the Local Government Municipal Systems Act no 32 of 2000, stipulate that the Integrated Development Plan should contain operational strategies. Ba-Phalaborwa Municipality has achieved this by linking programmes implemented within the municipality to the KPA's and linked to the Strategic Objectives as contained within the Strategy Map.

The operational strategies are represented below in terms of different KPA's as mentioned:

4.5.1.1 KPA 1: SPATIAL RATIONALE

GOAL: SUSTAINABLE INTEGRATED INFRASTRUCTURE AND SERVICES

The goal “Sustainable integrated infrastructure and services” is shared between the two key performance areas, namely spatial rationale and basic service delivery. The rationale is that development planning and provision of services are integrated and should be dealt with in an integrated manner. The National

This goal responds to the Ba-Phalaborwa local municipality’s institutional priority issue that relates to: Sustainable integrated infrastructure and services.

A key challenge identified was the uncontrolled demarcation of sites and development of land. The use of land should continuously be monitored and the land use management scheme must be enforced in order to secure an orderly utilisation of land and to prevent urban sprawl and disorderly development. Key is also the relationship of the municipality with traditional authorities/leaders who are the custodians of most of the land within the municipal area. It will also be important for the municipality to identify areas of land for future development and investigate the possibilities of procuring such land at a reasonable price for future development by the municipality. In relation to the key performance area spatial rationale, the goal outcome is: Acquisition of suitable land.

The ultimate outcome to be achieved through this goal is sustainable development. This means rationally developed and sustainable integrated human settlements.

The identified programmes that relate to this goal are:

- Land acquisition;
- Integrated Land use;
- GIS;
- Building plans administration and inspectorate; and

Details related to the above-mentioned programmes in terms of outcomes and targets, strategic objectives, and strategies and output measurements follow:

4.5.1.2 LAND ACQUISITION

The identified outcome to be achieved with Land Acquisition is: Identify, and acquire suitable land for mixed use for integrated human settlements.

The following strategic objective and strategies have been identified:

Strategic Objective	Short Term Strategies	Medium Term Strategies	Long Term Strategies (5 Yrs. +)	KPI	Annual Target (2023/24)
To formalise Informal development and reduce land invasion	Reduction of land invasion occurrences in the municipality.	<ul style="list-style-type: none"> • Reduction of land invasion occurrences • Number of layout plans submitted to the Planning Tribunal 	<ul style="list-style-type: none"> • Reduction of land invasion occurrences • Number of layout plans submitted to the Planning Tribunal 	<ul style="list-style-type: none"> • Number of reduction land invasion occurrences in the municipality • Number of layout plans submitted to the Planning Tribunal 	Reduction of land invasion occurrences in the municipality. (establishing townships in Selwane and Majeje)

Strategic Objective	Short Term Strategies	Medium Term Strategies	Long Term Strategies (5 Yrs. +)	KPI	Annual Target (2023/24)
Development of Land / Land acquisition system of sustainable land for mixed use	<ul style="list-style-type: none"> Number of land parcels serviced <p>Allocate Extension 9 and Extension 7 site for residential development.</p>	<ul style="list-style-type: none"> Number of serviced land parcels 	<ul style="list-style-type: none"> Number of serviced land parcels 	<ul style="list-style-type: none"> Number of serviced land parcels 	300

4.5.1.3 HUMAN SETTLEMENTS (HOUSING)

The identified outcome to be achieved with Human Settlements is: Facilitate the acquisition of RDP housing units.

The following strategic objective and strategies have been identified:

Strategic Objective	Short Term Strategies	Medium Term Strategies	Long Term Strategies (5 Yrs. +)	KPI	Annual Target (2023/24)
Development of Housing Chapter	<ul style="list-style-type: none"> Facilitate housing development in line with spatial planning and transportation system 	<ul style="list-style-type: none"> Facilitate housing development in line with spatial planning and transportation system 	<ul style="list-style-type: none"> Facilitate housing development in line with spatial planning and 	<ul style="list-style-type: none"> Number of Housing Chapter developed 	<ul style="list-style-type: none"> 1

Strategic Objective	Short Term Strategies	Medium Term Strategies	Long Term Strategies (5 Yrs. +)	KPI	Annual Target (2023/24)
			transportation system		

4.5.1.4 GEOGRAPHIC INFORMATION SYSTEM (GIS)

The identified outcome to be achieved with GIS is: an effective GIS system. This means utilisation of the municipal GIS to guide planning and decision making. In order to measure the contribution and progress made in achieving the above-mentioned outcome, the following indicator and 5 year targets have been identified:

The following strategic objective and strategies have been identified:

Strategic Objective	Short Term Strategies	Medium Term Strategies	Long Term Strategies (5 Yrs. +)	KPI	Annual Target (2023/24)
To achieve integrated planning	<ul style="list-style-type: none"> Develop GIS Policy 	<ul style="list-style-type: none"> Update GIS database 	<ul style="list-style-type: none"> Update GIS database Review GIS Policy and update annually 	<ul style="list-style-type: none"> Number of GIS Policy reviewed 	1

4.5.2 KPA2: SERVICE DELIVERY

4.5.2.1 ELECTRICAL NETWORK (NEW INFRASTRUCTURE)

The identified outcome to be achieved with Electrical Network (New Infrastructure) is: To provide access to electricity. This means to have an electrical network that can supply sustainable electricity to the whole municipal area.

The following strategic objectives and strategies have been identified:

Strategic Objective	Short Term Strategies	Medium Term Strategies	Long Term Strategies (5 Yrs. +)	KPI	Annual Target (2023/24)
Providing sustainable Electrical services in line with NERSA guidelines	<ul style="list-style-type: none"> Review electrical master plan to be inline with declining demand Upgrading of Substation to improve on safety and sustainable supply of electricity 	<ul style="list-style-type: none"> Implementation of master plans and maintenance plan Upgrade Substations Replace minisubs 	<ul style="list-style-type: none"> Implementation of master plans and maintenance plan 	<ul style="list-style-type: none"> Number of electrical master plan reviewed Number of substation upgraded and minibus replaced Number of old underground electrical Cables 	<p>1</p> <p>4</p> <p>3,5km of Main Cables</p>

Strategic Objective	Short Term Strategies	Medium Term Strategies	Long Term Strategies (5 Yrs. +)	KPI	Annual Target (2023/24)
				replaced (Main Cables 7km)	
	<ul style="list-style-type: none"> Ensure that all households have access to electricity 	<ul style="list-style-type: none"> Ensure that all households have access to electricity 	<ul style="list-style-type: none"> Ensure that all households have access to electricity 	<ul style="list-style-type: none"> Number of households electrified 	500

4.5.2.2 ELECTRICAL NETWORK (ELECTRICITY LOSSES)

The identified outcome to be achieved with Electrical Network (Electricity – Maintenance and Upgrading) is: Sustainable electricity supply. This means firm electricity supply to all customers and to minimise losses.

The following strategic objectives and strategies have been identified:

Strategic Objective	Short Term Strategies	Medium Term Strategies	Long Term Strategies (5 Yrs. +)	KPI	Annual Target (2023/24)
To reduce electricity losses	<ul style="list-style-type: none"> Auditing of all customers Installation of latest electricity technology meters 	<ul style="list-style-type: none"> Auditing of all customers 	<ul style="list-style-type: none"> Auditing of all customers 	Percentage on reduction of electricity losses	1%

4.5.2.3 ROADS AND STORM WATER –MAINTENANCE AND UPGRADING

The identified outcome to be achieved with Roads and Storm water – New Infrastructure is: Improved quality of road surfaces. This means having well maintained public roads for safe transport.

The following strategic objectives and strategies have been identified:

Strategic Objective	Short Term Strategies	Medium Term Strategies	Long Term Strategies (5 Yrs. +)	KPI	Annual Target (2023/24)
Providing sustainable Roads Infrastructure	<ul style="list-style-type: none"> Implement Road Maintenance and Master Plan Providing a fully designated team for unblocking of storm water drainage pipes 	<ul style="list-style-type: none"> Implementation of Rods Maintenance and Master Plan 	<ul style="list-style-type: none"> Implementation of Rods Maintenance and Master Plan 	<ul style="list-style-type: none"> Number of km of road upgraded from gravel to tar. Number of cleared blocked storm water drainage 	<ul style="list-style-type: none"> 1km 20

4.5.2.4 ROADS AND STORM WATER – NEW INFRASTRUCTURE

The identified outcome to be achieved with Roads and Storm water – Sustainable roads network. This means to keep our roads and storm water assets in good state. The following strategic objectives and strategies have been identified:

Strategic Objective	Short Term Strategies	Medium Term Strategies	Long Term Strategies (5 Yrs. +)	KPI	Annual Target (2023/24)
Provide Quality New Infrastructure	<ul style="list-style-type: none"> Review and approve Roads and Storm water master Plan 	<ul style="list-style-type: none"> Implement the roads and storm water master plan 	<ul style="list-style-type: none"> Implement the roads and storm water master plan 	<ul style="list-style-type: none"> Number of Storm Water Master Plan reviewed 	<ul style="list-style-type: none"> 1

Strategic Objective	Short Term Strategies	Medium Term Strategies	Long Term Strategies (5 Yrs. +)	KPI	Annual Target (2023/24)
	<ul style="list-style-type: none"> Kilometres of Paved Internal Streets Rehabilitated (254km of paved Roads) 			Number of Paved Internal Street rehabilitated	<ul style="list-style-type: none"> 1km

4.5.2.5 WATER AND SANITATION SERVICES

Strategic Objective	Short Term Strategies	Medium Term Strategies	Long Term Strategies (5 Yrs. +)	KPI	Annual Target (2023/24)
Water and sanitation services- To provide sufficient water to all wards	<ul style="list-style-type: none"> Maintenance of water and sanitation infrastructure Functional water leak detection system 	<ul style="list-style-type: none"> Maintenance of water and sanitation infrastructure 	<ul style="list-style-type: none"> Maintenance of water and sanitation infrastructure 	<ul style="list-style-type: none"> To review water and sanitation by-law 	<ul style="list-style-type: none"> 1 20% reduction in water losses

GOAL: PROTECT THE ENVIRONMENT AND IMPROVE COMMUNITY WELL-BEING

4.5.3 POUNDS

The identified outcome to be achieved with Pounds is: Improved road safety.

The following strategic objectives and strategies have been identified:

Strategic Objective	Short Term Strategies	Medium Term Strategies	Long Term Strategies (5 Yrs. +)	KPI	Annual Target (2023/24)
	Gravelotte landfill sites	Gravelotte landfill sites	Gravelotte landfill sites		
	<ul style="list-style-type: none"> Review the Integrated Waste Management Plan 	<ul style="list-style-type: none"> Implement and report on Waste Management Plan 	<ul style="list-style-type: none"> 	<ul style="list-style-type: none"> Number of Integrated Waste Management Plan reviewed 	1
	<ul style="list-style-type: none"> Combat illegal dumping by obtaining and supplying additional skips for hot spots and rural areas as well as a skip transport truck for extended distances. 	<ul style="list-style-type: none"> Combat illegal dumping by obtaining and supplying additional skips for hot spots and rural areas as well as a skip transport truck for extended distances. 	<ul style="list-style-type: none"> Combat illegal dumping by obtaining and supplying additional skips for hot spots and rural areas as well as a skip transport truck for extended distances. 	<ul style="list-style-type: none"> Number of cleaning awareness Conducted 	4
	Once-per-month-collection waste collection service Majeje , Humulani and Matiko-Xikaya (Extension of waste collection in rural areas)	Once-per-month-collection waste collection service Majeje , Humulani and Matiko-Xikaya (Extension of waste collection in rural areas)	Once-per-month-collection waste collection service Majeje , Humulani and Matiko-Xikaya (Extension of waste collection in rural areas)	<ul style="list-style-type: none"> Number of villages with aces to waste removal once per month 	12

4.5.3.2 PARKS

The identified **outcome** to be achieved with Parks is: Safe, clean and sustainable green environment. This means to protect the sensitive bio-diverse ecosystems in within the Ba-Phalaborwa municipal area, provide well maintained parks for beautification of Ba-Phalaborwa municipal area and improve community well-being.

The following strategic objectives and strategies have been identified:

Strategic Objective	Short Term Strategies	Medium Term Strategies	Long Term Strategies (5 Yrs. +)	KPI	Annual Target (2023/24)
To develop and maintain parks, gardens and open space	Facilitate implementation of fencing Wildevy Park and Buffalo Park	Implement the plans	Development of parks and recreation areas	<ul style="list-style-type: none"> Number of Parks and recreation developed (Designs) 	2
	<ul style="list-style-type: none"> Maintenance of developed parks (Wildevy park, Buffalo park and Phalaborwa fourway) 	Maintenance of developed parks (Wildevy park, Buffalo park and Phalaborwa fourway)	<ul style="list-style-type: none"> Maintenance of developed parks (Wildevy park, Buffalo park and Phalaborwa fourway) 	<ul style="list-style-type: none"> Number of parks maintained 	3
	<ul style="list-style-type: none"> Maintenance of developed stadiums (impala park stadium, Lulekani stadium) 	Maintenance of developed stadiums (impala park stadium, Lulekani stadium)	<ul style="list-style-type: none"> Maintenance of developed stadiums (impala park stadium, Lulekani stadium) 	<ul style="list-style-type: none"> Number of Stadiums maintained 	2

4.5.3.3 CEMETERIES

The identified outcome to be achieved with coordination of Cemeteries is: provision of Municipal Cemeteries and Burial services. This means maintaining cemeteries and facilitating private/tribal cemeteries to ensure a healthy environment as well as to ensure that burials are done in dignified manner.

The following strategic objectives and strategies have been identified:

Strategic Objective	Short Term Strategies	Medium Term Strategies	Long Term Strategies (5 Yrs. +)	KPI	Annual Target (2023/24)
Manage and maintain municipal cemeteries to international standards	<ul style="list-style-type: none"> Develop pauper's burial policy. Review and implement exhumation and reburial policy, public parks by law, open spaces by-law and cemetery by law 	-Implementation of the policies and by-laws	- Implementation of the policies and by-laws	<ul style="list-style-type: none"> Number of reports on maintenance of cemeteries Number of Paupers Burial Policy developed 	<p>4</p> <p>1</p>
	<ul style="list-style-type: none"> Maintenance of Gravelotte, Phalaborwa, Lulekani and Namakgale cemeteries 	<ul style="list-style-type: none"> Maintenance of Gravelotte, Phalaborwa, Lulekani and Namakgale cemeteries 	<ul style="list-style-type: none"> Maintenance of Gravelotte, Phalaborwa, Lulekani and Namakgale cemeteries 	<ul style="list-style-type: none"> Number of cemeteries maintained 	4

4.5.3.4 DISASTER MANAGEMENT

The identified outcome to be achieved with coordination of Disaster Management is: Safe environment. This means to ensure that property and community members are living in a safe environment and that disaster relief is provided within 24 hours after disaster incidents.

The following strategic objectives and strategies have been identified:

Strategic Objective	Short Term Strategies	Medium Term Strategies	Long Term Strategies (5 Yrs. +)	KPI	Annu(2023/24)al Target (2023/24)
To provide awareness campaigns to the community on disaster and response after disaster incident	<ul style="list-style-type: none"> Disaster Awareness Campaigns Establishment of Local Disaster Advisory Forum Annual review of Disaster Management Plan 	<ul style="list-style-type: none"> Disaster Awareness Campaigns Establishment of Local Disaster Advisory Forum Annual review of Disaster Management Plan 	<ul style="list-style-type: none"> Disaster Awareness Campaigns Establishment of Local Disaster Advisory Forum Annual review of Disaster Management Plan 	<ul style="list-style-type: none"> Number of Disaster awareness campaigns conducted Number of disaster management plan reviewed 	4 Campaigns 1
				<ul style="list-style-type: none"> Number of Local Disaster Forum established Number of Local Disaster Forum meetings held 	1 4

4.5.3.5 LIBRARY SERVICES

The identified outcome to be achieved with Library Services is: Access to information. This means promoting reading and learning through provision of access to information sources.

The following strategic objectives and strategies have been identified:

Strategic Objective	Short Term Strategies	Medium Term Strategies	Long Term Strategies (5 Yrs. +)
Ensure and manage an operational, functional and fully equipped Library facility to within at least a 5km radius from any urban or rural residential area	<ul style="list-style-type: none"> Facilitate the review of the current SLA by DSAC Facilitate the installation of alternative energy stand by generator at Selwane Review Library service development plan Enhance Library stakeholder relations 	<ul style="list-style-type: none"> Improve access to libraries to within a 5km radius 	<ul style="list-style-type: none"> Improve access to libraries to within a 5km radius

4.5.3.6 ARTS AND CULTURE

The identified outcome to be achieved with Arts and Culture: Retained culture heritage. South Africa has a rich and diverse cultural heritage and through the provision of arts and culture programmes, the culture heritage can be preserved for future generations.

The following strategic objectives and strategies have been identified:

Strategic Objective	Short Term Strategies	Medium Term Strategies	Long Term Strategies (5 Yrs. +)	KPI	Annual Target (2023/24)
To create a platform for local communities to participate in different professional sporting codes and to compete	<ul style="list-style-type: none"> Host professional sports, arts and culture activities hosted by the municipality 	Host professional sports, arts and culture activities hosted by the municipality	Host professional sports, arts and culture activities hosted by the municipality	<ul style="list-style-type: none"> Number of Sports , Arts and culture council meetings Number of Sports , Arts and culture convened 	<ul style="list-style-type: none"> 4 4

4.5.3.7 TRAFFIC SERVICES

The identified outcome to be achieved with Traffic Services is: Enhanced overall quality of road traffic service provision, in particular to ensure safety, security, order, discipline and mobility on the roads.

The following strategic objectives and strategies have been identified:

Strategic Objective	Short Term Strategies (0-2 Yrs.)	Medium Term Strategies (3-5 Yrs.)	Long Term Strategies (5 Yrs. +)
Ensure that Traffic enforcement has correct and sufficient equipment, systems, personnel and capacity to fulfil their mandate.	<ul style="list-style-type: none"> Establish and implement fully functional speed checking unit Improve Roads safety, enforcement and education Upgrade required system (AARTO) Review integrated Transport Plan Junior cycle tracks plan Establish temporary control room to share with council complaints Establish traffic vehicle pound 	<ul style="list-style-type: none"> Comply with pertinent SABS codes and legislated Pressurize (request) National to fast track the roll out of the National Computerized learners licence system to all authorities as soon as possible 	<ul style="list-style-type: none"> Pressurize (request) National to fast track the roll out of the National Computerized learners licence system to all authorities as soon as possible

4.5.3.8 REGISTRATION AND LICENSING SERVICES

The identified outcome to be achieved with Registration and Licensing Services is: Enhanced overall quality of road traffic service provision, in particular to ensure safety, security, order, discipline and mobility on the roads

The following strategic objectives and strategies have been identified:

Strategic Objective	Short Term Strategies (0-2 Yrs.)	Medium Term Strategies (3-5 Yrs.)	Long Term Strategies (5 Yrs. +)
Maintain an “A” Grading on the drivers testing facility and Roadworthy centre in terms of legislation	Maintain an “A” Grading on the drivers testing facility and Roadworthy centre in terms of legislation	Maintain an “A” Grading on the drivers testing facility and Roadworthy centre in terms of legislation	Maintain an “A” Grading on the drivers testing facility and Roadworthy centre in terms of legislation

4.5.4 KPA 3: FINANCIAL VIABILITY

Details related to the above-mentioned programmes in terms of outcomes, strategic objectives and strategies follow:

4.5.4.1 IMPROVE FINANCIAL VIABILITY

The identified outcome to be achieved with Budget and Reporting is: Timeous preparation and submission of credible budgets. This means producing budget, financial statements and reports that are credible and in terms of legislative requirements.

The following strategic objectives and strategies have been identified:

Strategic Objective	Short Term Strategies	Medium Term Strategies	Long Term Strategies (5 Yrs. +)	KPI	Annual Target (2023/24)
	<ul style="list-style-type: none"> Revenue- Ensure disconnection are performed due to arrears in line with credit policy (water and electricity) 	<ul style="list-style-type: none"> Revenue- Ensure disconnection are performed due to arrears in line with credit policy (water and electricity) 	<ul style="list-style-type: none"> Revenue- Ensure disconnection are performed due to arrears in line with credit policy (water and electricity) 	<ul style="list-style-type: none"> Percentage of customers whose water supply is restricted due to arrears in line with Credit Control Policy Percentage of customers whose electricity supply is disconnected due to arrears (as per instruction or disconnection list) in line with Credit Control Policy 	<ul style="list-style-type: none"> 100%Customers restricted 100%

4.5.5 KPA 4: LOCAL ECONOMIC DEVELOPMENT

GOAL: GROWING ECONOMIC ENVIRONMENT

The National Development Plan aims for an economy that will create more jobs by:

- Realising an environment for sustainable employment and inclusive economic growth;
- Promoting employment in labour-absorbing industries;
- Raising exports and competitiveness;
- Strengthening government's capacity to give leadership to economic development; and
- Mobilising all sectors of society around a national vision.

The identified programmes that relate to this goal are:

- Job creation
- Marketing and branding
- SMMEs

Details related to the above-mentioned programmes in terms of outcomes and targets, strategic objectives, and strategies and output measurements follows:

4.5.5.1 JOB CREATION

The identified outcome to be achieved with Job Creation is: Alleviation of poverty. This means to facilitate, coordinate and monitor developmental programmes to ensure job creation within communities.

The following strategic objectives and strategies have been identified:

Strategic Objective	Short Term Strategies	Medium Term Strategies	Long Term Strategies (5 Yrs. +)	KPI	Annual Target (2023/24)
Create an enabling environment for sustainable job opportunities	<ul style="list-style-type: none"> Develop Economic Development Plan (LED Strategy) Register Business Regulation and Registered 	<ul style="list-style-type: none"> Implement LED Strategy Monitoring and Evaluating of Mining houses Social & Labour Plan 	<ul style="list-style-type: none"> Increase Economic growth opportunities 	<ul style="list-style-type: none"> Number of LED Strategy reviewed Number of Business Registered in line with LIBRA 	1

4.5.5.2 MARKETING AND BRANDING

The identified outcome to be achieved with Marketing and Branding is: Tourist destination of choice. This means to promote the municipal area and all its potential in order to attract tourists.

The following strategic objectives and strategies have been identified:

Strategic Objective	Short Term Strategies	Medium Term Strategies	Long Term Strategies (5 Yrs. +)	KPI	Annual Target (2023/24)
To increase tourism activates and generate economic growth	<ul style="list-style-type: none"> Develop 5-year Tourism Plan Conduct awareness, marketing and promotion of tourism benefits to all stakeholders 	<ul style="list-style-type: none"> Implement Tourism Plan Conduct awareness, marketing and promotion of tourism benefits to all stakeholders 	<ul style="list-style-type: none"> Implement Tourism Plan Conduct awareness, marketing and promotion of tourism benefits to all stakeholders 	<ul style="list-style-type: none"> Number of Tourism Plan developed Number of municipal tourist destination and promotion marketing initiatives undertaken by the municipality 	1 Tourism Plan developed 4 promotion marketing initiatives undertaken

4.5.5.3 SMMEs

The identified outcome to be achieved with SMMEs is: Capacitate SMME's. This means that the municipality must put programmes in place that will assist in the capacitation of SMMEs.

The following strategic objectives and strategies have been identified:

Strategic Objective	Short Term Strategies	Medium Term Strategies	Long Term Strategies (5 Yrs. +)	KPI	Annual Target (2023/24)
To train SMME's in managerial skills to ensure growth and sustainability	<ul style="list-style-type: none"> Ongoing training programmes Hosting of tourism Expo's Source fund donors to support SMME training Incorporate SMME component in the Supply Chain process and Capital Works Plan 	<ul style="list-style-type: none"> Ongoing training programmes Hosting of tourism Expo's Source fund donors to support SMME training Incorporate SMME component in the Supply Chain process and Capital Works Plan 	<ul style="list-style-type: none"> Ongoing training programmes 	<ul style="list-style-type: none"> Number of SMME and Corporative trained 	20 SMME and Corporative

4.5.6 KPA 5: TRANSFORMATION AND ORGANISATIONAL DEVELOPMENT

GOAL: SKILLED, COMPETENT AND INNOVATIVE WORKFORCE

The ultimate outcome to be achieved through this goal is: High performing organisation. This means to leverage the Ba-Phalaborwa's staff capacity to drive efficiency and effectiveness.

The identified programmes that relate to this goal are:

- Human Resource Management;
- Labour Relations;
- Occupational Health and Safety;
- Employee Wellness; and
- Training and Development.

Details related to the above-mentioned programmes in terms of outcomes and targets, strategic objectives, and strategies and output measurements follow:

4.5.6.1 HUMAN RESOURCE MANAGEMENT

The identified outcome to be achieved with Human Resource Management is: Effective and efficient human resource management function. This means recruitment, appointment and retention of competent staff

The following strategic objectives and strategies have been identified:

Strategic Objective	Short Term Strategies	Medium Term Strategies	Long Term Strategies (5 Yrs. +)	KPI	Annual Target (2023/24)
To recruit, retain competent employees and provide accurate and comprehensive	<ul style="list-style-type: none"> • Recruit and fill approved exited positions • Filling of all vacancies as per approved 	<ul style="list-style-type: none"> • Recruit and fill approved exited positions • Implementation of the retention strategy 	<ul style="list-style-type: none"> • Recruit and fill approved exited positions 	<ul style="list-style-type: none"> • Number of prioritised vacant positions to be filled 	<ul style="list-style-type: none"> • 55 vacant positions filled

Strategic Objective	Short Term Strategies	Medium Term Strategies	Long Term Strategies (5 Yrs. +)	KPI	Annual Target (2023/24)
HR administrative function	<ul style="list-style-type: none"> Implementation of the retention strategy 		<ul style="list-style-type: none"> Implementation of the retention strategy 		

4.5.6.2 LABOUR RELATIONS

The identified outcome to be achieved with Labour Relations is: Sound labour relations. This means employees that are satisfied with their working environment, adheres to policies and procedures and have sound working relations.

The following strategic objectives and strategies have been identified:

Strategic Objective	Short Term Strategies	Medium Term Strategies	Long Term Strategies (5 Yrs. +)	KPI	Annual Target (2023/24)
To ensure sound and fair labour practices are followed within the municipality	<ul style="list-style-type: none"> Coordinate meetings in terms of the Corporate diary (LLF) Employees trained and conversant with collective agreements and policies 	<ul style="list-style-type: none"> Coordinate meetings in terms of the Corporate diary (LLF) 	<ul style="list-style-type: none"> Coordinate meetings in terms of the Corporate diary (LLF) 	<ul style="list-style-type: none"> Number of Local Labour Forum meetings held 	11 LLF meetings held

4.5.6.3 WORKPLACE HEALTH AND SAFETY

The identified outcome to be achieved with Workplace Health and Safety is: Safe and healthy working environment. This means providing and managing the health and safety within the municipal operations.

The following strategic objectives and strategies have been identified:

Strategic Objective	Short Term Strategies	Medium Term Strategies	Long Term Strategies (5 Yrs. +)	KPI	Annual Target (2023/24)
To promote healthy, safe and legislative compliant working environment and healthy, active and productive employee	<ul style="list-style-type: none"> Create awareness and ensure safe and healthy working environment is maintained. 	<ul style="list-style-type: none"> Create awareness and ensure safe and healthy working environment is maintained. 	<ul style="list-style-type: none"> Create awareness and ensure safe and healthy working environment is maintained. 	<ul style="list-style-type: none"> Reduction of number of incidents 	<ul style="list-style-type: none"> 4 quarterly

4.5.6.4 EMPLOYEE WELLNESS

The identified outcome to be achieved with Employee wellness is: Healthy employees. This means promoting and managing employee health and satisfaction within the municipality.

The following strategic objectives and strategies have been identified:

Strategic Objective	Short Term Strategies	Medium Term Strategies	Long Term Strategies (5 Yrs. +)
Develop and implement a holistic wellness employee program incorporating all aspects of employee health and creation of enabling working environment	<ul style="list-style-type: none"> Develop employee wellness plan 	<ul style="list-style-type: none"> Review of wellness strategy/plan 	<ul style="list-style-type: none"> Review of wellness strategy/plan

4.5.6.5 TRAINING AND DEVELOPMENT

The identified outcome to be achieved with Training and Development is: Competent, skilled and productive workforce. This means to have a workforce that is well trained and skilled to perform their tasks optimally.

The following strategic objectives and strategies have been identified:

Strategic Objective	Short Term Strategies	Medium Term Strategies	Long Term Strategies (5 Yrs. +)	KPI	Annual Target (2023/24)
To implement the Workplace Skills plan in addressing the skills gaps	<ul style="list-style-type: none"> Conduct and review skills audit to identify skills gaps Develop a Workplace Skills Plan and an Annual Training Report and submit to LGSETA Implement the Workplace Skills Plan 	<ul style="list-style-type: none"> Conduct and review skills audit to identify skills gaps Develop a Workplace Skills Plan and an Annual Training Report and submit to LGSETA Implement the Workplace Skills Plan 	<ul style="list-style-type: none"> Conduct and review skills audit to identify skills gaps Develop a Workplace Skills Plan and an Annual Training Report and submit to LGSETA Implement the Workplace Skills Plan 	<ul style="list-style-type: none"> % of budget spent on the trainings conducted as per skills development plan 	<ul style="list-style-type: none"> 100% of budget spent on the trainings

4.5.7 KPA 6: GOOD GOVERNANCE AND PUBLIC PARTICIPATION

GOAL: GOOD CORPORATE GOVERNANCE AND PUBLIC PARTICIPATION

The ultimate outcome to be achieved through this goal is: Clean audit, informed communities and structured development / reduced legal fees. This means to be an organisation that practices responsible, accountable, effective and efficient corporate governance through political buy-in and oversight to ensure that sound administrative systems, processes and procedures are implemented within the municipality. Traditional leaders, communities and stakeholders are continuously involved and engaged through all planning, monitoring and reporting processes within the municipality

The identified programmes that relate to this goal are:

- Internal Audit
- Audit Committee
- Municipal Public Accounts Committee
- Risk Management
- Performance Management
- Integrated Development Planning (IDP)
- Governance and Administration
- Records and Archiving
- Labour Relations
- Legal
- Information Communication Technology (ICT)
- Communication
- Public Participation
- Ward Committees

Details related to the above-mentioned programmes in terms of outcomes and targets, strategic objectives, and strategies and output measurements follow:

4.5.7.1 INTERNAL AUDIT

The identified outcome to be achieved with Internal Audit is: Minimise audit findings (Clean Audit). This means to minimise audit findings against the municipality.

The following strategic objectives and strategies have been identified:

Strategic Objective	Short Term Strategies	Medium Term Strategies	Long Term Strategies (5 Yrs. +)	KPI	Annual Target (2023/24)
Provide assurance and consulting services to the ensure that the Municipality achieve its objectives	<ul style="list-style-type: none"> Implementation of Internal Audit Plan Review Internal Audit Charter Implement of internal audit recommendation Convene Audit Steering Committee meeting Reduction of internal controls 	<ul style="list-style-type: none"> Implementation of Internal Audit Plan Review Internal Audit Charter Implement of internal audit recommendation Convene Audit Steering Committee meeting Reduction of internal controls 	<ul style="list-style-type: none"> Implementation of Internal Audit Plan Review Internal Audit Charter Implement of internal audit recommendation Convene Audit Steering Committee meeting Reduction of internal controls 	<ul style="list-style-type: none"> Percentage on implementation of Internal Audit Plan Number of Audit Steering Committee 	<ul style="list-style-type: none"> 100%

4.5.7.2 AUDIT COMMITTEE

The identified outcome to be achieved with Audit Committee is: Functional Audit Committee. This means for the Audit Committee to perform their oversight role as required by law.

The following strategic objectives and strategies have been identified:

Strategic Objective	Short Term Strategies	Medium Term Strategies	Long Term Strategies (5 Yrs. +)	KPI	Annual Target (2023/24)
Advise Council and management on governance and finance	<ul style="list-style-type: none"> Audit Committee reports to Council Audit Committee meetings Evaluation of Audit Committee performance Review of Audit Committee Charter 	<ul style="list-style-type: none"> Audit Committee reports to Council Audit Committee meetings Evaluation of Audit Committee performance Review of Audit Committee Charter 	<ul style="list-style-type: none"> Audit Committee reports to Council Audit Committee meetings Evaluation of Audit Committee performance Review of Audit Committee Charter 	<ul style="list-style-type: none"> Number of reports to Council by Audit Committee Deadline for Evaluation of Audit Committee Performance 	<ul style="list-style-type: none"> 4 reports to Council by Audit

4.5.7.3 MUNICIPAL PUBLIC ACCOUNTS COMMITTEE (MPAC)

The identified outcome to be achieved with MPAC is: Effective oversight on Council's mandate. This means for the MPAC to perform their oversight role on legislative compliance.

The following strategic objectives and strategies have been identified:

Strategic Objective	Short Term Strategies	Medium Term Strategies	Long Term Strategies (5 Yrs. +)	KPI	Annual Target (2023/24)
To provide oversight on legislative compliance for improved and sound governance practices	<ul style="list-style-type: none"> Hold MPAC Strategic Planning Sessions Capacitate and train newly elected MPAC members 	<ul style="list-style-type: none"> Hold MPAC Strategic Planning Sessions Review and implement MPAC terms of reference 	<ul style="list-style-type: none"> Hold MPAC Strategic Planning Sessions Review and implement MPAC terms of reference 	<ul style="list-style-type: none"> Number of report submitted to council on quarterly basis Number of public hearing conducted 	<ul style="list-style-type: none"> 4 report submitted to council on 4 public hearing conducted

Strategic Objective	Short Term Strategies	Medium Term Strategies	Long Term Strategies (5 Yrs. +)	KPI	Annual Target (2023/24)
	<ul style="list-style-type: none"> Review and implement MPAC terms of reference Review and implementation of process plan Conduct public hearings 	<ul style="list-style-type: none"> Review and implementation of process plan Conduct public hearings 	<ul style="list-style-type: none"> Review and implementation of process plan Conduct public hearings 		<ul style="list-style-type: none"> 2

4.5.7.4 RISK MANAGEMENT

The identified outcome to be achieved with Risk Management is: Management of all institutional risks. This means to mitigate of all identified risks.

The following strategic objectives and strategies have been identified:

Strategic Objective	Short Term Strategies	Medium Term Strategies	Long Term Strategies (5 Yrs. +)	KPI	Annual Target (2023/24)
To provide a system of identifying, assessing and mitigating all risks within the institution	<ul style="list-style-type: none"> Develop and review strategic risk register Establish risk management committee Develop and review risk management policies 	<ul style="list-style-type: none"> Convene Risk management committee meetings Conduct risk assessment Review risk management register 	<ul style="list-style-type: none"> Convene Risk management committee meetings Conduct risk assessment Review risk management register 	<ul style="list-style-type: none"> Number of quarterly risk management committee meetings convened Annual review of strategic risk register Number of risk management governance policies reviewed 	<ul style="list-style-type: none"> 4 quarterly risk management committee meetings convened 4 9 Policies

4.5.7.5 PERFORMANCE MANAGEMENT

The identified outcome to be achieved with Performance Management is: Optimum service delivery and administrative governance. This means credible planning, monitoring, reporting and evaluation to achieve clean performance audit opinions as well as optimal service delivery to communities

The following strategic objectives and strategies have been identified:

Strategic Objective	Short Term Strategies	Medium Term Strategies	Long Term Strategies (5 Yrs. +)	KPI	Annual Target (2023/24)
To monitor and evaluate performance to ensure the effective and efficient implementation of the strategic intent of the organisation	<ul style="list-style-type: none"> Accountability of all Senior Managers and Managers Monthly review of progress Implement Automated Performance Management System 	<ul style="list-style-type: none"> Accountability of all Senior Managers and Managers Monthly review of progress 	<ul style="list-style-type: none"> Accountability of all Senior Managers and Managers Monthly review of progress 	<ul style="list-style-type: none"> Compliance to PMS regulations 	<ul style="list-style-type: none"> 100% (SDBIP, Performance Contracts, review PMS policy, quarterly reports)

4.5.7.6 INTEGRATED DEVELOPMENT PLANNING (IDP)

The identified outcome to be achieved with the Integrated Development Planning is: Credible IDP. This means that all the IDP processes are followed according to the process plan and an aligned IDP, Budget and Performance Management System

The following strategic objectives and strategies have been identified:

Strategic Objective	Short Term Strategies	Medium Term Strategies	Long Term Strategies (5 Yrs. +)	KPI	Annual Target (2023/24)
To ensure that Council approve and annually review an IDP for the municipality	<ul style="list-style-type: none"> Convene IDP meetings in line with the IDP process plan Prepare Draft IDP and submit to council for approval as per legislation. Prepare Final IDP and submit to council for approval as per legislation 	<ul style="list-style-type: none"> Convene IDP meetings in line with the IDP process plan Prepare Draft IDP and submit to council for approval as per legislation. Prepare Final IDP and submit to council for approval as per legislation 	<ul style="list-style-type: none"> Convene IDP meetings in line with the IDP process plan Prepare Draft IDP and submit to council for approval as per legislation. Implementation of paperless Council documentation 	<ul style="list-style-type: none"> Number of corporate calendar developed 	<ul style="list-style-type: none"> 1

4.5.7.8 RECORDS AND ARCHIVING

The identified outcome to be achieved with Records and Archives is: Safe and accessible municipal records. This means well stored, collated and archived municipal records and data.

The following strategic objectives and strategies have been identified:

Strategic Objective	Short Term Strategies	Medium Term Strategies	Long Term Strategies (5 Yrs. +)
To provide efficient and effective records and archive management services to comply with the National Archive and Records Act	<ul style="list-style-type: none"> Implementation of electronic document management system Implement training program to capacitate employees Implementation of EDMS 	<ul style="list-style-type: none"> Maintaining functionality of EDMS 	<ul style="list-style-type: none"> Maintaining functionality of EDMS

4.5.7.9 LEGAL SERVICES

The identified outcome to be achieved with Legal Services is: Minimisation of litigations. This means to ensure that adequate legal advice is provided to reduce litigations against the municipality.

The following strategic objectives and strategies have been identified:

Strategic Objective	Short Term Strategies	Medium Term Strategies	Long Term Strategies (5 Yrs. +)	KPI	Annual Target (2023/24)
<ul style="list-style-type: none"> To provide informed legal advice to end-user departments and council within a week To ensure that the municipality is safeguarded in contracts entered into with service providers To ensure general compliance with legislation 	<ul style="list-style-type: none"> Ensure cases are resolved at dispute resolution level before litigation Ensure cases are settled out of court Contracts and SLA developed as per request by SCM within 21 days of issuing appointment letter Compliance with legislation in order to reduce expenses related. 	<ul style="list-style-type: none"> Ensure cases are resolved at dispute resolution level before litigation Ensure cases are settled out of court Contracts and SLA developed as per request by SCM within 21 days of issuing appointment letter Compliance with legislation in order to reduce expenses related 	<ul style="list-style-type: none"> Ensure cases are resolved at dispute resolution level before litigation Ensure cases are settled out of court Contracts and SLA developed as per request by SCM within 21 days of issuing appointment letter Compliance with legislation in order to reduce expenses related. 	<ul style="list-style-type: none"> Number of Contracts and SLA developed as per request by SCM within 21 days of issuing appointment letter Percentage on legal advice provided within two weeks of on submitted policies Percentage of cases settled out of court 	<ul style="list-style-type: none"> 21 days after issuing appointment letter

4.5.7.10 IT AND SUPPORT

The identified outcome to be achieved with IT and Support is: Reliable and effective ICT infrastructure. This means the rendering of ICT services to the entire municipality and putting IT systems and equipment in place to make interpreting voluminous data user-friendly and enhance long-term organisational stability.

The following strategic objectives and strategies have been identified:

Strategic Objective	Short Term Strategies	Medium Term Strategies	Long Term Strategies (5 Yrs. +)
To ensure reliable and effective ICT infrastructure and systems support for municipal services	<ul style="list-style-type: none"> Implementation of ICT Disaster Recovery Plan Upgrade municipal ICT infrastructure 	<ul style="list-style-type: none"> Implementation of ICT Disaster Recovery Plan Upgrade municipal ICT infrastructure 	<ul style="list-style-type: none"> Implementation of ICT Disaster Recovery Plan Upgrade municipal ICT infrastructure

4.5.7.11 COMMUNICATION

The identified outcome to be achieved with Communication is: Informed community. This means to keep communities, stakeholders and employees informed about municipal activities through proactive and instant communication.

The following strategic objectives and strategies have been identified:

Strategic Objective	Short Term Strategies	Medium Term Strategies	Long Term Strategies (5 Yrs. +)	KPI	Annual Target (2023/24)
To create a platform where the municipality engages and	<ul style="list-style-type: none"> Review the communication strategy/policy 	<ul style="list-style-type: none"> Review the communication strategy/policy 	<ul style="list-style-type: none"> Review the communication strategy/policy 	<ul style="list-style-type: none"> Percentage on the information submitted to be 	<ul style="list-style-type: none"> 100%

Strategic Objective	Short Term Strategies	Medium Term Strategies	Long Term Strategies (5 Yrs. +)	KPI	Annual Target (2023/24)
effectively communicate with the community	<ul style="list-style-type: none"> • Ensure communication through newsletters • Local communication forum meetings • Ensure communication through social media platforms • Engage stakeholders through Imbizo and public participation. • Turnaround time for publishing documents on municipal website (1 day) 	•	•	<p>published on municipal website as per checklist compliance</p> <ul style="list-style-type: none"> • Number of quarterly local communication forum meetings held • Turnaround time for submitting received documents to IT for publishing on website as per Legislative checklist 	<ul style="list-style-type: none"> • 4 Local Communication forum meetings • 1 day

4.5.7.12 PUBLIC PARTICIPATION

The identified outcome to be achieved with Public Participation is: Informed and involved communities. This means to promote participatory decision making and to ensure that stakeholders and communities are involved in these processes.

The following strategic objectives and strategies have been identified:

Strategic Objective	Short Term Strategies	Medium Term Strategies	Long Term Strategies (5 Yrs. +)	KPI	Annual Target (2023/24)
To disseminate information to communities regarding municipal programmes and projects	<ul style="list-style-type: none"> Effectively handle customer complaints - ensure it is incorporated into the Batho Pele Reports Ensure that stakeholders are invited to participate on municipal events 	<ul style="list-style-type: none"> Effectively handle customer complaints - ensure it is incorporated into the Batho Pele Reports Ensure that stakeholders are invited to participate on municipal events 	<ul style="list-style-type: none"> Effectively handle customer complaints - ensure it is incorporated into the Batho Pele Reports Ensure that stakeholders are invited to participate on municipal events 	<ul style="list-style-type: none"> Percentage on compliance resolved Number of public participation and Imbizo held 	<ul style="list-style-type: none"> 100% 4 Public participation meetings

4.5.7.13 WARD COMMITTEES

The identified outcome to be achieved with Ward Committees is: Functional ward committees. This means fully functional ward committees that meet quarterly in order to promote community involvement in decision making processes.

The following strategic objectives and strategies have been identified:

Strategic Objective	Short Term Strategies	Medium Term Strategies	Long Term Strategies (5 Yrs. +)	KPI	Annual Target (2023/24)
To have fully functional ward committees at all times	<ul style="list-style-type: none"> Review and implementation of ward operational plans Implementation of establishment notice 	<ul style="list-style-type: none"> Review and implementation of ward operational plans Implementation of establishment notice 	<ul style="list-style-type: none"> Review and implementation of ward operational plans Implementation of establishment notice 	<ul style="list-style-type: none"> Number of consolidated reports of ward committee meetings convened 	<ul style="list-style-type: none"> 11 ward committee reports

4.5.7.14 SPECIAL PROGRAMMES

The identified outcome to be achieved with Special Projects is: Empowered disadvantaged groups. This means to achieve knowledgeable and capacitated disadvantaged groups. In order to measure the contribution and progress made in achieving the above-mentioned outcome, the following indicator and 5 year targets have been identified:

The following strategic objectives and strategies have been identified:

Strategic Objective	Short Term Strategies	Medium Term Strategies	Long Term Strategies (5 Yrs. +)	KPI	Annual Target (2023/24)
To achieve knowledgeable and capacitated disadvantaged groups	<ul style="list-style-type: none"> Develop database for all vulnerable groups and strengthen existing structures. Coordination of Disability, Youth, Elderly people and Local woman caucus forum. 	<ul style="list-style-type: none"> Develop database for all vulnerable groups and strengthen existing structures. 	<ul style="list-style-type: none"> Develop database for all vulnerable groups and strengthen 	<ul style="list-style-type: none"> Number of HIV/AIDS outreach programme conducted 	<ul style="list-style-type: none"> 16

Strategic Objective	Short Term Strategies	Medium Term Strategies	Long Term Strategies (5 Yrs. +)	KPI	Annual Target (2023/24)
	<ul style="list-style-type: none"> • Create awareness amongst community on their opportunities, especially on employment equity regarding people with disabilities. • Conduct awareness campaigns on substance abuse, HIV /AIDS safety, Leadership and Moral behaviour • Coordination Local HIV/ AIDS forums. • Coordination Local AIDS Council • Coordination Local Technical AIDS Committee • Creating mass opportunity for professional sports activities. • Coordination Local sports Council • Coordination Community sport confederation 	<ul style="list-style-type: none"> • Coordination of Disability, Youth, Elderly people and Local woman caucus forum. • 	<ul style="list-style-type: none"> existing structures. • Coordination of Disability, Youth, Elderly people and Local woman caucus forum. • 		

STRATEGIC ALIGNMENT

Ten strategic priority areas which are aligned to the Vision 2014 have been identified by national government within the MTSF 2014-2019 to create a platform for the future development of South Africa as a whole. Based on these priority areas, COGTA has identified their own priority areas that will guide national, local and provincial governance. The Limpopo Province has identified strategic objectives aligned to these priorities. Government has also implemented Outcomes Based Performance, and Outcome 9 deals specifically with Local Government. The latest document published is the Presidential Local Government Summit the Back-to-Basics programme that was developed to assist local government in service delivery. There are also the five Strategic Agenda Key Performance Areas to which municipalities' objectives and programmes must be aligned. Ba-Phalaborwa Local Municipality has developed their strategic objectives in line to the above mentioned strategies and priorities. Municipal programmes are translated to these objectives and subsequently to national and provincial strategic priorities and objectives.

The matrix below indicates the relation between the strategic objectives of Ba-Phalaborwa Local Municipality and the national and provincial priority areas:

Table 1: Strategic Alignment Matrix¹

Cluster	PERSPECTIVE	MTSF	COGTA	LEGDP (PGDS)	OUTCOME 9	STRATEGIC AGENDA KPA	NATIONAL DEVELOPMENT PLAN	Back-to-Basics	BA-PHALABORWA
Economic	Financial	1. Speed up economic growth and transform the economy to create decent work and sustainable livelihoods.		1. Ensuring more inclusive economic growth, decent work and sustainable livelihoods	3. Implement the community work programme and cooperatives supported	Local Economic Development	An economy that will create more jobs An inclusive and integrated rural economy		Growing economic environment

Cluster	PERSPECTIVE	MTSF	COGTA	LEGDP (PGDS)	OUTCOME 9	STRATEGIC AGENDA KPA	NATIONAL DEVELOPMENT PLAN	Back-to-Basics	BA-PHALABORWA
Social Infrastructure	Community Satisfaction	5. Improve the health profile of society	5. Fostering Development Partnerships, Social Cohesion and community mobilisation	4. Access to quality education		Basic Service Delivery	Improving the quality of education, training and innovation	Basic Services: Creating decent living conditions	Good corporate governance and public participation
Social Infrastructure	Community Satisfaction			5. Improved health care		Basic Service Delivery	Quality health care for all	Basic Services: Creating decent living conditions	Protected environment and enhanced community well-being
Social Infrastructure	Institutional	6. Intensify the fight against crime and corruption		6. Fighting crime and corruption		Good Governance and Public Participation	Fighting corruption	Good governance	Good corporate governance and public participation
Social Infrastructure	Community Satisfaction	7. Building of cohesive, caring and sustainable communities		8. Cohesive and sustained communities		Basic Service Delivery	An inclusive and integrated rural economy Transforming society and uniting the country	Basic Services: Creating decent living conditions	Protected environment and enhanced community well-being
Social Infrastructure	Community Satisfaction		3. Accelerating service delivery and supporting the vulnerable	3. Rural development, food security and land reform		Basic Service Delivery	An inclusive and integrated rural economy	Basic Services: Creating decent living conditions	Sustainable integrated infrastructure and services

Governance and Administration	Institutional Processes	6. Intensify the fight against crime and corruption		6. Fighting crime and corruption		Good Governance and Public Participation	Fighting corruption	Good governance	Good corporate governance and public participation
Governance and Administration	Institutional Processes	8. Pursuing African advancement and enhanced international cooperation		8. Creation of a better Africa and a better world			Reforming the public service	Good governance	Good corporate governance and public participation
Governance and Administration	Learning and Growth	4. Strengthening of skills and human resource base				Municipal Transformation and Organisational Development	Reforming the public service	Building capable institutions and administrations	Skilled, competent and innovative workforce

CHAPTER 5: PROJECTS PHASE

5.1. Introduction

Projects are identified through the following criteria:

- Needs identified by the community and councillors in their areas or wards.
- Municipal Departments and officials from their respective departmental plans, sector plans, specialist studies and maintenance programmes; and
- Strategic planning exercises might identify projects of strategic importance.

The municipality must ensure that projects are in line with the principles, objectives and strategies of the municipality. Due to limited financial and human resources, it is necessary that project proposals be prepared and prioritised in order to assist the municipality to ensure transparent and realistic distribution of resources between priority issues and routine expenditure. It is also necessary that the community is involved in the planning of projects to ensure that planned projects are in line with community needs to ensure that communities accept and own up to the adopted projects. Public participation is also necessary to avoid biasness towards particular communities and group formations. Public participation could be achieved through the IDP Representative Forum.

5.2 Sources of Funding

In order to fund its capital plan projects and perform its operational and maintenance activities, the Municipality relies on the sources of funding as indicated in the table below:

5.3 Municipal Projects Plan 2023/24

5.3.1 Capital Projects

KPA 2: Basic Services and Service Delivery

Cluster	Sector / KPA	Capital Projects												
		2023/24					2024/25			2025/26			2026/27	
		Project No.	Project	Project location	Cost (R'000)	Funding	Project	Cost (R'000)	Funding	Project	Cost (R'000)	Funding	Project	Project
		Tech01	Upgrading of road from gravel to tar: Tambo phase 2	Ward	5 680	Co-funding	Upgrading of road from gravel to tar: Tambo phase 2	5 680	BPM	Upgrading of road from gravel to tar: Tambo phase 2	5 680	BPM		
		DPD01	Establishment cemetery at Gravelotte (Ward 18)		1 000	BPM								
Total					6 680

6.1. LAND USE MANAGEMENT SCHEME OF BA-PHALABORWA (LUMS)

The Ba-Phalaborwa Local Municipality or its successor in title shall be the authority responsible for the enforcing and execution of the provisions of this land-use scheme.

Authority of Land-Use Scheme

This land-use scheme has been prepared in terms of the provisions of Section 18 of the Town Planning and Townships Ordinance, 1986 (Ordinance No. 15 of 1986), and will be the only land-use scheme for the municipal area.

Title of Land-Use Scheme

This scheme shall be known as the Ba-Phalaborwa Land-use Scheme, 2020.

Area of the Land-Use Scheme

The scheme incorporates the area of jurisdiction of the Ba-pahalaborwa Local Municipality, as proclaimed.

Purpose of the Land Use Scheme

Section 25 (1) of the Spatial Planning and Land Use Management Act, Act No. 16 of 2013 (Hereafter referred to as the Act) states that a land use scheme must give effect to and be consistent with the municipal spatial development framework and determine the use and development of land within the municipal area to which it relates in order to promote -

- a) economic growth;
- b) social inclusion;
- c) efficient land development; and
- d) minimal impact on public health, the environment and
- e) natural resources.

Section 25 (2) of the Act states that a land use scheme must include;

- (a) scheme regulations setting out the procedures and conditions relating to the use and development of land in any zone;
- (b) a map indicating the zoning of the municipal area into land use zones; and
- (c) a register of all amendments to such land use scheme.

The purpose of the Scheme as per Section 16 of the Spatial Planning and Land Use Management By-law of Ba-Phalaborwa Local Municipality, 2016, states that the Municipality must determine the use and development of land within the municipal area to which it relates in order to promote;

- a) harmonious and compatible land use patterns;
- b) aesthetic considerations;
- c) sustainable development and densification;
- d) the accommodation of cultural customs and practices of traditional communities in land use management; and
- e) a healthy environment that is not harmful to a person's health.

Components of the Land Use Scheme

The Scheme consist of the following main components:

- Scheme regulations setting out the procedures and conditions relating to the use and development of land in any zone;
- A scheme map indicating the zoning of the municipal area into land use zones;

- A register of all amendments to such land use scheme; and
- A register of all land use rights of all properties.

Application of the Scheme

This Scheme applies to all land within the jurisdiction of the municipal area, including all stateowned land.

This Scheme binds every owner and their successor-in-title and every user of land, including the State.

Status of the Scheme

- This Land Use Scheme is prepared in terms of the Spatial Planning and Land Use Management Act of 2013 and the Spatial Planning and Land Use Management By-law of Ba-Phalaborwa Local Municipality, 2016 and it replaces any other previous applicable schemes.
- The use of all land included in the area of this Land Use Scheme shall be controlled by the Land Use Scheme. No land or building may be used for any purposes other than that permitted in this Land Use Scheme, and its binding to all persons and the State.
- Nothing in this Scheme overrides a restrictive condition

Transitional Arrangements

Existing Land Use Rights:

- All existing, legal land use rights that were in effect on properties prior to the effective date are deemed to continue in full force and effect and are hereby incorporated into the Scheme.
- Should a mistake or oversight be made in the recording of an existing land use right, such mistake or oversight shall be rectified, on producing of proof of such existing land use right **by the land owner.**

6.2. Anti-Corruption Strategy (Adopted)

Purpose

The purpose of the document is to provide guidance to enable Ba-Phalaborwa Municipality to develop a fraud prevention strategy and to improve accountability, efficiency and effective administration within the municipality, including decision-making and management conduct which promotes integrity.

.

1.2 The objectives of this strategy could be summarized as follows:

- a) The primary objective of this strategy is to prevent fraudulent conduct before it occurs by encouraging a culture within the Ba-Phalaborwa Municipality where all employees, members of the public and other stakeholders continuously behave with and promote integrity in their dealings with, or on behalf of municipality.
- b) Development of anti-corruption capacity in the municipality;
- c) Improving the application of systems, policies, procedures and regulations in the municipality;

- d) Changing aspects that undermine the municipal integrity and facilitate unethical conduct, fraud and corruption and allow those to go unnoticed or unreported.

Statement of attitude to fraud

Ba-Phalaborwa Municipality requires all staff at all times to act honestly and with integrity and to safeguard the municipal resources for which they are responsible. The Municipality is committed to protecting all revenue, expenditure and assets from any attempt to gain illegal financial or other benefits.

Fraud represents a significant potential risk to the **Ba-Phalaborwa Municipality's** assets, service delivery efficiency and reputation. Ba-Phalaborwa Municipality will not tolerate corrupt or fraudulent activities, whether internal or external, and will vigorously pursue and prosecute any parties, by all legal means available, which engage in such practices or attempt to do so.

Consequently, any case will be thoroughly investigated and appropriate corrective action will be taken against anyone who is found guilty of corrupt conduct. This may include referral to the South Africa Police Services.

1.3 REGULATORY LEGISLATION

1The Public Service Anti-Corruption Strategy

During 1997, Government initiated a national anti-corruption campaign. This campaign progressed to a National Anti-corruption Summit held in April 1999 at which all sectors of society (public and private) committed themselves to establishing sectoral anti-corruption strategies. At the same time, they also committed to the co-responsibility for fighting corruption through the coordination of these sectoral strategies.

A range of other resolutions emanated from this Summit and all the sectors committed to implementing these. The Department of Public Service and Administration (DPSA) was instructed to forge various initiatives across the public service into a coherent strategy with the support of other Departments. A Public Service Task Team (PSTT) consisting of key Departments was convened for this task and representation from local government and public entities were included in order to establish a platform for the roll-out of the strategy to the whole of the Public Sector (Public Service, Local Government and Public Entities).

The Local Government Anti-Corruption Strategy

The strategy focuses mainly on the municipal organisation and looks at implementation of employee and councillor codes of conduct, and improved enforcement of applicable systems, policies and procedures. It prescribes the vetting of municipal employees, both existing and prospective, to ensure that they are not predisposed to corruption.

Local Government developed the Local Government Anti-Corruption Strategy (LGACS), which is modelled around the Public Service Anti-Corruption Strategy. The main principles upon which the LGACS is based are the following:

- Creating a culture within municipalities, which is intolerant to unethical conduct, fraud and corruption;
- Strengthening community participation in the fight against corruption in municipalities;

- Strengthening relationships, with key stakeholders, that are necessary to support the actions required to fight corruption in municipalities, for example, South African Local Government Association (SALGA), Employee Representative Unions, and Communities;
- Deterring and preventing of unethical conduct, fraud and corruption;
- Detecting and investigating unethical conduct, fraud and corruption;
- Taking appropriate action in the event of irregularities, for example, disciplinary action, recovery of losses, prosecution, etc; and
- Applying sanctions, which include redress in respect of financial losses.

Municipal Finance Management Act 56 of 2003

Section 112(1) stipulates that the Supply Chain Management Policy of a municipality must be fair, equitable, transparent, competitive and cost effective and comply with a prescribed regulatory framework for municipal supply chain management, which must cover at least the following:

(m) Measures for-

(i) Combating fraud, corruption, favoritisms and unfair and irregular practices in municipal supply chain management, and

(ii) Promoting ethics of officials and other role players involved in municipal supply chain management.

Criminal Procedure Amendment Act 65 of 2008.

To amend the Criminal Procedure Act, 1977, to provide for the postponement of certain criminal proceedings against an accused person in custody awaiting trial through audiovisual link; to further regulate the falling away of certain convictions as previous convictions after the expiry of a fixed period; to provide for the expungement of criminal records of certain persons in respect of whom certain sentences have been imposed after the compliance with certain requirements and the expiry of a fixed period; to provide for the expungement of certain criminal records of persons under legislation enacted before the Constitution of the Republic of South Africa, 1993, took effect; and to provide for matters connected therewith.

6.4. Local Economic Development Strategy

Purpose

The purpose of this document is to recommend strategic interventions to create integrated and sustainable communities for Ba-Phalaborwa Local Municipality where social well-being, economic development and the environment are in harmony. The strategy is aligned to NSDP and LEGDP

Localised strategic guidelines for local economic development adopted to inform specific LED strategies and employment generation strategies which have to be designed to address unemployment and lack of income sources. The strategic guidelines will also inform strategies and the design of project proposals in other fields, which may have an impact on local economic development. These may include issues such as labour-intensive means of construction and procurement approaches.

Motivation:

The achievement of IDP objectives is largely dependent on the local economic development (LED) strategy that needs to incorporate elements of local economic promotion.

Source documents for local economic guidelines:

- The Constitution of the Republic of South Africa – mandate to promote social and economic development;
- White paper on Local Government;
- Growth, Employment and Redistribution Programme (GEAR), and
- ASGISA (Accelerated and Shared Growth Initiative for South Africa).
- NSDP (National Spatial Development Perspective)
- LEGDP (Limpopo Employment Growth and Development)

Relevant guidelines / principles:

- Poverty alleviation through creation of employment opportunities by primarily utilizing local resources
- Introduction of LED support programmes through strategies
- Focal economic sectors for promotion;
- Basic principles of promotion;
- Major instruments of promotion;
- Major target groups and intended beneficiaries;
- Focal geographic areas.
- LED should aim at creating employment opportunities and redistribution of economic resources and opportunities for the benefit of all residents (thereby contributing to alleviation of poverty) through economic growth and development based primarily on local resources. Local government is supposed to play a crucial role in promoting LED.
- IDP is considered to be the tool to plan LED support programmes, assuming that some of the socio-economic needs (i.e. priority issues) will be best addressed through LED initiatives.
- IDP has to ensure proper consideration of LED objectives in other strategies and initiatives (e.g. infrastructure development);
- IDP should provide guidelines for the promotion of sector-specific or location-specific economic development initiatives (such as tourism development strategies) in the municipal area.

Application of principles:

The strategies for LED should incorporate the following elements:

- The vigorous identification and sourcing of resources, public and private, for LED enhancement (i.e. attraction of investment, lobbying for government allocations etc.);
- Consideration of employment creation possibilities for municipal projects; and
- The advancement of facilitation of development of local economic potential.

Key issues in the LED Strategy

The strategy provides baseline information on the current:

- Socio-economic situation
- Spatial development situation
- Infrastructure situation
- State of the environment
- Institutional capacity, and
- Development policy in the Municipality

It also projects future development scenarios and provides implementation plans for:

- Mining
- Tourism
- Agriculture
- Manufacturing
- Housing
- Entrepreneurship; and
- Social investments.

6.5. Summary of Ba-Phalaborwa Municipality SDF

Purpose and Scope

As a minimum legal requirement of the Municipal Systems Act (Act 32 of 2000), all Municipalities are required to prepare a Spatial Development Framework (SDF) as part of the Integrated Development Planning Process. The Spatial Development Framework for the Ba-Phalaborwa Local Municipality comprises of approximately 3001 km² that extends from Rubbervale in the West to Phalaborwa in the East and up to the Letaba River in the North and Grietjie in the South.

The Spatial Planning and Land Use Management Act, 2013 (Act 16 of 2013) was promulgated to provide a framework for spatial planning and land use management throughout the country. The Act provides an understanding into the relationship between spatial planning and land use management system including monitoring, coordination and review of spatial planning and land use management system at different spheres of government. 30 JULY 2019 8 The Act emphasizes the need to prepare spatial development framework and to ensure its linkage to land use management system. Unlike in the past when many municipalities prepared land use schemes which focused primarily on proclaimed towns, the new Act requires wall-to-wall land use schemes covering the entire municipal area of jurisdiction and this to be linked to and informed by spatial planning. The Act, further, provides guidelines regarding the content of spatial planning at three spheres of government. The Act also provides for the establishment of Municipal Planning Tribunals to determine and assess land use and land development applications for its area of jurisdiction. It further provides five key principles applicable to spatial planning and land use Management, namely:

- Spatial justice
- Spatial efficiency
- Resilience
- Spatial sustainability, and
- Good administration

These development principles must guide the preparation, adoption and implementation of any spatial development framework, policy or by-law concerning spatial planning and the development or use of land.

Implication of the development principles to the SDF

Principle of Spatial Justice

Past spatial and other development imbalances should be redressed through improved access to and use of land by disadvantaged communities and persons. This might imply:

- Identifying portions of land throughout the Ba-Phalaborwa Municipality for integration and development purpose;
- Identifying areas previously disadvantaged such as informal settlements for service delivery;
- Providing suitable and serviced land to disadvantaged communities and persons; and
- Ensuring security of tenure (formalization, tenure upgrading of R293 townships, new townships).

The Principle of Spatial Sustainability

This relates to the need to promote spatial planning and land use management and land development systems that are based on and promote the principles of socioeconomic and environmentally sustainable development in South Africa. This might imply:

- Promoting land development that is within the fiscal, institutional and administrative means of the municipality; 30 JULY 2019 9
- Identifying urban edge within which development will be permitted to limit urban sprawl;
- Identifying and protecting natural open space system, especially biodiversity;

- Discouraging any non-agricultural activities in high agricultural potential areas;
- Upholding consistency of land use measures in accordance with environmental management instruments;
- Promoting and stimulating the effective and equitable functioning of land markets; and
- Considering all current and future costs to all parties for the provision of infrastructure and social services in land developments.

The Principle of Spatial Efficiency

The spatial efficiency places significant importance on the optimization of existing resources and the accompanying infrastructure. It may imply:

- Ensuring that development initiatives ensure the maximum use of existing resources and infrastructure;
- Ensuring that decision-making procedures are designed to minimise negative financial, social, economic or environmental impacts; and
- Proposing mechanisms and procedures that will ensure efficient approval of development applications.

The principle of Spatial Resilience

It relates to mitigation, adaptability and innovations to secure communities from spatial dimensions of socio-economic and environmental (climate change) shocks. This may imply:

- Ensuring that the municipality design spatial plans, policies and land use management systems that are flexible to ensure sustainable livelihoods in communities most likely to suffer the impacts of economic and environmental shocks.

The Principle of Good Administration

The principle is predicated upon good governance mechanisms, incorporating meaningful consultations and coordination with a view to achieving the desired outcomes across the various planning spheres and domains.

This may imply that:

- All municipal departments and other spheres of government must be involved in the formulation of the SDF and in the implementation thereof to ensure an integrated approach to land use and land development that is guided by the spatial planning and use management systems as embodied in this Act;
- All municipal departments will provide their sector inputs and comply with any other prescribed requirements during the preparation or amendment of spatial development framework;
- The requirements of any law relating to land development and land use are met timeously;
- The preparation and amendment of spatial plans, policies, land use schemes as well as procedures for development applications, include transparent processes of public participation that afford all parties the opportunity to provide inputs on matters affecting them; and 30 JULY 2019 10
- Policies, legislation and procedures must be clearly set in order to inform and empower members of the public.

Legislation

Key legislation that guides, influences and impacts on the Spatial Development Framework (SDF)

- Constitution of South Africa Constitution Act 108 of 1996

- Municipal Systems Act Systems Act 32 of 2000

6.6. Integrated Waste Management Plan

Legislative and Policy Framework

The Integrated Waste Management Plan is informed by the following legislative framework:

- National legislation
- National Policy
- Intergovernmental Relations
- Waste Related Legislation
- National Initiatives
- International Obligations

Waste Management is a holistic approach to waste focusing on prevention and minimisation of both the generation of waste and any negative impact it may have on human health and the environment. Integrated

Waste Management Plan is based on the concept of waste hierarchy, aims for universal service and requires separation at source to be effective.

Cleaner production: Waste prevention and minimization

Cleaner production focuses on production processes in order to ensure that the volume of waste over the life cycle of the product is reduced and minimised. Cleaner production also focuses on the efficient use of natural resources including water and energy, e.g a more energy efficient production process can reduce the need to burn coal for electricity and reduce the generation of ash from power plants.

Collection

- Ba-Phalaborwa removes waste from the following areas:
- Phalaborwa town
- Namakgale
- Lulekani
- Gravelotte

Treatment

Waste can be treated after it is collected and prior to final disposal. The goal of treatment is to reduce the volume of waste and to reduce its potential cause to harm to human health and the environment. Treatment for general includes incineration or biological processes. Other treatment options are available for specialised waste, e.g. the preferred treatment for infectious waste is steam sterilisation in an autoclave.

Final Disposal of Waste

The Phalaborwa waste disposal site is the one site that is currently used. The site is open from 07h00 in the morning to 18h00 in the evening. The dumping site is not a licensed landfill site.

6.7. Recruitment and Retention Strategy

Preamble

Staff recruitment and retention is currently regarded as one of the top priorities for strategic planning in an organization. This is focused on attracting employees to join the organization through focused recruitment and selection strategies and retaining those who are already employed especially those with crucial skills to the organization. The strategy will cover both the psychological aspects of employees, the operational aspects attached to the job or tasks where an employee is appointed and of utmost importance is about motivating staff.

The strategy will address intentions to retain staff, classification of skills and the key aspects of staff recruitment and retention. The strategy will further highlight on what will make employees to stay in the municipality and what interventions measures to put in place to minimise staff turnover.

Objectives

- To become the employer of choice.
- To ensure a conducive and harmonious working environment for employees.
- To ensure employees health and wellness.
- To attract and retain competent staff.
- To retain key staff members whose services are regarded as critical or classified as scarce skills.
- To ensure career development for staff.
- To reduce annual staff turnover rate.

Legislative framework

- Basic conditions of employment Act
- Employment Equity Act 55 of 1998
- Skills Development Act 97 of 1998

Principles that underpins the recruitment and Retention strategy

- The policy is developmental rather than subjective.
- Classification of posts into scarce skills, valued skills and high risk skills.
- The culture of continually developing staff shall be maintained in line with the Skills Development Act and Performance Management System.
- The culture of creating and sustaining a pleasant and humane working environment where employees are given a chance to thrive shall be a norm.
- The potential and reasons for leaving the Ba-Phalaborwa municipality shall be determined by conducting exit interviews and staff morale assessment surveys.
- The Recruitment and Retention policy should by no means be construed to be creating expectations for either promotion or monetary rewards.

6.8. Risk Management Policy

1. INTRODUCTION

The Accounting Officer has committed Ba-Phalaborwa Municipality to a process of risk management that is aligned to the principles of good corporate governance, as supported by the Municipal Finance Management Act no 56 of 2003.

2. RISK AND RISK MANAGEMENT

Risk refers to an unwanted outcome, actual or potential, to the municipality's service delivery and other performance objectives, caused by the presence of risk factor(s). Some risk factor(s) also present upside potential, which Management must be aware of and be prepared to exploit. Such opportunities are encompassed in this definition of risk.

Risk Management is a systematic and formalised process instituted by the municipality to identify, assess, manage and monitor risks.

2.1. BENEFITS OF RISK MANAGEMENT

Ba-Phalaborwa Municipality implements and maintains effective, efficient and transparent systems of risk management and internal control. The risk management system will assist the institution to achieve, among other things, the following outcomes needed to underpin and enhance performance:

- more sustainable and reliable delivery of services;
- informed decisions underpinned by appropriate rigour and analysis;
- innovation;
- reduced waste;
- prevention of fraud and corruption;
- better value for money through more efficient use of resources; and
- Better outputs and outcomes through improved project and programme management.

3. PURPOSE OF THE POLICY

The purpose of this Policy is to outline a high level plan on Ba-Phalaborwa's Municipality risk management philosophy. Ba-Phalaborwa Municipality recognizes that risk management is a systematic and formalized process to identify, assess, manage and monitor risks and therefore adopts a comprehensive approach to the management of risk.

4. SCOPE OF THE POLICY

This policy applies throughout the municipality in as far as risk management is concerned.

5. THE POLICY

The Accounting Officer has committed Ba-Phalaborwa Municipality to a process of risk management that is aligned to the principles of good corporate governance, as supported by the **Municipal Finance Management Act (MFMA), Act no 56 of 2003**.

Risk management is recognised as an integral part of responsible management and the Institution therefore adopts a comprehensive approach to the management of risk. The features of this process are outlined in the Ba-Phalaborwa Municipality's Risk Management Strategy. It is expected that all departments / sections, operations and processes will be subject to the risk management strategy. It is the intention that these departments / sections will work together in a consistent and integrated manner, with the overall objective of reducing risk, as far as reasonably practicable.

Effective risk management is imperative to Ba-Phalaborwa Municipality to fulfill its mandate, the service delivery expectations of the public and the performance expectations within the Institution.

The realization of our strategic plan depends on us being able to take calculated risks in a way that does not jeopardize the direct interests of stakeholders. Sound management of risk will enable us to anticipate and respond to changes in our service delivery environment, as well as take informed decisions under conditions of uncertainty.

We subscribe to the fundamental principles that all resources will be applied economically to ensure:

- The highest standards of service delivery;
- A management system containing the appropriate elements aimed at minimizing risks and costs in the interest of all stakeholders;
- Education and training of all our staff to ensure continuous improvement in knowledge, skills and capabilities which facilitate consistent conformance to the stakeholders expectations; and
- Maintaining an environment, this promotes the right attitude and sensitivity towards internal and external stakeholder satisfaction. An entity-wide approach to risk management will be adopted by Ba-Phalaborwa Municipality, which means that every key risk Ba-Phalaborwa Municipality will be included in a structured and systematic process of risk management. It is expected that the risk management processes will become embedded into Ba-Phalaborwa Municipality's systems and processes, ensuring that our responses to risk remain current and dynamic. All risk management efforts will be focused on supporting Ba-Phalaborwa Municipality's objectives. Equally, they must ensure compliance with relevant legislation, and fulfill the expectations of employees, communities and other stakeholders in terms of corporate governance.

6. ROLE PLAYERS

Every employee is responsible for executing risk management processes and adhering to risk management procedures laid down by the department management in their areas of responsibilities.

RISK MANAGEMENT IMPLEMENTERS

Accounting Officer

The Accounting Officer is the ultimate Chief Risk Officer of the institution and is accountable for the municipality's overall governance of risk. By setting the tone at the top, the Accounting Officer promotes accountability, integrity and other factors that will create a positive control environment.

Management

Management is responsible for executing their responsibilities outlined in the risk management strategy and for integrating risk management into the operational routines.

Other Officials

Other officials are responsible for integrating risk management into their day-to-day activities. They must ensure that their delegated risk management responsibilities are executed and continuously report on progress.

Risk Management Support

Chief Risk Officer

The Chief Risk Officer is the custodian of the Risk Management Strategy, and coordinator of risk management activities throughout the institution. The primary responsibility of the Chief Risk Officer is to bring to bear his/her specialist expertise to assist the institution to embed risk management and leverage its benefits to enhance performance.

Risk Champion

The Risk Champion's responsibility involves intervening in instances where the risk management efforts are being hampered, for example, by the lack of co-operation by Management and other officials and the lack of departmental skills and expertise.

6.10 Five Year Financial Plan

6.10.1 Introduction

This plan is prepared in terms of section 26 (h) of the Local Government: Municipal Systems Act, as amended, which stipulates that a financial plan must be prepared as part of the Integrated Development Plan (IDP).

The five-year financial plan includes an Operating Budget, a Capital Investment Programme, and the sources of funding for the Capital Investment Programme, financial strategies and programmes, various financial management policies adopted by council, key financial targets, key performance indicators, and a budget according to the IDP priorities.

6.10.2 Purpose

To create a medium term strategic financial framework for allocation municipal resources, through the municipal budgeting process in order to ensure the financial viability and sustainability of the municipality's investments and operations.

6.10.3 Responsibility

The finance department collects revenues due to the municipality and pays all amounts due for payrolls and outside vendors. The finance department also manages the investments of municipal funds and municipal borrowings, if any.

The Finance Department is therefore charged with the responsibility of compiling the financial plan in close consultation with the municipal manager, heads of department, IDP, Representative forum, and council or the mayor.

A Finance Portfolio Committee assisted by competent financial planners (Treasurers) should assist in the formulation of alternative financial strategies to be presented to the IDP Representative Forum under the leadership of the councillor Responsible for financial matters.

It is important to note that the priority issue from a financial perspective is the viability and sustainability of the municipality. This goal can best be achieved through efficient and effective financial management. The plans and the strategies that have been formulated were prepared with this in mind.

Maintaining healthy financial base that fully supports municipal services according to mayoral priorities requires constant vigilance. This too is reflected in restructuring and reshaping municipal services, implementing new financial management systems, securing sound recurring revenues and making responsible spending adjustments in light of the revenue growth limitations in order to achieve a balanced budget.

Budget assumptions and parameters are determined in advance of the budget process to allow budgets to be constructed to support the achievement of the longer-term financial and strategic targets.

The municipal fiscal environment is influenced by a variety of macro-economic control measures. National Treasury determines the ceiling of year-on-year increases in the total Operating Budget. Various government departments also affect municipal service delivery through the level of grants and subsidies.

Capital And Operating Budget Estimates

The financial plan includes an Operating Budget (Table 1), the capital investment programme per GFS Classification (Table 2) and the capital investment per funding source (Table 3) for the five years ending 30 June 2016. The information contained in these tables is based on information available at the time of drafting this document and these estimates could therefore possibly change in the future.

Financial Strategy

Managing municipal finances involves both a strategic and operational component. Strategically, the finances must be managed to accommodate fluctuations in the economy and the resulting changes in costs and revenues. Operationally, the municipality must put in place clear financial goals, policies, and tools to implement its strategic plan.

It must be noted that not all municipalities are the same and this should be kept in mind when assessing the financial health of and the setting of benchmarks for a municipality. A municipality can be categorized into either:

- Developed – maintenance
- Developing – growing

Ba-Phalaborwa Local Municipality can be categorized as a developing – growing municipality. Such municipalities require significant additional resources and funding to conduct the growth that is expected of them. In contrast, already developed – maintenance municipalities are mainly concerned with the need to maintain existing infrastructure.

With the demands for growth, come risks that need to be managed. Wherever possible, the Municipality will set benchmarks appropriate for a developing – growing municipality and strive to achieve these benchmarks within the medium term.

As mentioned at the beginning of this plan, the priority from the financial perspective is the viability and sustainability of the Municipality. The financial plan and related strategies will need to address a number of key areas in order to achieve this goal. The areas, which have been identified, are detailed below.

6.11 The Financial Framework

6.11.1 Revenue Adequacy and Certainty

It is essential that the municipality has access to adequate sources of revenue, from both its own operations and intergovernmental transfers, to enable it to carry out its functions. It is further more necessary that there is a reasonable degree of certainty with regard to source, amount and timing of revenue. The Division of Revenue Act has laid out the level of funding from national government that will be received in 2011/12 to 2013/14 financial years.

It is important to track the respective sources of revenue received by the municipality as they can be quite different and can vary substantially depending upon the phase that the municipality is in. Knowledge of the sources of funds will illustrate the municipality's position more accurately. Its ability to secure loans relative to its income streams and its borrowing capacity.

6.11.1.1 Cash / Liquidity position

Cash and cash management is vital for the short and long term survival and good management of any organisation. The appropriate benchmark s which can assist in assessing the financial health of the municipality is:

The current ratio expresses the current assets as a proportion to current liabilities. "current "refers to those assets that could be converted into cash within 12 months and those liabilities which could be settled within 12 months. A current ratio in excess of 2:1 is considered to be healthy.

Debtors' collection measurements have a great impact of liquidity of the municipality.

6.11.1.2 Sustainability

The Municipality needs to ensure that the budget is balanced (income covers expenditure). As there are limits on revenue, coupled with the increased reliance on government grants to fund operational needs , it is necessary

to ensure that the services are provided at levels that are affordable and that the full costs of service delivery are recovered .

However, to ensure that households which are too poor to pay for even a proportion of service costs, at least have access to basic services, there is a need for subsidisation of these households.

6.11.1.3 Effective and Efficient Use Of Resources

In an environment of limited resources, it is essential that the municipality make maximum use of the resources at its disposal by using them in an effective, efficient and economical manner. Efficiency in operations and investment will increase poor people's access to basic services.

6.11.1.4 Accountability ,Transparency and Good Governance

The municipality is accountable to the people who provide the resources, for what they do with the resources .The budgeting process and other financial decisions must therefore be open to public scrutiny and participation. In addition, the accounting and financial reporting procedures must minimise opportunities for corruption. it is also essential that accurate financial information is produced within acceptable timeframes .

6.11.1.5 Equity and Redistribution

The municipality must treat people fairly and justly when it comes to the provision of services. In the same way, the municipality should be treated equitably by national and provincial government when it comes to inter-governmental transfers. "The equitable share "from national government will be used primarily for targeted subsidies to poorer households. In addition, the municipality reserves the right to cross subsidize between high and low income consumers within a specific service or between services.

6.11.1.6 Development and Investment

In order to deal effectively with backlogs in services there is a need for the municipality to maximise its investment in municipal infrastructure (see table 2). In restructuring the financial systems of the municipality, the underlying policies should encourage the maximum degree of private sector investment.

6.11.1.7 Macro Economic Investment

As the municipality plays a significant role in the area, it is essential that it operates efficiently within the national macro – economic framework. The municipality's financial and developmental activities should therefore support national fiscal policy.

6.11.1.8 Borrowing

The strong capital market in South Africa (banks and other lending institutions like DBSA, etc) provides additional instrument to access financial resources .However, it is clear that the municipality cannot borrow to balance its budget and pay for overspending.

Safeguards need to be put in place to ensure that the municipality borrows in a responsible way. In order to have access to this market, the Municipality will need to have accurate and appropriate financial accounting policies and procedures and effective reporting systems.

The manner in which the municipality manages debt or takes on new debt to finance activities will have a significant impact on the solvency and long – term viability of the council.

Strategies and Programmes

With the above financial framework as a background, strategies and programmes have been identified and form part of the financial plan to achieve the desired objective – the financial viability and sustainability of the municipality. In terms of time frames, each of the projects have been identified will be embarked on and completed during a five-year plan.
